Willamette Orchestra	May 16, 1956
University Concert Band	May 20, 1956

President's Message

Willamette University Alumni

January 4, 1956

Dear Friends:

At this time of the New Year it is a pleasure to bring you greetings from the Willamette University campus. The year 1955 has been a busy and useful year for the University. One year ago we were very much in the midst, both of raising money for the Challenge Fund to finance the new building program and in the actual construction of the new buildings. The Auditorium-Fine Arts Building, Doney Residence Hall for Women and The Bishop Memorial Health Center were all completed according to schedule and were occupied at the start of the college year in September. Impressive dedication services were arranged for October 1, 1955 and dedication events continued throughout the month of October, concluding with the presentation by the Dublin Players on the last day of the month. It was gratifying to have the leader of this company pronounce the Willamette Auditorium as one of the three finest college theaters in which they had performed in the United States.

At the start of the college year enrollment was up 5 per cent, and from an academic standpoint the year has been highly satisfactory. Willamette has an excellent faculty of devoted members who are giving splendid leadership to the educational program of the University.

The closing months of the year found increased activity in attempting to complete the financing of the building program. The Challenge Fund has continued to attract the support of the friends of the University and since college opened in September, \$56,000 has been pledged or paid, in addition to previous pledges. At the current time some \$88,000 is required to complete the entire financing of the largest building program in the history of the University. When that amount is subscribed we will have \$1,175,000 underwritten.

At the year's end a great thrill came in the announcement of the Ford Foundation plans for private colleges. Tentatively, Willamette's share in the grant to be made is announced at \$216,600. This is designated for the endowment fund and the interest to be used to increase faculty salaries. Half of the grant is to be paid by July 1956 with the balance by July 1957. Thus, by the college year 1957-58 it may be anticipated that the new grant will be producing between \$8,000 to \$9,000 annually to provide increases in faculty salaries. In taking this dramatic action in announcing over \$200,000,000 for private colleges, the Ford Foundation has pointed out one of the greatest problems facing higher education, particularly in institutions of the type of Willamette. There is a serious need to increase faculty salaries, since increases made from 1940 to the present have not kept up with the increase in the cost of living. At Willamette we are urgently in need of an additional \$1,000,000 in endowment and, in the meantime, the greatest hope for improved faculty salaries is the Loyalty Fund of annual gifts designated specifically for this purpose.

For those of our alumni who have not had the privilege of visiting the campus this year, I hope that you may soon pay us a visit to keep in touch with the developments and the educational program at the University.

With my best wishes for the New Year, I am

Sincerely,

G. HERBERT SMITH, *President*

GHS:er

News of Alumni • Happenings On and Off Campus
CLASS NOTES

Homecoming 1955

An almost steady rain fell on the weekend of the 1955 Homecoming festivities—but the elements failed to dampen the spirits of almost 400 returning alumni.

The campus was abuzz with homecoming spirit. In spite of the damp drizzly weather, the campus awoke at 4:30 Friday morning when the freshmen raked leaves under the supervision of the sophomores, and the independent and fraternity men put finishing touches on their signs.

Friday night featured a recital by Professor Ralph Dobbs in the new Fine Arts Auditorium, which was followed by a student Halloween party.

Saturday morning a convocation was held in the auditorium with Dr. G. Herbert Smith, Dr. Robert F. Anderson, vice president of the Alumni Association, Peggy Buckley, Homecoming Hostess, and Don Peterson, Homecoming Manager, speaking.

The noon barbecue held in the school gym was a huge success. Alums came away from the table with loaded plates and chatted with friends while eating.

Students assisted with unveiling of McCulloch portrait in the Fine Arts Building after the game. From left to right, Miss Stauney Olson, Miss Joanne Terhark, Mr. McCulloch and Mrs. McCulloch.

Alumni attired in snappy chef's hats dished out food to more than 275 alums at the barbecue Homecoming weekend. Pictured serving up vittles to a waiting line are left to right: Mrs. Robert Donovan, Mr. Whipple (Development Office), Harold Hauk, Earl Hampton and Loren Mort, all of Salem.

The Lewis and Clark football team took some of the starch out of the Homecoming slogan, "Bearcats' Spark Stops Lewis and Clark," as the Pioneers downed the Bearcats Saturday afternoon.

Following the game was a coffee hour at the Fine Arts Building. At this time a portrait of Charles E. McCulloch was unveiled. The portrait is a gift from the board of trustees. Mr. McCulloch is president of the board of trustees, and the 1955 Homecoming especially honored the trustees. Mrs. Roy Harland '32 was in charge of the affair. The serving table was very lovely in autumn colors and hot coffee was a welcome sight on such a dark drizzly day.

The dance at Crystal Gardens climaxed the weekend. The winners of the sign contest, Independent Men Students and Delta Gamma, were announced during the dance.

A covered wagon was borrowed for Homecoming, the committee planning

Covered wagons turn up in such unexpected places! Don Peterson, Homecoming manager, is pouring coffee for Mr. Earl Hampton, '48, chairman for the pre-game barbecue; Anita Booth, publicity chairman; and a curious freshman who wanted to find out what it was all about.

to use it for serving coffee at the barbecue, had also used it for publicity purposes. But the wagon was slated to play a much more prominent role as it turned up in the most unlikely spots on campus.

The wagon was "kidnapped" Wednesday night before Homecoming weekend and deposited in the lobby at Eaton Hall. Perpetrators of the deed, apparently students with a yen for Halloween dramatics, improved on the act Thursday night by moving the wagon to the third floor of the building. That is what greeted the Homecoming committee Friday morning. The wagon could only have been put in Eaton Hall and carried up two flights of stairs by disassembling it. School officials enlisted the services of students to tear it apart and carry it out of the building.

If comments carry any weight, this may be called a very successful Home-

Pretty Peggy Buckley, Homecoming hostess, on the strong shoulders of George Koani, Dale Greenlee, Ben Holt and Bob Zoelch.

