sion.

RALPH W. TAVENNER, A.M. Supervisor of Sec-
ondary Education, Salem High Schools.
Acting Professor of Education.

General Statement

ECONOMY is a virtue we are all practicing in these days of economic readjustment and retrenchment. May we suggest a summer's program which will be economical, as well as enjoyable and profitable? Why not spend your vacation near home this summer attending the summer session of Willamette University?

Here is a splendid opportunity to begin or continue your college course, to satisfy the requirements for a teacher's credential, to fill in the gaps in your education, to adventure in new intellectual realms.

Furthermore, an increasing number of college graduates are using the summer in study toward the Master's degree. Special provision is made for such students. The degree may be attained by summer study alone.

Willamette University is one of the three non-state institutions in the Northwest which are recognized by the Association of American Universities. It is the only one of the three to offer summer courses.

The faculty of the Summer Session is made up of members of the regular University faculty. The library, laboratory and recreation facilities of the University are available for summer students. Credit is the same as for corresponding work done in the regular session.

The Willamette Summer Session is primarily for study; it is in no sense a chautauqua program of entertainments and excursions. Yet Salem has many attractions for the summer resident. It is in the Willamette Valley on the Willamette River, and not far from Oregon beaches, mountains and forests, or the city advantages of Portland. Salem itself is a beautiful city of 26,000 population, and a live business city.

It is the State Capital, and here are nearly all of the State Offices and near it the State Institutions. It is well for the teacher and citizen of Oregon to become familiar with the activities of his State.

ADMISSION AND REGISTRATION

Students who are not candidates for a degree are admitted to any class for which their previous study prepares them. Students working toward a degree must meet the usual entrance requirements of the University.

Registration should be completed on Monday, June 15, between the hours of 2 and 5 p. m., and certainly by Tuesday, June 16. After that day a special fee of \$2.00 for late registration will be charged and the amount of credit which may be earned will be reduced.

CREDIT

The maximum credit for the six weeks term is six semester hours.

This folder lists certain courses which are to be given. Prospective students who do not find here the subject desired are invited to correspond with the Director. It is often possible to make adjustments so as to meet individual needs. A course for which fewer than five students register may be withdrawn.

EXPENSES

Tuition for the six weeks session for those who take less than full work is \$5.00 for each hour of registered work. Those who take the full work, six hours, pay \$25.00. Tuition for the course in Physics, eight weeks, is \$35.00. The laboratory fee in Physics is \$6.00; in Biology, \$3.00.

Living quarters may easily be secured in private homes near the University at a wide range in price. A list of suitable places may be consulted in the Registrar's office.

Courses to be Offered

Biology

S 1. Animal Biology. Four semester hours credit.

Class and laboratory studies of animal organization, physiology, economics and classification. Laboratory work will include field trips to local habitats. Open to high school graduates.

S 11. Faunistic Zoology. Two semester hours credit.
