FROM THE TOWER

"Religionless Christianity: is it a new form of Gnosticism?"

Under this title Dr. Milton D. Hunnex contributed one of the major articles in the January 7 issue of *Christianity Today*, a journal for the clergy with a circulation of a quarter million.

A quick answer to the title question, in the view of the author, is "yes." He reviews some of the concepts of modern theologians and finds in them certain parallels with Gnosticism, which sought to reinterpret the beliefs of the early church "to make the Christian Gospel more intelligible and intellectually satisfying to those who sought philosophical props for their faith." But the "Godless Christianity" of some modern thinkers evokes some questions. "Why," asks the author, "should the term 'Christian' be used at all? Is there in it some desirable emotive force that these 'new' Christians want to retain?"

"The problem," concludes Dr. Hunnex, "is not one of liquidating the religiousness of men who cannot quite come of age but of getting God into that very religiousness and transforming it so that it is no longer all the things that make the 'religionless' Christian want so badly to get rid of it."

Dr. Hunnex is head of the Department of Philosophy and has been on the Willamette faculty since 1961. He is author of the book, *Philosophies and Philosophers*.

Speech professor Runkel honored in New York

During the recent 50th annual convention of the Speech Association of America in New York City, attended by over 2000 speech educators, it was announced that Dr. Howard Runkel's speech, "Making Lincoln Live," has been widely used as a model in rhetoric courses in a number of colleges and universities. The address was originally delivered to a joint session of the Oregon Legislature on Lincoln's Birthday in 1957. It was subsequently published in an anthology of Lincoln Sesquicentennial Tributes.

New Scholarship endowment honors Grace Collins Goudy

Scholarship funds available to women students of Willamette were substantially increased by the recent establishment of the Grace Collins Goudy Scholarships. An endowment to support these scholarships was given to the University by Elmer R. Goudy in honor of his wife, who was a Willamette graduate in the class of 1922, and is a present member of the Board of Trustees.

Mr. Goudy is a graduate of Oregon State University and Stanford Law School.

The awards will be allocated by a faculty committee in collaboration with the administrative officer to whom such responsibilities are regularly assigned. The donor indicated that preference should be given (1) young women who are majoring in music and/or fine arts, and (2) young women who are preparing for a career in one of the Christian service vocations. Weight will be given to character, scholarship and need, although the awards are not restricted to any particular standards of scholarship.

New grant for Sabbatical Leave Fund

A grant of \$50,000 has been made to Willamette University by the Fund for the Advancement of Education to be used over a three-year period in partial support of an expanded program of faculty leaves and sabbaticals, according to President G. Herbert Smith.

Willamette has agreed to the condition set by the Fund, to match the grant with \$50,000 above the funds previously budgeted for the sabbatical program at the University. Dr. Smith said that the Atkinson Fund trustees have agreed to provide \$25,000 of the matching money and that the University will budget the remainder. He added that the grant and matching funds will greatly accelerate Willamette's sabbatical program which is now in its second year of providing support for faculty members pursuing additional scholarly studies.

To be eligible for a sabbatical leave at Willamette, a faculty member must have served the University for at least seven years. Applications are screened by the faculty affairs committee and nominations are presented to the faculty committee of the Board of Trustees for final approval.

At present, 49 faculty members satisfy the seven year requirement, including 50 professors, 13 associate professors, four assistant professors and two instructors. Four professors have thus far participated in the program.

Faculty members selected for the sabbaticals receive either full salary for one semester or one-half salary for a full year.

Roadbuilder John Ryan returns from the Cameroons

Bulldozing roads through the jungles of Africa is quite a jump from the peaceful, shaded lawns of the Willamette campus. But the experience, says John Ryan, '63, was worth a great deal more than the meager stipend he got as a Corpsman.

For months at a time the only white person he was able to associate with was himself, but except for loneliness this part of it was no great hardship. "The Africans were just great," he said, although the racial troubles boiling up in America and elsewhere provided an uncomfortable backdrop when he was the only white man in the village.

His assignment was to link a number of villages with 70 miles of roads, replacing the jungle trails between the native communities. The roads were just dirt with ash fill, but to the natives they were super highways.

The road and bridge building crews numbered 25 or 30 men, and the crews were periodically rotated. The idea was to train each crew in the handling of heavy equipment, then send the men out to carry on their own projects while he started over with a new group.

This combination building and training project was carried out in cooperation with the West Cameroon government under the Peace Corps Community Development program. Ryan's foreign service was preceded by three months of special training at Ohio University.

Like other young men in these troubled times, Ryan faces the prospect of military service, but if his own ambitions are realized he will go back to Ohio University for graduate work. After that he would like to continue in some kind of foreign service, preferably in Asia with the Vietnamese refugees.

Della Crowder Miller publishes Lincoln trilogy.

Della Crowder Miller, Professor of Speech and Drama at Willamette in the early twenties, is the author of a three volume work on Lincoln—"The Boy", "The Man" and "The President, (in sonnet sequence) published by the Christopher Press of Boston. Hundreds of her poems have appeared in magazines and in five published volumes, though her greatest fame is as a dramatic artist on the lyceum platform.

At Willamette she wrote, directed and staged a four-hour outdoor pageant entitled "Old Oregon" with a cast of 600 players.

Now more than 90 years of age; Mrs. Miller lives in Decatur, Illinois, where her home has become famous for its beautiful gardens.

Law School swamped by inquiries

Statistics released by Dean Seward P. Reese of the Willamette College of Law show that, despite a cinching up of requirements, both early admissions and acceptances of admissions offers have been found "phenomenally higher," (in the words of Dean Reese) over those of 1965.

Inquiries to WU's law college nearly doubled, jumping from 688 at this time last year to 1232. Applications received numbered 143, a boost of nearly a third over last year's 111. Those admitted early this year outnumbered last year's early admissions 56 to 47, a significant increase of nearly 20 per cent.

Of significance regarding these statistics, however, is the fact that the law school is admitting so many more in early admissions in preparation for admitting a greatly enlarged law class next fall, looking forward to the completion of the Truman Collins Legal Center. The first year class next year will, according to Dean Reese, number approximately 125, rather than 85 as in the past.

Students polled on new center

What type of facilities would you like for Willamette's new student center? This is the question being asked by a special Student Center Design Committee, and some interesting answers have been given in a poll of Willamette students. The committee will incorporate ideas gained from students in advising the architect, and designs will be prepared immediately. The new student center will be located on the site of Brown field, and part of the adjoining parking lot.

A considerable number of ideas received overwhelming approval of the students polled. Over 75 per cent, for instance, approved a cafeteria, recreation lounge (with possibly billiard facilities, table tennis tables, and a television area), snack bar, book store and ballroom, as part of the center.

From 50 to 75 per cent of those polled approved a study lounge, committee meeting rooms, student newspaper facilities, student information area, a music-listening area, locker rooms for town students and a faculty lounge.

The committee is headed by Doug Burleigh, and is working in conjunction with Dr. Richard Petrie, Willamette's financial vice president. The poll marks the culmination of a semester-long student-testing project by the committee.

GEORGE H. ATKINSON

Construction Company tribute awarded to George H. Atkinson

Men of outstanding achievement in heavy construction are honored annually by the Moles' Awards, bestowed by an organization of the country's greatest builders.

George H. Atkinson, President of the Willamette Board of Trustees, received this honor at a dinner in the Waldorf-Astoria, January 26, where he was cited as "one of the world's foremost construction men."

Mr. Atkinson is president of the Guy F. Atkinson Company of San Francisco. The present company is named for George's father, although the Atkinson construction enterprises began in Pennsylvania in 1838 with his great grandfather.

Over the years the construction projects have covered a wide range, but the company is best known as a builder of huge dams. Among them are several of the giants, including Grand Coulee. The record shows six in California, ten in Oregon and Washington, one in Texas, one in Georgia, one in the Philippines, two in Japan, and one now building in Pakistan.

The latter is the Mangla Dam project, a joint venture of eight American Companies, of which George is the Managing Director. It is described as the world's largest competitively bid contract to date (\$353,000,000). It employs 500 Americans and 13,000 Pakistani.

Mr. Atkinson took three of his undergraduate years at Willamette University, transferring to Stanford for his senior year where he was elected to Phi Beta Kappa and graduated magna cum laude in economics in 1926.