A good time was had by all at the 1951 class dinner, Homecoming Weekend.

coming Weekend. We hope it will be even bigger and better next year. A capacity crowd is expected at the pre-game barbecue next year—everyone was most enthusiastic about it this year. They particularly liked the opportunity to visit with so many old friends. We'll see you there next year!

A Bearcat-guided lightning bolt thundering down on Lewis and Clark was subject of a Homecoming sign entry that won first place for Delta Gamma in the women's division of the traditional Willamette competition. All campus living organizations participate in the event.

Top prize in the men's division of the sign contest went to Baxter Hall and the above eye-catching entry. This portrays a Bearcat roasting a Pioneer over a spit in a cavern.

THE ALUMNI NEWS

NEW YORK ALUMNI MEET

The Rev. Eugene H. Walters, '52, president of the New York area Willamette alumni, writes of a meeting to be held January 14, 1956. This meeting was arranged to coincide with Dean Robert D. Gregg's visit to the East. The New York alums have long looked forward to this opportunity of renewing acquaintances and receiving a first-hand account of Willamette's development and recent happenings.

(Continued on Page 13)

AROUND the CAMPUS

Ford Grant Includes W.U.

Willamette University, one of 615 four-year private colleges and universities recently chosen to benefit from a 210 million dollar Ford Foundation Grant, will receive \$216,000 within the next 18 months as a part of the program the Ford Foundation has established to help alleviate the most serious problem facing private higher education—that of faculty salaries. The grant is designated for the endowment of the university, and the income will be used to provide an increase of approximately \$125 per year for each faculty member.

The Ford Foundation, through careful study and selection, has set up a program which will provide \$210,000,000 to be given to privately supported liberal arts and science colleges and universities.

The major significant results of the Ford grants have been analyzed by Benjamin Fine in the New York Times: (1) an immediate increase in the salaries of all the 615 institutions concerned; (2) an indirect effect on colleges and universities everywhere; (3) stimulation of business, industry and other foundations to provide additional financial help to the colleges; (4) renewed efforts by the colleges themselves to improve their financial standards; and (5) greater interest by the public in the plight of the college professor . . .

President G. Herbert Smith an-

nounced that this gift was "most welcome and especially timely," as it will be a start towards fulfilling the "second phase of Willamette's development, the addition of one million dollars to the permanent endowment as a basis for much needed increases in faculty salaries."

W.U. Athletics Draw Praise

Al Stump, well known sportswriter, in the January, 1956, issue of *Coronet* magazine, picked Willamette University as an example of a small college whose athletic program is given the proper emphasis in the midst of a nation of sports corruption and scandal. Stump, in his article, "The Shame of College Sports," states that Willamette, with its high standards in regards to eligibility and scholastic attainment and policies against financing players was the type of college which is still supporting fast, clever teams worthy of the keenest community interest.

Mr. Stump exposes for public scrutiny the dossiers of investigations currently involving colleges throughout the nation who are abetting the contamination of amateur athletics.

In lauding Willamette and such other schools as Swanee and John Hopkins University, Stump asserts that this would be the type of college his son would attend in order that he would understand that "giving, not taking, is the essence of sportsmanship."

CARL G. DONEY

Ex-President Of W.U. Dies

The sudden death of Dr. Carl Gregg Doney, former president of Willamette University and recently resident of Columbus, Ohio, on November 4, 1955, severed the final ties between the university and the man who had served the campus during a major portion of his life. His wife preceded him in death a year ago.

For 19 years, from 1915-1934, Dr. Doney ably inspired the growth of the endowment fund and instigation of a building program as well as bringing Willamette's scholastic standing into national prominence. By the students, he was as well known for his quick wit, friendly manner, and promotion of campus traditions as he was for his vast knowledge of literature, history and administrative ability.

Born in Columbus, Ohio, in 1867, Dr. Doney received a greater portion of his education in that state. From Ohio State University he earned both a bachelor of science and bachelor of laws degrees and later, in 1902, a doctorate of philosophy award. In addition to holding a masters of arts from Ohio Wesleyan University, he also was a recipient of honorary degrees from Harvard University and Willamette University.

Shortly after his marriage to Jennie Evans, Dr. Doney's earliest work was

Faculty

Dean Robert D. Gregg of the College of Liberal Arts journeyed from the campus in mid-January to attend a meeting of the United States Chamber of Commerce committee on foreign policy in Washington, D. C., on January 12th and 13th. He has been a member of the group during the past two years. While in the East, the Dean extended his travels to New York on January 14 to visit with the New York area alumni.

President G. Herbert Smith left on January 5 to participate in a conference of the National Association of Schools and Colleges of the Methodist Church in St. Louis, Missouri. President Smith will be one of the principal speakers at the session which precedes the annual meeting of the Association of American Colleges.

Dr. George Martin, Professor of Education and Director of Graduate Study, attended the White House Conference on Education in Washington, D. C., from November 28 to December 1 as one of the delegates from the State of Oregon. Since his return, he has been appointed to a committee of three to plan for the continuation of the White House Conference program within the state. This appointment was made by Governor Patterson.

Dean Melvin Geist of the College of Music represented the University at the 31st annual meeting of the National Association of Schools of Music in St. Louis during late November. Dean Geist is vice-president of the region which includes the states of Washington, Oregon, Idaho and Montana.

in the ministry of the Methodist church. Later he served as president of West Virginia Wesleyan College in 1907 until he was called to Willamette in 1915.

The Carl Gregg and Jennie Evans Doney Hall, new women's dormitory on campus, is appropriately named as a living memory to this man and his wife who gave so much of their interest, energy, and talent to the university throughout their years of close association.

HERBERT L. DEAL LOAN FUND RECEIVED

Checks totaling \$1,385.30 were received by Dr. G. Herbert Smith recently for the establishment of a Herbert L. Deal Loan Fund at the university. Deal, a Willamette student in 1924, passed away last May at which time he served as assistant vice-president of the American Telephone and Telegraph Company in New York.

Two hundred fifty-five officials offered contributions following the suggestions of his widow, Mrs. Kathryn Deal of Summit, New Jersey, also a Willamette University alumni, that such a fund be instigated.

