W. CARLTON SMITH, M. D., *Professor of Anatomy.*

A. E. TAMISIE, M. D., *Professor of Clinical Surgery and Dermatology.*

W. T. WILLIAMSON, M. D., *Professor of Nervous and Mental Diseases.*

*HISTORICAL.*

---

Willamette University was established by act of the Legislative Assembly of the Territory of Oregon, January 12, 1853. The collegiate department which had been developing for several years was formally organized in 1857. The first class was graduated in 1859.

Founded in an early day, before Oregon became a state, this institution has been a potent factor in the development of the Northwest.

Among the thousands of former students and the five hundred graduates from her different departments are numbered teachers, professors, congressmen, Judges of County Courts, of Superior Courts, of Circuit Courts, of Supreme Courts, of United States District Courts, editors, authors, explorers, municipal officers, physicians, United States Senators, Governors, United States Attorneys, Consuls, Secretaries of State, United States Surveyors General, Presidents of State Senate, and Speakers of House of Representatives.

## *The College of Liberal Arts.*

---

Is recognized to be the very foundation of the University, and is the most important of all its schools and colleges, for without it, a university, as such, cannot exist.

We are pleased, then, to announce that the College proper enjoyed unparalleled prosperity last year, the attendance being over fifty per cent greater than that of the year before, and, so far as we can learn, larger than in all the previous history of the College.

In all the Northwest it would be difficult to find for a college a better place than Salem. The Legislature, the higher courts, the public libraries, the numerous resident officials of county and state, the large number of state institutions, the eminent traveling lecturers and musicians, afford abundant facilities and opportunities for culture and training not obtained in the classroom.

The health conditions are such that in three years there have been but few cases of serious illness among either the Faculty or students and no deaths have occurred for even a longer period.

Best of all, Salem is a city of high moral and religious tone, and possessed of a rich inheritance of traditions and memories of the pioneers, the noble men and women who founded at the same instant the city and the University.

*COURSES OF STUDY.*

CLASSICAL COURSE: Leads to the degree of Bachelor of Arts. The basis of this course is the classical languages and literature. It includes four years of work, divided into one hundred and twenty-eight semester hours. Fifty-eight of these semester hours are prescribed; six are prescribed electives; thirty-two are group electives, and thirty-two are free electives.

SCIENTIFIC COURSE: Leads to the degree of Bachelor of Science. Four years of work are offered. The basis of this course is the sciences, and one hundred and twenty-eight semester hours constitute the required amount of work to be done to complete it. Sixty-eight are prescribed studies; thirty-two are group electives and twenty-eight are free electives.

LITERARY COURSE: Offers four years of work with literary subjects made the basis of the course. As in all the strictly collegiate courses one hundred and twenty-eight semester hours must be completed. Forty-nine are prescribed studies; twenty-five are prescribed electives; thirty-two are group electives, and twenty-two are free electives.