He has served on the Willamette Board of Trustees for 26 years and assumed the presidency of the Board in 1964.

(Continued on page fourteen.)

The uses of LANGUAGE

Until recent years only two of these four skills were adequately developed in the usual foreign language course

Before World War II the teaching of a foreign language in most schools and colleges centered around the development of two skills, *reading* and *writing*.

When we were plunged into war the armed services found themselves in desperate need of skilled linguists, and they needed them "right now." Few of the men who came out of school and college language courses had any real competence in verbal communication. The services had no choice but to set up their own language schools in which they were forced to develop methods that could turn a man into a practical linguist in a matter of months. They recruited educators with new ideas and turned them loose.

The results shook up the schools all over the nation. The skills the services most needed were not reading and writing, but *listening* and *speaking*. The heart of the military school method and basis for all of their language study was the training of ear and tongue. The service schools assembled a corps of instructors who could drill students in the phonetic and rhythmic qualities of the instructors' native languages (aural-oral dexterity).

The upheaval in teaching methods came as no great shock to Willamette, says Dr. Marion Morange, senior professor in the Language Department and Chairman of Romance Languages, who is herself a Willamette graduate with the class of 1930. In her student days, she recalls, she was trained by professors who were ahead of their time in the use of conversational methods—a concept upon which the department has continued to build.

In her early work on the faculty she was something of a pioneer herself. In the early '40s, as an aid in her listening and speaking approach, Dr. Morange used a hand-cranked Victrola. This was the forerunner of the language laboratory. The electronic recording tape, perfected only about eight years ago, gives the student long hours of practice in hearing and understanding the authentic use of a foreign tongue, and by listening to his own voice recorded on tape, he develops his skills much faster than is possible in classroom work alone.

THE EYE

THE EAR

THE TONGUE

THE HAND

Willamette's language department has come a long way since those pre-war days, but because of its early progress it was not wrenched clear out of its orbit by the post-war revolution. Many of the methods and teachers who could use them were already here.

Teachers must have foreign experience

The modern shift of emphasis from translation to conversation has imposed an important change in teaching requirements. A prominent language educator has said, "I think there are few genuine bilinguals produced by even the best of teaching unless the teaching is reinforced by prolonged residence in the foreign country."

Under this standard the Willamette Language Department can be given a high rating. Dr. Otto Mandl, Chairman of German and successor to the well-loved Dr. Schulze, was born in Austria and received his Ph.D. at the University of Vienna. Professor Clarence Kraft lived and studied in South America. Professor Paule Guindollet Drayton is a Parisienne who was educated through her baccalaureate in France. Miss Emilie Kremer, proficient in four languages, is a Czechoslovakian who studied at the Universities of Prague and Vienna and taught at the University of Salzburg. Miss Marija Udriš, Professor of Russian, whose linguistic background includes eight languages, was born in Latvia and continued her education in Russia and Germany. James G. Philips will soon receive his doctorate from Middlebury after completing his research at the University of Mainz and was for four years interpreter and translator for the Air Force in Germany. Dr. Paul Beal has had experience in France, Belgium and Mexico and holds the National French Medal. Dr. Annette Dobbin, Romance Languages, has lived in Europe and studied in the Sorbonne, the University of Dijon, France, and McGill in Montreal. Her doctorate is from Middlebury. Dr. Morange's recent sabbatical in France was the latest of her several extended periods of living and studying in Europe.

Who studies language? And why?

Reasonable fluency, both oral and written, is required for the A.B. degree, which usually means two years in a chosen language, either classical or modern.

The student who elects to go farther, with a major or strong minor, must be able to use the language well, but in addition must acquire a sound background in the history, literature and civilization of the country. He is also encouraged to take one or two summers abroad, for which courses are arranged in foreign universities. Some students spend one of their four college years in foreign study.

Language students have varied objectives. For some it is a cultural experience. Others look toward business, high school or college teaching, the diplomatic service or other government posts. About 50 per cent of language majors go on for graduate degrees, and the list of major universities at home and abroad where Willamette graduates have studied is a very long one.

Reading competence in one or more languages is a very great asset to students in some fields, such as science, literature and political science. Specialized courses in scientific French, German and Russian are offered at Willamette. America's growing business interests abroad offer many opportunities to language students, who are attracted to such schools as the well-known American Institute of Foreign Trade in Arizona, which has trained a number of Willamette people. The training of high school language teachers is a field of major emphasis in the Willamette language program.

DR. MARION MORANGE, Chairman of Romance Languages, graduated from Willamette in 1930. She had two summers in France before beginning her graduate work at Middlebury College in Vermont, famous for its progressive methods in training language teachers. She returned to Willamette as a teacher after receiving the degree of Doctor of Modern Languages.

In her long career at Willamette she has been significantly honored. In 1946-47 she studied in France under a fellowship granted by the American Association of University Women. Last year she again went to Europe under the Willamette sabbatical program, returning for the beginning of the fall semester.

In 1963 the French Government recognized her outstanding services by honoring her with the Palmes Academiques, presented to her by French Consul Albert Herman at a student convocation. "She has done much more than to teach," said Mr. Herman in his citation. "She has made France known, understood and beloved by her many students. She has given them an insight and understanding of France. The French Government is very grateful to her."

Dr. Morange is gratefully remembered by her former students, from whom *The Alumnus* has received many letters. "She speaks the most beautiful French I've ever heard," says Allen Wilcox after many years of foreign service, now painting and teaching in Japan. "Her lessons were lucid and crystal clear. I've never had better French instruction."

More than 20 years ago Dr. Morange used a phonograph in her classes, a pioneering step toward the present language laboratory

In the modern world language study is the gateway to an intriguing array of professional opportunities.

New quarters, new equipment in a new building

The library addition soon to rise on the campus will not only triple library stack space, but also provide a wing for the Language Department. New facilities will include an enlarged and greatly improved laboratory, six classrooms, three seminar rooms and offices for the entire language faculty.

The laboratory will have the most advanced equipment and the number of booths will be increased from the present 20 to 36. Sixteen of these will have individual tape recorders for instant play-back. "Boom mikes" will enable the student to hear his own voice as he speaks, not as he ordinarily hears himself, but as though a second person were speaking. He can compare the intonation of his voice with that of his model.

Classrooms will also have electronic equipment with recorded illustrative material designed for class instruction.

This ear training is very important, in the opinion of Dr. Mandl. "You cannot really 'get' a language without training the ear as in music. You lose a third if you miss the rhythm of a foreign tongue."

The ready availability of library resources will be a further asset in the new set-up, as for example the periodical room with up-to-date foreign publications in most any field in which the student is interested.

SOVIET SOJURN

*Douglas Burleigh, '66,
finds Russian people
polite, hospitable*

Whenever Douglas Burleigh, Willamette University student from Seattle, spat on his hands while in Russia last summer and said, in Russian, "Spit on it lest you spoil it," he evoked gales of laughter from every Russian within earshot.

The hand-spitting ritual is a contemporary good-luck gesture in Russia. The dialogue is the very latest in Russian slang.

"The thing that amused the Russian people was that a foreigner could reel off Russian slang so nonchalantly."

After Russian study at Willamette, Burleigh learned Russian slang and other peculiarities of the Russian language and customs at a language workshop at University of Michigan immediately before leaving for Russia last Summer.

"The purpose of the workshop was to prepare us for our trip to Russia. We worked hard at it—five hours of classes a day, five days a week, and exhausting homework assignments, for five and a half weeks. We got so we'd even dream in Russian—no kidding. By the time we arrived in Russia, we were well prepared to live and speak with the Russians."

Burleigh's trip to Russia was financed under a grant from the National Defense Foreign Language Fellowship. He toured Russia with a group of 40 students (24 boys and 16 girls), mostly from Ivy League colleges.

He soon discovered that the celebrated "iron curtain" is more of a myth than a reality. Except for extensive inspection of baggage by the Russian government, and strict regulations on buying merchandise and exchanging money, traveling through Russia is no more troublesome than traveling through other countries, Burleigh found.

Burleigh did most of his traveling with an organized tour, but he observed a number of couples and families touring Russia by private automobile, free to go almost anywhere they wanted to go.

While there are hundreds of dialects used in Russia, one encounters no language barrier if he can speak Great Russian, the official Russian language. All Russians are required to learn Great Russian. Most Russians speak their regional dialect, plus Great Russian.