In 1953, Deal pioneered the organization of the Bell System Executive Conference, a broad gauged training conference for Bell System department heads. The contributors were "graduates" of the conference and represent every state in the Union as well as Canada.

Willamette Travels To National Moot Court

Willamette University's delegates to the Moot Court competition won the top honors for the regional decision but were defeated in the first round of the national competition at New York City on December 15. The Willamette representatives, William Whitney of Portland, and William Sundstrom of San Carlos, California, were said by many to have put up a good argument. Jean Lowman, Vancouver, Washington, also went to New York to help the team members. She was responsible for the brief-writing that forms the basis from which the oral arguments are derived.

It's Time for Glee

Plans are under way for the 1956 annual Freshman Glee. Committees are beginning to start their work—soon the sound of tramping feet will be heard in pre-dawn darkness coming from the gym. The Glee will be held this year on Saturday, March 24.

DR. C. GILBERT WRENN
Coming to W.U.

Wrenn to Head Conference

Dr. C. Gilbert Wrenn, '26, Professor of Educational Psychology at the University of Minnesota, and past president of the American College Personnel Association, will be on the Willamette campus, March 10, to head a guidance conference for the Northwest and Northern California High School counseling personnel.

Dr. Wrenn is known nationally for his outstanding work in the area of human relations. It is his belief that any career in the area of human relations has its best college foundation in a Christian liberal arts program. He cites the Christian liberal education gained at Willamette as the most adequate foundation in ideas, experiences, and appreciations for professional training at the graduate level.

Art Gallery Exhibits

The art gallery in the Fine Arts building is now showing an exhibition of recent oils and collages by the Portland painter, Amanda Snyder. Mrs. Snyder creates remarkable collages out of torn bits of paper she selects and assembles as she does oils on a palette before starting a canvas. Eighteen pictures by Mrs. Snyder have been hung—nine are collages.

Several exhibits have been featured this year. Mr. Carl Hall, artist in residence at Willamette, had a showing during October. Mr. Demetrios Jameson, of Corvallis, Ore., had a showing hung

during November. Jameson is a much honored artist with a long list of winnings and awards. Mrs. Ruth Roach, from Iowa, an internationally recognized artist, had hand wrought silver jewelry in the corridor case during opening month celebration. The gallery is an important event in art in Oregon, especially for the immediate area the University serves.

Willamette to Share General Foods Grant

Willamette University is one of the ten schools in the Oregon Colleges Foundation, Inc., to share equally in the \$5,000 grant contributed by The General Food Funds, Inc., New York City.

The gift is reportedly a part of a 1955 aid-to education program set up by the food corporation with grants totalling \$278,000 to be given to colleges and universities throughout the nation.

Blood Drive Tops Goal

Willamette tops its record! A new high of 355 pints of blood were lent by students and faculty during the November drive on the Willamette campus. Previously the record year was 1953, with 322 pints given. Last year the total was a scant 200 pints. Pledge cards numbering 450 were signed and more than 400 people volunteered blood on the day of the actual donation in the gym. All of the donations came from the student body with the exception of eight faculty members.

Dr. Currey Edits

In the December issue of the Oregon Educational Association Journal, Dr. Gale Currey, professor of physical education for women, published an article on the University of Oslo, Norway, and its summer school session for Americans. In her writing, she describes the program of the summer while presenting an interpretation of the school's philosophy of physical education and physical fitness which to them represents an integral part of their culture.

Students to Study In Nation's Capital

The three Willamette juniors selected to participate in the Washington semester program next semester at American University in Washington, D. C., are Tom Murdock, Klamath Falls; Pat Farley, Salem, and Martin Wolf, Vancouver. (Continued on Page 7)

LESTLE SPARKS HONORED...

Life Membership Awarded

Recently honored for his active support of physical education, Lestle J. Sparks, director of physical education at Willamette University, was awarded a lifetime membership in the Oregon Association of Health, Physical Education and Recreation during their annual convention this year.

Graduating from Willamette in 1919, Mr. Sparks has been a member of the faculty since 1925 during which time he served for 17 years as Graduate Manager of the Willamette student body. His master's degree was earned in the field of hygiene and physical education at Stanford University in 1937. Early in his career at Willamette, he served as Assistant Athletic Coach, then assistant professor of physical education and by 1944, Mr. Sparks was acting as professor and head of the Department of Physical Education.

His interests have been directed to furthering the scope of physical education through the passage of various state laws requiring health and physical educational training in Oregon public schools. He also contributed invaluably to the successful organization of the state class A and later B tournaments in basketball.

Not only has Mr. Sparks been active in the field of higher education, but he has also been an enthusiastic participant in promoting civic interest and contributing an undetermined amount of time to community projects and offices. He has been supervisor of recreation for the city of Salem and currently acts in an advisory capacity to the Salem Playground Board as well as to various state boards concerned with standards of physical education and school health.

At present, Mr. Sparks holds life membership in the AAHPER; is a member of the American Association of University Professors, Phi Delta Kappa, and a number of other professional organizations.

There are numerous other accomplishments and contributions that "Les," as he is most frequently called, has made to his profession. His constant goals have been the improved health and welfare of children and youth through well planned and organized programs of health, physical education and recreation.

"LES" SPARKS ready to play a game in which he excels.

CAMPUS NOTES

(Continued from Page 6)

ver, Washington. To be eligible for the honor, students must be majoring in political or social sciences.

While in the nation's capital, each student will complete an individual project worked out in conjunction with some governmental bureau. Also, they will have an opportunity to meet in seminars led by government officials as well as to take various courses in their major fields while studying the workings of government.

The first college on the west coast to attain membership in this program, the 1956 delegation will constitute Willamette's sixth year of participation.

U. S. STEEL PRESENTS GIFTS

A gift of \$300 was made recently by the United States Steel Corporation to the Willamette University library. The gift will be used in acquiring library material for the physics and chemistry departments.