Great Russian has been developed in the last century, as modern transportation and communication facilities made it necessary for Russia to have a national language, spoken by all the people.

Whenever Burleigh had a few spare hours in Russia, he would leave his group and mingle with the Russian people. Yes, this included dating some Russian girls. "Those Russian girls are big," Burleigh laughed, "and muscular, too."

Burleigh found the Russian people very polite and hospitable. "Everyone told me I spoke Russian very well," he said. "I'd ask the Russian people to correct me when

I made a mistake in speaking, but they refused to do so. They just kept telling me how well I spoke Russian. They seem flattered that I could speak their language. Contrary to what you may have heard, very few Russians can speak English. Peculiarly, though, many Russians know American swear words."

Wherever he went in Russia, Burleigh was immediately recognized as an American—not because of his accent, but because of his clothing. The type of clothing worn by Russians is similar to that worn by Americans, but American clothing is of far superior quality.

"Every day, people would stop me on the street and try to buy my clothes," Burleigh reported. "Of course I was not allowed to sell anything to them. They also tried to exchange Russian rubles for American dollars. They offered me several times the official exchange rate."

Burleigh said many Russians prefer American dollars over their own rubles, because the American dollar is accepted in international trade, while the Russian ruble is worthless outside Russia. (It is no secret that the black market flourishes in Russia.)

He hopes to return to Russia next Summer, to live in a Russian Pioneer Sports Camp. These camps are located throughout Russia, and are popular with Russian college students.

Burleigh plans to enter graduate school next fall, probably at University of Washington. He plans to take an "area study" of Russia. This, he explains, consists of coordinated courses in Russian language, economics, literature, sociology and political science. He hopes eventually to obtain a doctorate in that field and go into government work.

STUDY IN VIENNA

*Kathy Taylor, '65,
returns after a summer's
brush with Kultur*

A brief stay in Munich, a week in Berlin, a month at the University of Vienna, and two weeks in Salzburg (including the famous Music Festival) was the framework of a rewarding summer for a group of students from a number of Northwest colleges, reports Miss Taylor. The conductor was Dr. Otto Mandl of Willamette.

The program in Berlin was typical of those in other cities with the exception of Vienna, where the students were enrolled in the summer session of the University.

Bed and breakfast at a small pension was followed by a class session under Dr. Mandl from 9 to 11. These were informal discussions, entirely in German, of various aspects of the city in which they were staying. Assignments consisted of sending the students out by twos and threes to investigate various activities and institutions and report on experiences and interviews. They had to find their own way and make their own contacts and appointments.

Kathy recalls particularly an appointment with the

president of the Berliner Frauenbund, a gracious lady who gave generously of her time and took them to lunch.

The first excursion to East Berlin was a bus trip with an East German guide, which Kathy found less than satisfactory. On a second trip she and a companion left the beaten track and nosed around on their own. The drab surroundings, the ruined buildings, the empty streets left them depressed and a little shaken. "We didn't realize until we walked back through the checkpoint how tense we had been. Suddenly, for no apparent reason, we just wanted to jump and shout."

In Vienna the University sessions opened with a series of tests which enabled the students to assign themselves to the class levels for which they felt qualified. Kathy, a graduate with a German major, was able to join the fifth level which was open only to graduate students and was known as the professional group. Though she did not mention it herself, Dr. Mandl disclosed that at the end of the term Kathy was one of three who received a prize for outstanding achievement. "Of all the nationalities studying there," said Dr. Mandl, "the Americans had the highest average." Kathy's professor was one of Dr. Mandl's former teachers.

Afternoons were free for untrammelled exploration. The University offered a variety of excursions, including a boat trip on the Danube. The guides were Austrian students.

Salzburg was a pleasant climax to a summer of work and fun. There was the Festival, of course, with its wealth of opera and open air theatre, trips through the beautiful countryside, and a visit to the ancient salt mines for which the city was named.

Were there difficulties? Well, some. Most confusing was the bewildering variety of local dialects. With the educated classes—who spoke High German—the students communicated readily. But from Berlin to Vienna the dialectical differences were so great that people from different areas could scarcely understand each other.

Was it all worth while? Certainly yes. Though one summer is hardly enough to make one a native, Kathy (now teaching in Portland) feels the background and insights she gained are invaluable in her present work.

JUNIOR YEAR IN FRANCE

*Virginia Lutticken, '66,
finds Frenchmen proud
of their language*

Miss Virginia Lutticken, a Willamette senior from Redwood City, Calif., spent her entire junior year at the Institute for American Universities, affiliated with the University of Aix Marseille at Aix-en-Provence, France.

Before going to France, Miss Lutticken had studied French for six years—four years in high school and two years in college. Undoubtedly she speaks French better than many Frenchmen. Still, she found that being in France and

using her French "for real" was an invaluable experience.

"I think it is important for all language majors to spend some time in the native country of the language they are studying," Miss Lutticken said. "There are subtleties of any language that cannot be learned in a classroom."

Among these subtleties, Miss Lutticken explained, are the dialects and accents that are prevalent in any language. French has some very distinct accents. They compare roughly with the regional accents found in the United States, but the French accents are more distinct.

There are also some dialects used in France. For example, in Southern France, where Miss Lutticken studied, some of the older persons speak Provencale, which is an Italian adaptation of French, evolving from historical and political events linking Italy and France.

The American influence, emanating from the Yanks in France in World War I and World War II, and the many American tourists in France since the war, has had its effect on the French language, Miss Lutticken reports. For example, "O.K." is now a part of the French language.

Miss Lutticken was impressed with the pride that Frenchmen take in their language. Generally, the Frenchmen have a high regard for grammar and syntax, she said.

Because they are trying to preserve their own language, the Frenchmen are not as quick to recognize foreign languages as are other European countries, Miss Lutticken reports. She said it is possible to "get by" on English in most European countries, but that it is somewhat difficult to do so in France, with the exception of Paris, where the natives cater to the American tourists.

"The French people expect you to speak their language," Miss Lutticken explains. She admits that she speaks French with a "very definite American accent."

Miss Lutticken's plans for the future: 1) Take some graduate work in German; 2) Marry Bill Allen, a Willamette law student; 3) Spend the first few years of married life in Europe. Allen hopes to go to work for an American company with facilities in Europe.

COMMENTS FROM FORMER STUDENTS

Do non-majors use their language?

No definitive study of this question was attempted, but with the help of the Language Department *The Alumnus* sought an expression of opinion from non-major language students, many of whom graduated prior to the establishment of the language laboratory. Here are some comments culled from their interesting letters:

DR. DALE CLEAVER, '50, *Associate Professor of Art, University of Tennessee*. Considerable enthusiasm was generated (at Willamette), partly from the relevance of French to my major interest in art history, but mainly from the exceptional teaching that I experienced. At the University of Chicago I lived at International House and participated in the French language group. In Belgium, under the Fulbright program, I lived with a French-speaking family and did most of my research in French.

WILLIAM L. LASSWELL, '55, *Attorney in Roseburg, Oregon*. At Willamette I had four years of French and one of Spanish, which greatly enhanced the enjoyment of my summer excursions in Mexico and France. During three years in France with the Air Force I established numerous personal friendships. I cannot cite any particular economic benefits,

but as an attorney I have used Spanish in communicating with Cuban refugees with acculturation problems. I consider Professor Kraft and Dr. Morange very superior instructors.

PAUL DE LESPINASSE, '61, *Professor of Political Science, Adrian College, Michigan*. After studying French, Spanish and Russian at Willamette I was able to pass the reading tests in the two languages required within a month after entering the doctoral program at Johns Hopkins University. A substantial part of my research involved literature available only in French. Language study at Willamette probably saved a year in completing my graduate work.

DR. CHARLES RUUD, '55, *Professor of History, University of Western Ontario*. I'm with T. S. Eliot on the importance of foreign language to the intellectual equipment of any educated person. One soon learns there is no substitute for reading in the original. I think WU's language requirement is a fine thing. I wish I had taken Spanish two more years, or taken a second language, but I didn't realize the importance of language study. My instructor, Dr. Hocking, was excellent, but the weak orientation program of my day gave me no direction about the tools I might need after graduation.

TYRONE GILLESPIE, Law '39, *Former Assistant to the President of Dow Chemical, now an attorney in Michigan*. Rather than an example of one who succeeded because of language training I exemplify the student who saw no reason to learn languages. I felt my destiny was to be a lawyer in Oregon. As it turned out, I found myself heading the international program of one of the world's largest corporations, for which I was inadequately prepared in language. I heartily recommend that every student begin language study at the earliest possible level.

DR. DAVID J. FINLAY, '56, *Assistant Professor of Political Science, University of Oregon*. Quite frankly, Willamette's emphasis upon language was inadequate. There were then no language labs, and like many other institutions, her language department was toward the bottom of her priorities. This did not indicate a very serious commitment while pouring millions into buildings. As an instructor at the graduate level I know the problems graduate students face. Often the greatest stumbling block is inadequate preparation in at least one language.

DR. LOIS MONK, '57, *Assistant Professor of English, Portland State College*. I am delighted that the new wing of the library will include an enlarged language laboratory and more books and periodicals. This will augment one of Willamette's best departments. In this century anyone limited to one language risks being culturally landlocked. Though without a laboratory (in my day) we were given far more than a mere grammatical acquaintance with French. I was able to feel at home in France in a manner quite impossible without a certain fluency combined with some cultural background.

DALE GREENLEE, '57, *YMCA executive, San Rafael, California*. The importance (of language training) is increasing with the increased contact between people who speak different languages. I have had only occasional use of my Spanish. However, we are working on a program to send teenagers into Mexico on a service project. I probably won't go, but will be able to help with the teaching of key

DR. OTTO W. MANDL, Chairman of German, is a thorough scholar with a gracious personality, a ready smile, and a deep interest in his students. Now in his fourth year at Willamette, he holds a Ph.D. from his native University of Vienna. He has a contagious enthusiasm for America where he finds a congenial personal freedom and liberation of spirit.

He approves the language methods used at Willamette because "they *must* hear first," but he concedes that the modern methods do not produce better readers and writers. "You gain one thing at the expense of the other," he explains, "and the difficulty in teaching is finding the right balance."

He expressed the interesting opinion that the ear is important for the first time in centuries. With the universal use of television and radio, general communication is no longer wholly dependent on the printed page.

From his experience with American students in Europe Dr. Mandl observed that they profited in proportion to their cultural background. In this respect there is a considerable difference between high school and college students. "Those few years made a difference." He mentioned a high school group that viewed, from a mountain, the beautiful city and countryside of Salzburg. The historical and cultural associations largely passed them by, but when Dr. Mandl pointed out the mansion where "The Sound of Music" was filmed it was like an electric shock. Here was something they could relate to. Although it was a private residence, their insistence gained them entrance.

phrases and words. I went back to college for a course in conversational Japanese prior to leading a youth group to that country. The doors that were opened by my limited amount of Japanese astounded me.

CLIFFORD V. COMISKY, '64, *graduate student at Stanford*. I took and passed the qualifying test in Russian shortly after I arrived here. A graduate student should be able to read foreign journals in his field, since most of these remain untranslated or are translated long after publication. I think the practical aspects of foreign language study should be emphasized over all others.

DR. JOHN S. AMBLER, '53, *Assistant Professor of Political Science, Rice University*. For one who, almost by chance,

selected French as a freshman, it was difficult not to be impressed by a teacher so eminently competent, so wonderfully skilled at her craft, as Dr. Morange. The study of French was an entree into literature, a pre-requisite to study in France, and a primary reason why French politics has come to be my primary research interest. (Dr. Ambler is soon to publish a book on this subject.)

HOLT WILLIAMS, '63, *Teacher, Peace Corps, Universidad de Concepcion, Chile*. In my study of Russian (at Willamette) I learned a great deal about the Soviet Union in studying the language. I believe this study has enabled me to pick up Spanish (cram course, UCLA) much more quickly than would be possible without language study in college. I felt Miss Udris did a remarkable job while I was her student and will always remember her as one of the several most interesting people I had the privilege to know well at Willamette.

RICHARD J. SIMPSON, '58, *Youth Work Secretary, Salem*

CLARENCE A. KRAFT, Professor of Spanish, is mentioned with affection and respect in letters to *The Alumnus* from his former students. He came to Willamette in 1958 after graduate work at the Universities of Mexico and Chile. He also headed a group of students who studied for a summer in Spain. Spanish, he says, is being used more and more in our area as Spanish-speaking workers have abandoned the migrant trail and settled in Oregon. Some of his students spend their summers working among these people, and he has himself been called in as interpreter by Salem lawyers with Spanish-speaking clients. "At WU I feel we have always had emphasis on oral training," he says. "Graduates tell me that they did not have to make the adjustments in graduate work that many other students have to make." He believes, however, that oral training in modern language instruction is sometimes stressed at the expense of grammar. Much depends on the student's goal. A political science major may find that reading ability is his best tool.

MARIJA UDRIS, Professor of Russian, is a Latvian by birth who graduated from a girls' school in Russia before specializing in ancient and modern languages at the University of Latvia.

Since coming to America she has witnessed an enormous growth in the demand for instruction in Russian language and culture.

What accounts for this tremendous spurt in popularity of Russian? Miss Marija Udris, the founder and sole faculty member of Willamette's Russian Department, offers this explanation: Sputnik and other Russian space achievements of recent years have caused the world to sit up and take notice of Russia's ability in scientific fields. Because of this growing awareness of Russian know-how, and because of Russia's growing influence in world politics, more and more students are studying the Russian language.

Willamette graduates very few Russian majors—only about two a year. Most of Miss Udris's students are studying

YMCA. I took 12 hours in foreign language at Willamette and completed my work for an MA in Education at Northwestern. Not to be overlooked is the value of language proficiency for graduate work (in addition to cultural values). A distressing number of talented doctoral candidates meet with frustration and delays because of language deficiencies. My language instruction at Willamette was excellent. In my social service work I have used Spanish on countless occasions.

SALLY COONEY UNDERWOOD, '55, *wife of a Whitman professor and former teaching assistant at a French college*. Foreign language study had for me three chief values— aesthetic, practical and human. There are aesthetic pleasures not obtained even in good translations. My reading of Proust gave me lyric beauty as well as insight into the nature of memory which became part of my own consciousness. As a teacher in France I was able to form friendships that had a depth which otherwise would have been impossible.

Russian because they feel it will help them in their studies of other subjects.

Among Miss Udris's students are a political science student who is learning Russian so he can read "Pravda" and other Russian journals and history books; science students who are studying Russian so they can refer to Russian sources in their research work; a math student who is learning Russian so he can study Russian mathematic textbooks; botany students who want to be able to read Russian texts

on botany; and a pre-medical student who plans to refer to Russian textbooks on chemistry and medicine.

Because the Russian Department at Willamette is small, Miss Udris is able to work with her pupils on their individual specialties. She feels this is important. For example, the vocabulary requirements of the pre-medical student are vastly different from those of the political science student.

"Foreign language is a human necessity"

DR. GLENN A. OLDS, a Willamette graduate in the class of '42, is Executive Dean of International Studies and World Affairs in the huge state university system of New York.

"I have just come from Paris," writes Dr. Olds, "where we negotiated a final partnership with the University of Paris which takes over the Ben Franklin Library and establishes our Paris Center in the former Cafe Voltaire, home of a remarkable intellectual community of another era. (Gauguin, Rodin, Hemingway, Fitzgerald, Stein, and others.) In a world so swiftly reduced to a neighborhood, bridging the barriers of language and culture is a matter no longer of intellectual luxury, but of human necessity.

"French, as it was taught by Miss Morange, for me was not merely a tool of communication, but a window through which we came to view in depth another people, another system of values, perspective, and a culture. Though I have not used it until now as a primary tool of communication, I have used it extensively in terms of study and understanding. In this new assignment it becomes an indispensable part of my working equipment.

"Miss Morange was one of the most demanding teachers I've ever had; disciplined and sensitive, comprehensive and competent. She worked us hard and expected much, but in return she assured us what is true of all good learning—that we ultimately get only what we give.

"I am convinced we must begin bilingual possibilities for our children at the earliest age so that a language becomes a real means of human discourse and not an end in itself, or a rough crutch to be developed painfully and late for so many of us. Any way that this can be improved in the education of teachers and the transformation of our educational system generally we must find ways to endorse."