Salem Area Mothers' Club Formed

A newly organized Mothers club for the University has been established for the Salem area since the November Homecoming Weekend. Offices for the association are as follows: Mrs. William Cook, president; Mrs. Raleigh Van Cleve, Silverton, vice president; Mrs. L. H. Campbell, secretary, and Mrs. John L. Cauble, treasurer. Mrs. Murco Ringnalda is faculty adviser for the group.

(Continued on Page 12)

The ALUMNUS Turns to COLLINS

*Combined Degree Program . . .

One of the fine opportunities provided for students entering Willamette is to be found in the combined degree programs. The work in the first two years is designed to provide the broad basic foundation of liberal arts education.

There has been a growing concern on the part of leaders in engineering, forestry, law and the medical arts for basic preparation in liberal arts as the foundation of specialized study. Their official organizations (e.g., the Society for the Promotion of Engineering Education) are insisting that their members be trained as citizens with a reasonably broad view of political, social, and economic problems at local, national, and international levels, as well as trained in the specialized skills of their professions.

This program has been entered into by agreements between Willamette University and Carnegie Institute of Technology, Columbia University, North-

western University, Stanford University and the University of Southern California for the program in engineering and with Duke University for the work in forestry.

A student may attend Willamette for three years, taking the regular liberal arts course with a major in science, and after three years he may transfer to one of the cooperation schools. At the school of his choice, the student will spend two years in any one of the several curricula, and at the end of these two years—a total of five college years—he may receive the Bachelor's degree from Willamette University and the Bachelor of Science in Engineering or the Master of Science in Forestry, depending upon the program pursued. In this way the student combines a broad understanding of English, science, mathematics, social science, and foreign language with intensive work in an outstanding technical school.

Mathematics . . .

Dr. Chester F. Luther, Professor of Mathematics, is shown explaining a problem of equation to his class. This problem, shown on the blackboard, is concerned with the force exerted by water upon a trapezoidal dam.

Mathematics has been referred to as a mirror of civilization because its growth has reflected man's progress. Opportunities in mathematics are greater than they have ever been; and for a holder of M.A. or a Ph.D. degree they are increased. The Combined Degree Program can be used in this field. The holder of an advanced degree may engage in college teaching and research, actuarial work, employment in industry, atomic energy, aircraft design, cartography and statistics.

Represented among Willamette graduates of the past 15 years who were mathematics majors are the following: high school teacher, college professor, college dean, cryptologist, statistician, business man, farmer, medical doctor, dentist, engineer, meteorologist, housewife, state employee, lawyer, actuary, research workers in atomic energy, chemistry, and cancer therapy.

FOOTNOTE

* Much of the material for these articles is from the newly published booklet "Your Career" edited by George B. Martin, Ed.D. This is a very timely booklet and has been prepared for the high school student, his counselor, parents and others interested in a liberal arts college program.

You may request a copy by writing the Director of Admissions, Willamette University.

Biology...

Many opportunities are open to the person trained in the biological sciences.

TEACHING—Teaching in secondary schools and in junior colleges and, with advanced degrees, in four-year colleges and universities, is an increasingly important profession.

GOVERNMENT—State, federal and local governments require trained personnel in agriculture, wildlife management, conservation, and laboratory technology. Museums employ curators, preparators and nature study directors.

BUSINESS—Private businesses employ technicians and research investigators.

MEDICAL ARTS—The study of biology is most frequently the liberal arts background for those entering medical, dental, and nursing schools for advanced professional training.

Willamette students have taken their advanced training at many fine medical schools throughout the country.

It is interesting to note that every Willamette applicant to medical schools this past year was accepted. This is a very good reflection of the standards of our courses and professors.

A program of training in medicine, dentistry, and nursing has been agreed upon between Willamette and the Oregon Medical and Dental schools. A student interested in medical arts is assigned immediately to pre-medical advisors who assist in planning the college work.

Mr. Donald Breakey, Instructor in Biology, is watching Sharon Bates, a biology major, as she dissects a starfish in the zoology laboratory.

Dr. Martha E. Springer, Professor of Biology, instructing a group of students. With her are, left to right: SaVanne Wood, Carol Frey, Stanly Culy, and Gerald Baker.

• • •

Dr. Cecil R. Monk, Professor of Biology, is shown here at his microscope examining some slides. This is a very familiar sight in the zoology department.

Physics...

The atomic age has increased the demand for trained physicists in government service and also in private industry. The number of students who now give at least part of their time to the study of physics is an indication of the growing interest in this field of knowledge and, also, of a fresh realization of actual and anticipated demands for physicists.

A graduate majoring in physics can find a position as high school teacher, research assistant, and assistant to more highly trained personnel working in either the theoretical or the experimental phases of physics. Such a position is open to women as well as men.

For the physics major who continues to work in physics toward an advanced degree (the Combined

Captain Howard W. Fitch, Assistant Professor in Physics, is explaining the results of an experiment to Walter Wilson and Ralph Wilson, both of whom are physics majors. They are looking at a spectrograph, an instrument for analyzing the intensity of light.

• • •

Dr. Robert Purbrick, Professor of Physics, at his Geiger counter in his laboratory. Dr. Purbrick built this extremely sensitive Geiger counter himself. Here he is testing a piece of fused sand from the first atomic test of 1945 in New Mexico. The Geiger counter was clicking madly at the time this picture was taken.

Degree Program could be used here), a variety of additional opportunities is offered.

TEACHING—Teaching of future physicists in colleges and universities.

GOVERNMENT—A variety of opportunities is offered by the Atomic Energy Commission, the Armed Forces laboratories, the Bureau of Standards, the Public Health Service and allied fields of medicine and biology, the United States Geological Survey and the United States Hydrographic Office.

BUSINESS—There are almost unlimited jobs in private businesses. The physicist is needed by radio, television, and telegraphic-equipment manufacturers and in the oil and chemical industries.

Gerald Pearson, '26, research physicist for Bell Telephone Laboratories and co-inventor of the solar battery, says, "It is a tribute to Willamette University that at the Bell Telephone Laboratories, one of the leading scientific research centers of the world, five members of the technical staff are Willamette graduates."