The language needs of a scientist

DR. CLYDE WIEGAND, '40, is Research Physicist, University of California, whose work includes significant discoveries in high energy nuclear physics.

"1. The importance of foreign language study is to allow the student to *communicate by speech* with those who do not speak English. To amplify this point: I do not consider it important that I be able to write my foreign languages—this can be done by those who specialize in the language (s). Nor do I consider it important that the verbs be used in their exact conjugation and tense or that the agreement among number and gender be precise. I want to stress the ability to communicate.

"2. Many of my experiences would substantiate point 1. For example, I attended a conference on Nuclear Physics in Clermont-Ferrand (France). Even the Chairman of the Department of Physics in the university did not speak English. He insisted that I give my paper as best I could in French. Of course, it was a painful experience but I managed to express some ideas that would not have been understood in English. If you wanted to understand a paper to be given in completely foreign tongue, would you not prefer pidgin english? At least you would have a chance of absorbing some of the content.

"3. My instruction at Willamette must have been good—some of the French remained with me for at least 20 years! It probably remained in my mind because of the thorough drilling in conjugation, in direct contradiction to what I have mentioned in point 1. However, unless a person expects to specialize in languages, I insist that the emphasis should be on CONVERSATION."

WICKS

NUNN

PEARCE

Alumni

Citation Awards, 1966

The Alumni Citation Award was established in 1957 to give recognition, before the community and the nation, to distinguished graduates for outstanding achievements and services which reflect honor upon Willamette University.

RICHARD WICKS, B.A., '45, J.D., '48

When Richard Wicks was preparing for his Bar Examination soon after graduating from Willamette Law School, little did he realize that he was destined to help literally thousands of Law School graduates pass their Bar Examinations. During the last 13 years, 75 per cent of all persons taking the California Bar Examination have prepared themselves for the test by attending what is known as the "Wicks Course," an intensified course to prepare them for the California Bar.

Now a practicing attorney in California, Dr. Wicks formerly was on the faculty of the University of Southern California Law School. In 1961, he was named one of the eight most outstanding teachers on the USC campus.

He served for two years as a member of the Policy Committee of the law school admission test for the Association of American Law Schools. He has authored a number of articles and publications on law.

WARNE NUNN, B.A., '41

Mr. Nunn, executive assistant to Governor Hatfield, has been chief assistant ever since Mr. Hatfield became Oregon Secretary of State in 1957. In 1959, when Mr. Hatfield moved to the governor's office, Mr. Nunn assumed his present position.

The Governor regards Mr. Nunn as a knowledgeable, trustworthy, dedicated man of high integrity. Anyone who has ever worked with Mr. Nunn will agree. Before becoming Mr. Hatfield's number one aide, Mr. Nunn served for four years as Assistant Public Utilities Commissioner for Oregon and for six months as Director of the Department of Motor Vehicles.

Mr. Nunn is an active worker in the Red Cross, Boy Scouts, United Fund and the Lutheran Church, of which he presently holds an executive position in the North Pacific District.

MOSHER

HELEN PEARCE, B.A., '15
Litt.D., '58; *M.A., Radcliffe*, '26;
Ph.D., University California, '30

There is a particular kind of gratification in awarding an Alumni Citation to one who has been affiliated with Willamette University so long and in so many capacities. Dr. Pearce joined the Willamette faculty in 1920 and served as head of the department of English from 1939 until her retirement in 1955. The Honorary Degree, Doctor of Literature was conferred at the Willamette Commencement in 1958.

She headed the educational policy committee of the faculty during the critical planning period following World War II, and was President of the Willamette Alumni Association in 1941-42.

Dr. Pearce has held positions of high responsibility in civic, professional and religious organizations. Perhaps Dr. Pearce's greatest leadership contribution was in her work with Zonta International, of which she was International President in 1938, 1939, and 1940. She has been chairman of Zonta's Amelia Earhart Fellowship Awards Committee since 1956. The Dr. Helen Pearce Award, created by the Salem Club of Zonta International is given annually to an outstanding Senior woman in the English Department.

HARRY S. MOSHER, B.A., '37

M.S., Oregon State, '39;
Ph.D., Penn. State, '42

Dr. Mosher is one of that dedicated army of scientists whose quiet, behind-the-scenes work is responsible for gigantic strides in the world of medicine.

A professor of chemistry at Stanford University for the last 19 years, Dr. Mosher has worked with graduate students in conducting research in the field of synthetic drugs, mechanisms of organ-

ADAMS

ic chemical reactions, and most recently in the nature of animal toxins. When not working in the laboratory, Dr. Mosher teaches undergraduate organic chemistry.

Dr. Mosher began his teaching career as an instructor at Willamette in 1939. He was assistant professor of chemistry at Pennsylvania State College for four years before going to Stanford. He was a United States Public Health Service Special Research Fellow in 1959 and 1960, and has served as chairman of the California Section of the American Chemistry Society. He is a trustee and a member of the executive committee of the Palo Alto First Methodist Church.

DWIGHT B. ADAMS, B.A., '33

Mr. Adams, (Commander, United States Navy, Retired) has been business manager of Stanford University for the past 20 years.

Because of his business acumen, his dedication to young people, and his desire to improve the standards of education, Mr. Adams has played a key role in the tremendous growth and prosperity of Stanford University during the past two decades. His influence will be felt for generations to come.

Mr. Adams has been instrumental in the establishment of Stanford Overseas Campuses in Germany, Italy, France, Austria and Britain.

He was an All - Conference athlete while at Willamette University. Later he coached at Albany and Dallas high schools in Oregon. Despite his busy schedule, he maintains an interest in athletics. In 1963, he was elected to the National Association of Inter-collegiate Athletics Hall of Fame.

These dilapidated houses south of the Willamette University campus soon will be torn down as part of the Urban Renewal project that will provide the University with 21 acres of land for expansion.

BOARDED-UP HOUSES:

a humble beginning for a grand project

Not long ago, a man wearing stained coveralls parked his pickup truck in front of an old clapboard-sided house on Mill Street in Salem, removed a piece of plywood from the truck, and unceremoniously nailed the plywood to the window frame of the house.

And thus began the actual physical work on the greatest expansion program ever undertaken in the 125-year history of Willamette University.

The house, as you probably have guessed, is one of many that will be torn down or removed from an Urban Renewal area south of the Willamette campus, to make room for expansion of the campus.

The Urban Renewal project—which was instigated by citizens and officials of Salem, not the University—will provide Willamette with 21 acres of land for an appraisal price of \$712,300.

This figure does not represent a terrific bargain in land prices. The University will pay just about as much for the land under the Urban Renewal program as it has been paying for comparable property on a piece-meal basis since 1956.

However, there are two major advantages for Willamette in acquiring the property through the Urban Renewal project: 1) The University is spared the knotty, unpleasant process of piece-meal acquisition (which would make really efficient planning impossible); 2) Under the Urban Renewal program, all buildings will be removed from the land before it is turned over to Willamette.

Willamette was given first opportunity to acquire the land in the Urban Renewal area because it was felt by the city administration that the University's development program was the highest and best use of the land in the public interest.

Willamette's \$12.5 million development program is due for completion by 1972.

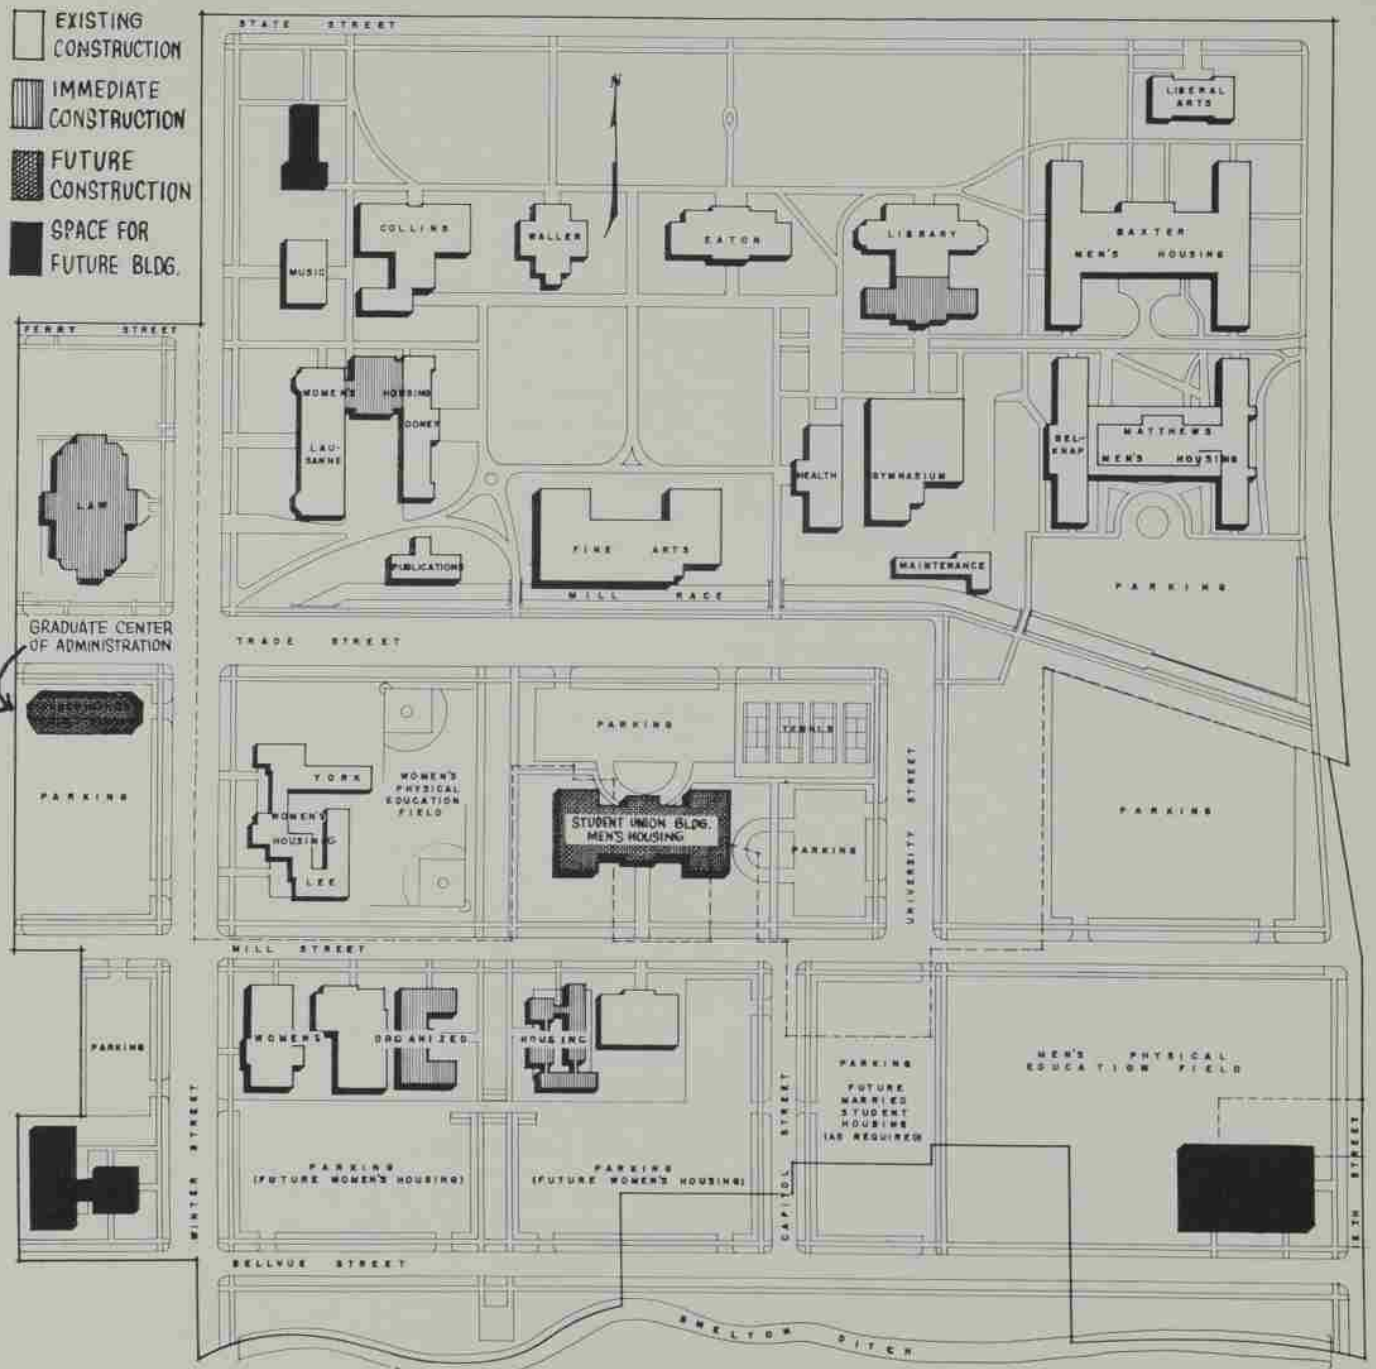

Bids on three individual projects within the development program were scheduled to have been opened on February 24. They are the Truman W. Collins Legal Center; a major addition to the library; and the Doney-Lausanne intertie.

Scheduled for construction later are a student union center, additional housing for men and women students, and a graduate center of administration.

Floor area will be doubled and book storage tripled in library addition. On all three floors the new stacks will be surrounded by individual study carrels. New wing will contain class and seminar rooms, laboratory and faculty offices for Foreign Languages.

This view shows part of the present campus, which adjoins the grounds of the Oregon State Capitol. The area of small buildings in the foreground comprises approximately half of the 21 acres which will be developed by the University under the Urban Renewal program. The Truman W. Collins Legal Center will be located across Winter Street to the left of Lausanne Hall, which is the many-gabled building at the extreme left of the photograph.

The \$1,250,000 Student Union Building was brought a big step nearer with the announcement by the Board of Trustees February 18 of an anonymous challenge gift of \$375,000. In addition to student union facilities the building will provide living accommodations for 220 men.

This will inaugurate the fourth building project under the \$12,500,000 development plan. (Half of this sum will be added to endowment to strengthen the academic program.)

From the TOWER

(Continued from page three.)

Ogdahl "graduates" coach Chapman

Willamette may soon offer a post graduate degree in football coaching, if the successes of Coach Ted Ogdahl's apprentices continue. Already three candidates have gone on to coach teams at U of O and UCLA.

Jerry Frei moved from WU to Oregon and Jerry Long moved to OSU and then to UCLA with Tommy Prothro. The latest Ogdahl alum is coach Norm Chapman, who will take a coaching job at his alma mater, the University of Oregon, where he was a three-year letterman and co-captain of the 1958 Rose Bowl team.

Coach Chapman says he is very excited about going home to Oregon to work for Len Casanova, whom he considers one of the most respected men in football today. He also says he has enjoyed his stay here very much and has learned a lot of good ball from coach Ted Ogdahl.

Visiting professor joins faculty

Dr. Frances Chapelle, formerly of London, has been appointed visiting assistant professor of chemistry at Willamette University for the remainder of the college year. She received both her Bachelor of Science and Ph.D. degrees in chemistry from the University of Bristol, the latter in 1963.

Dr. Chapelle came to the U.S. in 1963 with a research fellowship at Arizona State University, and this past year she had a research fellowship at Oregon State University. A member of Iota Sigma Pi women's chemistry honorary, Dr. Chapelle will instruct courses in physical chemistry.

She feels that "it's a bit of a pity" that American students begin specializing so late because it puts them at a more advanced age by the time they get their Ph.D.'s. She does feel, however, that a broader education is valuable in many respects.

Her hobbies blend well with the Pa-

cific Northwest. She's an avid skier and mountain climber. When asked how she likes Willamette she replied, "Very much. The students are quite decent."

Esther Ryan retires

After 20 years on the administrative staff Mrs. Esther Ryan announced her retirement in January. Hundreds of former students will remember her as the smiling secretary in the President's office, and later as Financial Aid Secretary at University House. Her many campus friends honored her at a reception in Lausanne Hall on January 31.

Former house mother dies

Word has been received of the death of Mrs. Katherine Reed, who passed away on November 16, 1965 at the age of 90. She served for seven years as house mother of the Delta Phi sorority (now Delta Gamma). Her daughter, Eloise Reed Miller of Lebanon, Oregon, graduated from Willamette with the class of '25.