Chemistry...

Careers Through Preparation in Chemistry

The student who selects chemistry as his profession may use it in many fields.

GOVERNMENT—Local, state, and federal government require chemists in many fields. The armed services use research chemists in their seeking of new knowledge.

PRIVATE BUSINESS—An industrial chemist developing new products and controlling industrial processes; a technical salesman promoting the introduction and use of new materials in our industrial economy and everyday life; an administrative aide or manager in a chemical or related industry; one who applies his knowledge in forestry and the use of forestry products; a collaborator with biological and medical workers in the battle against diseases.

TEACHING—The training of future scientists in secondary schools and in junior colleges and, with advanced degrees, in four-year colleges and universities is very rewarding and Willamette has many eminent chemists among its graduates.

Many Willamette chemistry students enter medical and dental schools and engineering colleges throughout the United States.

Dr. J. Charles Nichol, Associate Professor of Chemistry, is watching as Lewis Schaad, senior with his major in chemistry, conducts an experiment. The experiment was concerned with the determination of the cooling curve of an alloy by means of thermocouple, using a potentiometer.

Dr. Charles Johnson, Professor of Chemistry, is shown with a distillation apparatus. In this experiment he is purifying an organic compound. The entire third floor is used by the Chemistry Department. There are several large laboratories and storage rooms.

Amidst an array of chemistry apparatus, Jim Mercer, Jr., pre-med student, sophomore, and Esther Gwilliam, are busy conducting their experiments.

The Bearcat CAGERS

Willamette University's chances in the 1956 Northwest Conference basketball race were none too bright after Coach John Lewis' Bearcats dropped a pair of tilts to the College of Idaho Coyotes in opening conference action at Caldwell, Idaho, and Ontario, Ore., Friday and Saturday, Jan. 6 and 7, by scores of 55-50 and 71-63.

The double setbacks got the WU quint off on the wrong foot in a race generally figured to be a close one. College of Idaho rated the favorite in the '56 campaign, even though currently without the services of sensational Elgin Baylor, who burned up the league a year ago. Baylor has transferred to Seattle University.

The Willamettes went into the conference race with a December record of five wins and five losses against non-loop opponents. Big Pete Reed, senior from Scappoose, has been top scorer for the club in the early going, with 6-7 Neil Causbie, Albany junior, running second. Other men seeing regular action have been 6-6 Jack Bishop, Salem; Jerry McCallister, Milton-Freewater; Vic Backlund, Bandon; and Ron Taylor, Corvallis.

Reserves seeing considerable play include Bill Turlay, Portland; Tom Johns, Pendleton; Ron Fitzgerald, San Carlos, Calif.; and Keith Driver, freshman from North Marion high school.

Coach Johnny Lewis (right) goes over plans with five members of his squad. From left to right with Lewis are Jerry McCallister, Jack Bishop, Neil Causbie, Pete Reed and Ron Taylor.

A feature of the pre-conference slate was a pair of games with the touted Portland Pilots, which saw the Bearcats gain a split. WU upset the Portlanders 61-60 in an overtime on the 'Cat court December 6, but dropped a 77-42 game

to the Pilots at Portland Dec. 29.

As *The Alumnus* goes to press, the Bearcats triumphed over the Whitman Missionaries, 65-61, Jan. 9, and will face Linfield at Salem January 14.

CAMPUS NOTES

(Continued from Page 7)

"COZY" CLOSES

Remember when . . . coffee time found you treading down State street toward the "Cozy" for a break between classes? The 28 year reign of the Cozy Cafe, eating institution for Willamette students and faculty, came to an end in mid-December when it closed its doors for the final time.

The cafe, operated in the easy-going style of the vanishing confectionery store, served as a welcome relaxation in the busy routine of campus life. Backbone of the place, say her friends, is Mrs. Estella McLin, widow of Charles L. McLin, who died two years ago. Mrs. McLin is affectionately remembered as being an avid athletic fan.

"More free meals have been served to more hungry Willamette students by 'Mrs. Mack' than by any other person

in town," says Mark Hatfield, dean of students.

Through the years Mrs. Mack has befriended a multitude of students, giving them odd jobs to do in exchange for meals, and often as not, giving motherly advice.

Aided by her sister, Mrs. Jessie Howard, Mrs. McLin ran a very informal restaurant. Customers often served themselves and some times made their own change. One of the regulars said that he usually went into the kitchen and made his own tea.

On the final day of business in December, the "Cozy's" customers turned the tables on Mrs. McLin, figuratively speaking. They did all the serving and waiting on tables. They even gave her two blankets as gifts. John Lewis and Ted Ogdahl, Willamette coaches, served orders and washed dishes.

Mrs. McLin, when asked about her future plans, commented, "When we close, I think I'll just retire and take it easy for awhile."

Hatfield Announces Candidacy

Dean Mark Hatfield, now State Senator from Marion County, announced his candidacy to the Republican nomination for secretary of state in mid-November. At the same time, he made known that he will not renew his contract with Willamette University when it expires in July, 1956.

The Dean of Men and assistant professor of Political Science made clear that his decision to enter the race for Secretary of State involves more than just a continuation of his political career. It means that he will leave the educational field for full-time politics.

Hatfield expressed "regret" at the thought of leaving Willamette. "My decision is based upon a great deal of soul searching," he remarked.

CAMPUS NOTES

(Continued from Page 12)

Students Accept the Challenge

Contributions amounting to \$2700 from the students of Willamette have been received this year as the students' part in the extensive building program of the Challenge Fund, according to Volney Sigmund, junior from Bend, Ore., and chairman of the fund raising committee.

Twelve hundred dollars more needs to be collected from the student body in order to fulfill the \$10,000 pledge made by them in 1953. Sigmund feels that his committee can raise the money before the end of the spring term and perhaps more than the pledged amount since they have until January, 1957, to complete the campaign.