IPSE DIXIT . . . convocation quotes

EDITH GREEN, *Member of Congress from Oregon*: We spend 15 times as much on legalized gambling as we spend on education. We can afford to gamble on every boy and girl who wants an education.

DR. ERNEST T. S. WALTON, *Trinity College, University of Dublin*: In Ireland our monthly bills often bear the letters, E & O E. They mean, "errors and omissions excepted." I suggest you put these letters at the bottom of every scientific and religious argument. Even the most learned of us have areas of ignorance.

CANON BRYAN GREEN, *churchman of Birmingham, England*: (Speaking of modern tendency to blame sin on impersonal social forces). I don't want to be a pathological case. I want to be a guilty sinner. In the first case I can receive no help; in the second I can improve.

W. WILLARD WIRTZ, *Secretary of Labor, in opposing statutory reduc-*

tion of work week: I think we will see developments in a shorter work year. Wives really don't want their husbands around the house any longer than they are now—but they would like to take longer vacations.

DR. GEORGE SASLOW, *psychiatrist, University of Oregon Medical School*: Eighty percent of college dropouts are students who had no access to any type of faculty consultation.

DR. WARREN B. MARTIN, *President of Raymond College, University of the Pacific*: Art forms of the past reflected confidence. Modern art forms reflect man's confusion (ambiguity). A world characterized by ambiguity imposes value judgments without the assurance of certainty. (Quoted by Dr. Martin from an anonymous source): "Cockeyed cocksureness is the stance of the man who has no doubts."

DR. HAN SUYIN, *medical doctor and authoress, born in Peking and*

educated in Europe: The plight of Asia may be summarized in this statement: We did not invent the steam engine. We did not have the Renaissance. Science happened in the West. You are 200 years ahead of Asia in the industrial age. Therefore we cannot look forward to anything but change, change, change.

In spite of his backwardness, modern communication is reaching the Asian farmer. He knows that things are different elsewhere and is no longer disposed to fatalistic resignation. The French Revolution is the stage of most Asian revolutions today.

No government has a chance of coming to power in Asia without promising land reform. Most of them have failed because the leaders belonged to the upper classes. In the showdown they would not relinquish their privileges. This is the basis of the trouble in Viet Nam.

To industrialize, Asia must have foreign exchange to build up capital. Where can she get it? The markets of the world are in the hands of the West.

Ghandi said, "To a starving man God dares to appear only as bread."

CLASSNOTES

'14

DR. RAYMOND MacRAE is retired and living at 7501 33rd St. W., Tacoma, Washington.

'16

READ BAIN delivered a speech at Huntington, West Virginia, to the Appalachian Authors Guild on "The Nature and Future of Poetry." He also visited with many old friends at Miami University where he had taught from 1927 till 1960. His address is 8300 SW Power Ct., Portland, Oregon.

HAZEL SMITH MARSH, 762 W. Wharton, Roseburg, Oregon, writes that she has a new grandson, David, born December 1964 to Georgia and Ida Marsh.

'20

DR. and MRS. JOHN F. CRAMER were in Europe on sabbatical leave from March 15 to June 15. In London, he was contacted by the State Department and asked to accept a three months appointment to Australia. He lectured in Australian Universities as an American Specialist Abroad. This was the Cramers' third lengthy visit to Australia.

'21

DR. and MRS. PAUL WISE (SIBYL SMITH), 9021 E. 19th St., Alta Loma, California, are in Guatemala where Dr. Wise has accepted a foreign service assignment to teach promising young men the fundamentals of dental practice.

'23

REV. and MRS. JOHN A. McNEES are spending some time this winter in Honolulu, Hawaii, visiting their son, Richard and his family. Dick is a captain in the US Navy. Their permanent address is N. 5712 Moore, Spokane, Washington.

E. A. NOTSON, 1210 Hemlock, Milton, Washington, is retired after 7½ years as engineer for Boeing and as a school administrator.

'24

MARGARET LOUISE GATES writes that she is enjoying her second year of retirement from The Dalles Senior High School. Her address is 706 E. 14th, The Dalles, Oregon.

'25

DR. P. MALCOLM HAMMOND advises the Alumni Office that there are many Willamette people in his family. They include his father, who taught at WU for 20 years, his brother, son and son-in-law, who were graduates. Dr. Hammond will complete 40 years in the Methodist ministry in June of 1966. Address is 7528 N. Charleston, Portland, Oregon.

Mr. and Mrs. William Ross (LOLA MILLARD) are enjoying their life at Willamette View Manor. They keep very busy—Bill with lawn bowling and Lola with swimming. Their address is 2705 SE River Road, Portland, Oregon.

CARMELITA BARQUIST, 1395 Mission St., Salem, Oregon, attended Oregon State University this summer for the third time on a four-year scholarship from the National Science Foundation. She is teaching the new Biology approach at South Salem High School.

CAROLINE TALLMAN retired from teaching last spring after 43 years: 3 years in grade school and 40 years in high school. Her address is Rt. 1, Box 184, Canby, Oregon.

'26

HERBERT S. ERICKSON has been named manager of the California Division of California Packing Corp. This division in-

cludes 10 canneries, two can manufacturing plants and six ranches. Mr. Erickson and family reside at 8470 Aster Ave., Oakland, Calif.

LUCILE WYLIE BRECHTEL writes that she would be happy to see any of her old Willamette friends. Her husband died last year and she is still living in their Eugene home—Rt. 2, Box 99, Eugene, Oregon.

OMA EMMSONS MACKIE lives at Rt. 1, Box 52, Tangent, Oregon. Her daughters, Jeanne and Anne, are teaching high school and son, Keith, has just married.

'27

REV. HERBERT LUSCOMBE, Rt. 1, Box 350, Bow, Washington, is the minister at Allen-Blanchard Methodist Church.

HAZEL BURDET FYFE is leaving for Europe, March 1, on a freighter via the Panama Canal. She will visit France, Germany, Italy, Greece, Yugoslavia, Austria, possibly more before returning to this country in December, 1966. Possibly MARY ERICKSON will join her for a few weeks.

REV. and MRS. FLOYD BAILEY (DOROTHY JACKSON) live at 26802 Girard St., Hemet, California. Because of ill health, Floyd found it necessary to retire from the ministry in July of 1965.

CHAPLAIN and MRS. TED MITZNER (ELLEN VAN NICE '28) plan to be in London in August 1966 for the Eleventh World Methodist Conference. Ted has been named one of the official delegates. Since his retirement from active duty with the US Air Force, he is serving as associate minister, First Methodist Church, Riverside, California. Address is 3402 Mona Dr., Riverside, California.

'28

BEACH PATTON, 804 10th St., Hood River, Oregon, lays claim to the youngest family of the 1928 graduates. Nancy, age 9, is in the fourth grade and Janeth, age 5, is in kindergarten.

ROSA RICCO BUTTEDAHL is retired and living at Prairie City, Oregon.

'31

DR. RAYMOND C. WADDEL, 5109 Que St. SE, Washington, D.C., is preparing for an experiment on a future spacecraft for the National Aeronautics and Space Administration.

MARGARET WARNKE KING, 4520 Camas St., Boise, Idaho, is a teacher of piano and organ. Her husband, Patrick, is an insurance agent. They have one son who is employed by Western Electric.

'32

The Dave Franklin Memorial Award for the Lion of the year was presented for the first time to STEARNS CUSHING. It will be presented each year to the outstanding member and selection is based on participation in Lion Club and community activities. Address is: 3306 S. Pacific Hwy., Medford, Oregon.

ELLEN JEAN MOODY McBRIDE was recently widowed and is now employed by Stanislaus County as a Social Worker. Her address is 3524 Fresno St., Denair, California.

CARL CORDING, 2541 NE 24th Ave., Portland, Oregon, is treasurer of the Topics Toastmasters Club which is composed of City of Portland Employees. He is also chairman of the Credit Committee of the City of Portland Employees Credit Union.

Mr. and Mrs. Russell Mefford (MARVELLE EDWARDS) attended meetings in Boulder, Colo., and at Disneyland Hotel in October

and November and will be in Dallas, Texas in February for the annual meeting of National Association of Methodist Hospitals and Homes. Mr. Mefford is chairman of the Program Committee for Homes for the aging. Their address is 13617 SE River Road, Portland, Oregon.