Ecumenical Conference Draws W. U. Delegation

Six Willamette students and one professor were selected to participate in the Ecumenical student conference of the Christian church from Dec. 27 to January 1 at Ohio University, Athens, Ohio. Over 3,000 students and leaders, including international students, met to seek a clearer understanding of a world in conflict and to know the meaning of the church's role in the economical, social and political upheaval and to discover ways in which they can participate effectively in the present actions of the church.

Speech Duo Capture Prizes

Lewis Bright, sophomore from Medford, and Marian Rutledge, senior from Beaverton, brought honors to Willamette University when each copped titles in the men's and women's divisions of the annual State Extemporaneous Speaking Contest at the University of Portland in early December.

This is the first time the two top awards have gone to one school since 1947. The winners were coached by Dr. Howard W. Runkel, professor of speech and director of forensics at Willamette.

A NEW LOOK . . .

With the addition of the beautiful new buildings on campus we were feeling drab—we wanted to be new, too! We started out with a "face lift," but ended up with a new body as well. The name's the same, but that is where the resemblance ends.

Do you like our magazine? Why not let us know what you think about it. Did we do something wrong? What do you want most in your Alumnus? We will do our utmost to please you!

THE EDITORS.

WINTER 1955-1956

News of Alumni

(Continued from Page 4)

Grad Helps With Nuclear Science

Dr. Clyde E. Wiegand, W.U. '40, gained recognition in the field of nuclear science recently as a member of the team of scientists at the University of California which developed the artificial antiproton, a negative charged particle of water. It has long been believed that these antiprotons existed, but because they disintegrate upon coming in contact with normal protons, it has been impossible to prove their existence.

Dr. Wiegand graduated from Willamette University with a combined degree in physics and mathematics, and earned his master's and doctor's degrees in physics at the University of California. He worked as a research physicist at the atomic energy testing grounds at Los Alamos, New Mexico, and has continued his work in the field of atomic research at Berkeley.

DAY ON NATIONAL BOARD OF MEDICAL EXAMINERS

Dr. Paul L. Day ('21) is a member of the National Board of Medical Examiners. A separate committee composed of outstanding department heads, clinicians and teachers frame the examination questions and assemble the tests for the board.

CARLSON APPOINTED WELFARE ADVISOR TO PAKISTAN

Victor D. Carlson, '33, has been named by the United Nations to serve as a social welfare advisor in Pakistan.

Mr. Carlson, who graduated from Willamette with a BA in political science and a master's degree in social service administration from the University of Chicago, will work at setting up and carrying out a nation wide program of social services in Pakistan.

The appointment was made by the

U. N. technical assistance administration. He is ex-county administrator and field administrator with the Oregon State Public Welfare Commission.

JOHN B. McCOURT GETS APPOINTMENT

Mr. John B. McCourt, '24, a former Multnomah County, Oregon district attorney, was appointed as regional counsel for the Small Business Administration.

The former chairman of the 12th Regional National Wage Stabilization Board served as district attorney for Multnomah County from 1946 to 1954. He is a graduate of the University of Oregon and Willamette University Law School.

David Card Has Article Published

David E. Card, a graduate of the Law School in 1952, recently had an article published in the November issue of the Labor Law Journal, a well-known commerce clearing house publication. Mr. Card submitted this paper in partial fulfillment of his doctorate requirement. The paper was entitled "Information Requests in Collective Bargaining," and presents a "discussion of the problems raised by the NLRB doctrine that refusal to furnish certain information during negotiations is a violation of the legal requirements to bargain in good faith."

Dr. Ben Briggs Research Manager

Dr. Ben T. Briggs, '34, has been appointed research manager of the Olympic research division of Rayonier, Inc., at Shelton, Wash. His wife, Mary (Scott) also graduated from Willamette in 1934.

Dr. Briggs has held several responsible positions with the company, the latest of which was research supervisor. Dr. Briggs has long been identified with Rayonier's broad research activities and, in particular, the processing of cellulose from wood.

Class Notes

1890

Deceased: Mrs. Virgil Peringer on November 11, 1955.

1924

W. O. Hisey and Margaret (McDaniel) Hisey are now living in Albany, Ore., where Mr. Hisey is vice-president and manager of the new \$5,000,000 Western Kraft Corporation paper-making plant. He was formerly associate professor of pulp and paper technology at the New York State College of Forestry and more recently, vice-president of Sandy Hill Iron and Brass Works.

1926

Richard W. Briggs resigned as Director of the San Francisco Office of Federal Housing Administration and is now in the construction business as vice-president and general manager of Eichler Homes, Inc., with offices at Palo Alto, Calif. He currently lives in Menlo Park, Calif.

1928

Harold S. Mumford is in charge of the Chemical Laboratory of the Colgate-Palmolive Company in Berkeley, California.

1932

Bernice Orwig, Director of Nursing Education at Portland University, was appointed in April to the Oregon Board of Examiners for graduate nurses.

1933

Dr. Elizabeth Bishop is living in Portland after spending four years in Alaska with the U. S. Department of Public Health.

1935

David and Margaret (Notson '33) Moser are now living in Beaverton, Ore., where Mr. Moser is sales research manager for Consolidated Freightways at Portland, Oregon.

Bill and Isabel (Morehouse '36) Lemmon and family are residing in Cardiff, Wales, for one year. During this year, they are traveling throughout western Europe after which they shall return home to Tacoma, Washington, where Mr. Lemmon is teacher and coach for the Tacoma school district.

1937

James H. Pyke is now serving at the Westminster Theological Seminary of Westminster, Maryland. He has recently returned from Indonesia where he was principal of the Methodist English School at Medan, Sumatra, Indonesia. Two of his former pupils in Indonesia are now attending Willamette University.

1938

Lee V. Ragsdale is supervisor of

health, physical education and safety for the Medford public schools.

Howard M. Teeple recently moved to Decatur, Georgia, where he is engaged as research assistant for the International Greek New Testament Project.

1940

Dorothy Cutler presently works as library consultant at the Washington State library in Olympia, Washington.

1941

Oscar L. Donaldson has been appointed assistant district manager at the Salem office of the Social Security Administration. Preceding this change of office, he was supervisor in the Long Beach, California, department.

1942

Born: To Joan James (Du Rette) and Warren James, a son, Gregory Allen, Dec. 19 at Everett, Wash. This is their fourth child.

Elizabeth Hamilton Caldwell, her husband, and two children live in Seattle, Wash. Elizabeth is teaching the beginning class for severely hard of hearing children in the Seattle public schools and finds it very interesting.

Born: To Barbara Compton Smith, a daughter, Michelle, July 29, 1955. Barbara and her husband are living in Salem.

Dr. and Mrs. (Dorothy Tate) Hume Downs are the proud parents of a son, Brady, born last June. In July, Dr. Downs joined the staff of the Salem Clinic, specializing in surgery exclusively, after having served for the past several years as resident physician at the U. S. Veterans Hospital in Portland.

1946

Dr. Dale Hunsaker completed a recovery from tuberculosis and, as of January 1, is expected to return to Jefferson Davis hospital in Houston, Texas, to complete his residency in obstetrics.

1947

Evelyn Chapman Back, her husband and two children, Paul and Nancy, are living in Ribera, Calif. Mr. Back is with a Los Angeles branch of Crown Zellerbach Co.

Married: Elaine Berquist to D. D. Iverson. Their home is in South Pasadena, Calif.

Harold E. Malde is with the U. S. Geological Survey Federal Center, Denver, Colo. His work includes aerial geologic mapping throughout the U. S. and possessions.

James H. Elliott is curator of the Walker Art Center in Minneapolis, Minn.

1948

Katherine Schissler is secretary to the Director of Reading and Study Skills Center in New York City.

William and Patricia (Mansfield '47)

Cooke with their two children are now making their home in Roseburg, Oregon. Mr. Cooke is superintendent and technical director of Pacqua, Inc., a new million dollar Particle Board Plant.

Richard Wicks and family are now living in Inglewood, Calif. Mr. Wicks is a professor of law at the University of Southern California.

Born to Evelyn Jory Clawson, a son, Douglas, at Mountain View, California. Mr. Harold Jory (W. U. '15), W.U. registrar, visited his new grandson in November while attending the annual Coast Collegiate Registrar's Association.

Michael Carolan is now in Rome, Italy, on a Fulbright grant. He is studying opera at a school connected with the Rome Opera House. He is enjoying his stay in the very interesting and beautiful country.

Orville and Grace (Morton '48) Sparrow are now making their home in Portland. Mr. Sparrow is connected with the Willamette Iron and Steel Company at Portland.

1949

Dr. R. Holmes Johnson is now practicing medicine at Kodiak, Alaska.

Jerald G. Mulkey, assistant professor of air science and tactics at Washington University's Air Force Reserve Officers Training Corps, recently was promoted to the rank of captain.

Clifford B. Olsen is practicing law at John Day, Oregon.

Dr. Wm. S. Famenow received his M.D. degree from the University of Alberta last May and is now interning at Holy Cross hospital in Calgary. He is married and has a 17 months old son.

1950

Lt (jg) Joe Brazie, M.D., is currently stationed at U. S. Army hospital in Teheran, Iran, and is finding life in the Far East very interesting.

Married: Roberta Batey to Robert F. Touchette in July. They are now living at Elk Grove, California.

Dr. Leland W. Hoar is now serving his internship at the Minneapolis General hospital, Minneapolis, Minn.

Married: Louise Wood Holmes to Rodney D. Royce in October at Seattle where they are now residing.

Cecil Johnson has announced the opening of a law office in the Pioneer Trust Building in Salem. He will continue working swing shift as deputy sheriff, a position he has filled for over three years.

1951

E. Herbert Carlson has recently become a member of the chemical research department of Montezano Chemical Company's Research & Engineering Division. He received his BS degree in chemistry from Willamette and was

awarded his PhD degree in organic chemistry by Carnegie Institute of Technology in 1955. Mr. Carlson, his wife Joan (Klindworth '51) and their son Lawrence are now residing in Dayton, Ohio.

Olwyn and Patricia (Palmer) Davies and daughter are living in Tacoma, Wash., where Dr. Davies is attached to the Madigan Army hospital.

Dr. Robert S. Miller, Lt. (jg) MC, USNR, is currently attached to the U.S. Naval hospital, Portsmouth, Va.

Alan C. Guody has been working on his master of Fine Arts degree at Yale University.

Marion Sparks has announced her engagement to Duane H. DaBoll of Rochester, N. Y. The news came from Europe where Miss Sparks is a recreation leader with the U. S. Army Special Services section at Kaiserlautern, Germany. Mr. DaBoll received his degree in electronics at the Rochester Institute of Technology and is presently stationed with the army as a specialist third class. The wedding is planned for next summer in New York following Mr. DaBoll's release from active service.

Born: To **LuDene (Hargrave) and George Collins** in January, 1955, a son, Gregory. They are now living in Kitzengun, Germany, where Mr. Collins is stationed with the U. S. Army.

1952

Don Hosford is coaching football at Sheridan high school, Sheridan, Ore.

Married: **Molly Ann Halliday to Maurice S. Bliss**, on November 12, in Sacramento, California.

Married: **Donalee Lanham** to Richard L. Gasko, October 8 at Mount Shasta, California. They are now making their home near Castle Air Force Base, Merced, Calif.

Donna Stoddart Seeman writes that she is now at the University of Chicago doing research in exfoliative cytology, for the early diagnosis of cancer, and working with a physician brought from Berlin for the study.

1953

Robert and Dona (Mears) Platenberg are living in Kent, England. Their son, Craig, was born in October. Lt. Platenberg is flying 86-Ds for the USAF and expects his "tour" to last until 1957.

Eli E. Kapostins is an EEG and EKG technician at Englewood hospital, N. J.

Shirley Hutchinson is doing graduate work at the Graduate School of Social Work, University of Denver, Denver, Colorado.

Stanley C. Nelson is working on his MA in literature at the University of Munich, Munich, Germany. He writes that he is finding Germany interesting

and is enjoying touring the area and participating in winter sports.