DR. CHARLES S. CAMPBELL, 3603 Westridge Pl. So., Salem, Oregon, is now a member of the Oregon State Board of Health. He is the grandfather of four.

'34

DR. FRANK E. CHILDS, 816 Hellam St., Monterey, California, is professor of Economics at the US Naval Postgraduate School.

ROBERTA BRAINARD RICE writes that they have a hunting and fishing lodge on the Salmon River in Idaho. Their address is White Bird, Idaho.

'35

JOSEPHINE ANDERSON SELANDER and her husband are on an extended painting trip—he the painter and she the traveling companion. Mr. Selander had a one-man exhibit of his watercolors in Myrtle Beach, So. Carolina. In January they will go to Florida, then back west along the Gulf and southern border of the U.S.

FRANCIS F. FLINT, 16110 SW King Charles Ave., Tigard, Oregon, is administrative assistant at J. K. Gill Co.

'36

EDGAR H. CANFIELD of 1548 Roberta Dr., San Mateo, California, has been promoted to vice president in Bank of America's trust department in the San Francisco head office. He joined the bank two years ago following 25 years of private law practice.

KEITH L. JONES was appointed administrative assistant to the mayor of Portland, Oregon. His experience includes services as Eugene police chief, special agent for the FBI and county investigator in Los Angeles. Keith will soon move his family from Fullerton, California to 5523 SW Canyon Court, Portland, Oregon.

MYRTLE WETTLAUFER MILLER is finishing the fourth year as president of Fargo Branch AAUW. Appointed in 1965 as N.D. representative for the US Committee for UNICEF. Her address is 1201 First St. North, Fargo, North Dakota.

'37

DR. RACHAEL L. YOCOM, 86 W. 12th St., New York, N. Y., is consultant for Simmons Student Tours; Scholarship Program Director for Radio City Music Hall and chairman of the dance department—School of Performing Arts, New York City.

IRV REIERSON lives at 1701 E. 9th, The Dalles, Oregon, and is sanitarian for the Wasco-Sherman Health Department.

'38

PROF. and MRS. WILLIAM M. STONE postponed a nine-month visit to Innsbruck, Austria, on sabbatical leave from Oregon State University. Instead, they adopted two attractive sisters, Dorothy (7) and Karen (6) who were born and raised in Casablanca, Morocco. Address is Oregon State University, Math. Dept., Corvallis, Oregon.

MR. and MRS. LEE RUDIN (THERESA ULRICH), live at 435 Iron Mountain Blvd., Lake Oswego, Oregon. Lee is personnel officer at Bonneville Power Administration. Theresa is associate broker at Lake Oswego Properties.

'39

MR. and MRS. ALFRED TEBAUT (ETHEL DENHAM '40) have returned to Portland after living nine years in New Jersey. Mr. Tebaut is Divisional Claims Manager for General Insurance Co. They have two daughters.

The family lives at 17975 NW Tillamook Dr., Somerest West, Portland, Oregon.

BETTY CRANEY MARION, 1024 Shelby, Seattle, Washington, is making a two weeks visit to New York over the holidays and will return by way of Wilmington, Chicago, Tulsa and San Francisco to observe four other recreation centers for the handicapped in preparation for building a much larger facility in Seattle.

'40

ROBERT KEUSCHER, 2929 Colorado, Santa Monica, California, is now serving as director of the Curriculum Laboratory for the School of Education at the University of California at Los Angeles where he hopes to receive his doctorate next June.

DR. IRMA WEST, 39 Kenyon, Berkeley, California, is a physician at the California Department of Public Health.

'41

TAUL WATANABE was elected president and chairman of the Board of Civic National Bank in Los Angeles. His address is 2 Aurora Rd., Rolling Hills, California.

'42

LOIS MOORE CLEMENT, Rt. 1, Bernie, Mo., is teaching accelerated fourth graders in the Malden Elementary School, Malden, Mo. Her husband is teaching in a vocational technical high school in the Malden area.

'44

RAY E. SHORT moved to Platteville, Wisc., in September to organize and head a Dept. of Sociology at Wisconsin State University. He is also on the President's (Univ.) Administrative Council and is chairman of the Peace Division of North Iowa Methodist Conference. He is also on the National Executive Council of United World Federalists. His address is 365 W. Dewey, Platteville, Wisc.

BARBARA PITTS BOWLES lives at 1525 Church St. SE, Salem, Oregon. After four years at the University of Oregon, her husband, Chuck, is teaching physiology and coaching track at Willamette.

BETTY ADKINS FUKUYAMA is president of the Tacoma Writers Club and corresponding secretary of the Tacoma chapter of United Nations Association. Betty's husband is pastor of Oberlin Congregational Church at Steilacoom. They have five children. Address is Box B, Steilacoom, Washington.

MARIAN CARTER SHOWERS moved to Portland a year ago and is working as chief physical therapist at West Hills Hospital. She is in the fourth edition of Who's Who in American Women. Marian lives at 2845 S.W. Boundary St., Portland, Oregon.

'46

MR. and MRS. PAUL JAQUITH (MARY MARGARET LIVESAY '44) reside at 555 Kappock St., Bronx, New York. Paul is doing advanced study at Union Theological Seminary and Columbia University in Philosophy of Religion and higher education under a Danforth Foundation Grant. Mary Margaret is administrative assistant in world headquarters of Disciples of Christ in New York. They have three children: Cathy (15), Sherry (13), and David (11).

DR. ROBERT B. FORMAN is the newly named psychiatric consultant at Parry Center in Portland, Oregon. Before returning to Portland, Dr. Forman served as director of diagnostic services at Menninger's Clinic. His address is 2877 NW Westover Road.

'48

CAROLINE COOPER SAUNDERS is a housewife and resides at 6444 Cleo St., San Diego, California.

MR. and MRS. DEAN THOMAS (DOROTHY BOYD) have built a new home in Arlington, Texas. Dean is Project Engineer for Advance Systems at L.T.V. They have three children: Christine (17), Walt (13), and Steven (8), years of age. Their new address is 122 Mill Creek Dr., Arlington, Texas.

DOROTHY DEAL WELLS and family have moved into a new home at 2101 Ridgewood Rd., Alamo, California. Dorothy is teaching art at Pine Hollow Intermediate School in Concord and her husband is counseling at the high school in Walnut Creek.

LEIGHTON C. FAIRHAM has moved to Plymouth, Michigan. He has a new job with the same company, Pendleton Woolen Mills. New address is 1341 Palmer, Plymouth, Michigan.

MAJ. NEDRY BURRIS has transferred to Williams AFB, Arizona, after two years in recruiting. He is chief of Administrative Services at Williams. Address is 109 W. Fairmont Dr., Tempe, Arizona.

'49

DR. CHESTER CHILES is now Associate Professor of Sociology at Indiana State University. He formerly was assistant professor of Public Administration at the University of Arizona. His new address is 321 S. 22nd St., Terre Haute, Ind.

DR. and MRS. MILTON BAUM (MARJORIE LUNDAHL '51) have moved to 1430 24th NE, Salem, Oregon. Milton is Director of Research for the State Department of Education. Before coming to Salem, he was Hood River County Superintendent.

MR. and MRS. WILLIAM HARRIS (HELEN LARSON) have moved from Beaverton, Oregon, to 4773 Coloma Dr. SE, Salem. Bill is assistant director of Teacher Education at the State Department of Education.

Willamette alumni gave \$800,000
to the Loyalty Fund in 1965.

*Well, not exactly. Actually
it was closer to \$40,000—or the
equivalent of the income earned
from an endowment of \$800,000.*

The annual gifts of Willamette
alumni provide a “living endowment”
that is indispensable to the budget
for faculty salaries.

A million-dollar “living endowment”
(\$50,000) in 1966 is assured, IF
every alumnus who has contributed
since 1960 sends a gift before June 30.

And remember your own gift will earn
an equal amount from the Collins
Foundation Challenge.

ALUMNI DAY, MAY 21

Yes, that's right! An advance of two weeks in the customary commencement date is due to a new scholastic calendar. You will be reminded again when Alumni Day events are announced. Honored classes will be those whose numerals end in 1 or 6. The reunion chairmen of these classes are making plans for the gathering of the clans.