Thomas and Frances (Smith '55) Scheidel with their daughter, Susan, are now living in Seattle, Wash., where Mr. Scheidel is an acting instructor at the University of Washington and continuing to work towards his PhD in speech.

Clifford and Jane (Notson '54) Gregg have recently moved to Seattle, Wash., where Mr. Gregg is working with Frederick and Nelson's department store. The couple returned in early December to the Northwest from Columbus, Ohio, where Mr. Gregg had been based while in the army.

Born: To **Wilma (Aller) and Eldon L. Zicker**, a son, William, last spring. At last reports, Wilma and her husband were taking turns going to class and watching the baby.

Married: **Alcetta Gilbert** to Robert K. Campbell during the summer months in Seattle, Washington. Alcetta is currently working on a research project with the biology department of the University of Washington.

1954

George J. Woodrich announces the opening of offices for the practice of law in Eugene, Oregon.

Married: **Edna Marie Hill** to Eugene Natkin on September 10 at the First Methodist Church in Salem. Mr. Natkin is studying dentistry at the Dental School of the University of New York while his wife enjoys a teaching fellowship at the Julliard School of Music. She is also studying the violin and piano-ensemble with Louis Persinger.

Deceased: **James R. Todd**, husband of **Ann Gibbons Todd**.

Barbara Manley is currently teaching biology at Limestone College, Gaffney, South Carolina, and working toward the completion of her master's thesis for Duke University.

Paul D. Baker has now completely recovered from a bout with tuberculosis which caused him to miss Dr. Bennett's tour through Europe with other Willamette students during the summer of 1954. At present he is taking a series of post graduate courses at Willamette.

1955

Henry A. Stevenson is a designer and builder of small boats in Salem.

June Christensen has entered nurses training at the University of Oregon Medical School of Nursing in Portland.

Bill Lasswell enlisted in October for a four-year term in the U. S. Air Force. He is now located at Parks Air Base near Oakland, Calif.

Marilyn Witham is currently working for her MS in Retailing at New York University, N. Y.

Lost or Strayed . . .

If you know the address of any of these graduates, please send it to the Alumni Office, Willamette University.

LOST GRADUATES

1931:

Trygve Brauti, Francis E. Fuller, Rosalind Van Winkel Melton, Esther Alice Ross, Norman Martin Sorensen, Ellen Mae Standard.

1939:

Marjorie Church, William Walter Clemes, Betty Jane Craney Lusk, Elizabeth Ellen Dotson Patapoff, Gladys Eggleston Tavlin, Elizabeth Jean Fitzpatrick, Norma Darlene Fuller, Eugene Vincent Hill, Carolyn Hunt LaMarr, Jean Lauderback, Helen Bennett MacTarnaghan, William Miller, Ella Morris Minnenman, Paul Nepar.

1940:

Agnes Mickey, Chester Oppen, Frances Strand, Lucille Strauss, Erma Taylor Rankin, Margaret Taylor, Lyle Hays Truax, Harry A. Wooster.

1945:

Betty Jean Burkhart, Theodora Nelson-Edwards, John Howell Glasse, Betty Andrews Severeid, Martin Carter Showers, Marvin Bazzel, Marjorie Bergsvik, Burrell Birch, Janrose Blake, Vernon Bowman, Pollyanna Shinkle Findley, Robert Gardner,

Joyce Burton Harper, Ellen Eakin Haskin, Pauline Olson, Betty Millwe Ostenson, Robert Poindexter, Robert Ratcliffe, Marjorie Reeves, May Roberts, Daniel Ross, Richard Steeves, Robert Walker, Willard Doyle Buckner, Marion Ione Carter, B. Burke Cate, James Ellis Davidson.

1948:

Richard T. Smith.

1949:

Robert Ratcliffe, Daniel Ross.

1950:

James Martin, Avis D. Roberts, Shirley A. Allen, Doris Walser O'Neill, Leslie L. Aldrich.

1952:

S. Jeanette Gilbertson Fields, Bob Kaplan.

1953:

Ellen Marie Schadel Stroeve.

1954:

Robert Ray Brown.

WE WANT NEWS ABOUT YOU

Have you married, have you a new job, a new baby or a new address? Please drop a card to the Alumni office. We are also very happy to supply news and addresses of old classmates.

Willamette Abroad

Willamette University Presents Two Foreign Tours for 1956

In Cooperation With SITA — (Student International Travel Association)

FRENCH TOUR

Dr. Marion Morange will conduct a French Study Tour next summer. This is the 7th in the series of tours and will include four weeks of study at the University of Grenoble. Courses in elementary, intermediate and advanced levels are available. Two or four semester

hours of credit may be earned during the session. The students will have an opportunity to live with French families. Departure will be June 22, from Montreal on the steamer "Arosa Sun."

The University sponsors a number of excursions and weekend trips in addition to the study program. When the study course is completed, optional extensions of the tour in Western Europe may be added.

TOUR COST: By steamer, \$710.00; by air, \$948.00, plus a \$25.00 summer session fee. These costs include room, board, tuition and transportation from New York City.

POLITICAL SCIENCE TOUR

Dr. Reginald Parker, Professor of Law, is conducting the Political Science and Foreign Law Tour. A native of New York, Dr. Parker was educated in Europe and speaks several European languages. Participants who wish to obtain from two to four credit hours will study and compare the administration of justice of the United

States, England and the countries of Europe.

Departure from New York will be June 15 by steamer ("Olympia") or June 23 by plane. The itinerary: London, Stratford-on-Avon, Amsterdam, Brussels, Paris, Luxembourg, Bonn, Heidelberg, Bern, Switzerland, Zurich, Innsbruck, Munich, Linz, Venice, Florence, Rome, Genoa, Nice, Monte Carlo, Carcassonne, Lourdes, Madrid, Salamanca, Coimbra, Estoril, Lisbon. End of tour, August 15th at Lisbon.

TOUR COST: By boat, \$1430.00 or by plane, \$1510.00. Price for the trip in Europe (London-Lisbon) only \$890.00. Prices include room, board, tuition and transportation from New York City.
