Faculty

FLETCHER HOMAN,

A. B. and A. M., Simpson College; S. T. B., Garret Biblical Institute;
D. D., Upper Iowa University
President of the University.

EDWARD H. TODD,

B. S. and M. S., Simpson College; S. T. B., Boston University School of Theology;
D. D., Simpson College; Corresponding Secretary University of Puget Sound, 1905-09
Vice President.

College of Liberal Arts

GAYLORD H. PATTERSON, Dean,

A. B., Ohio Wesleyan University; A. M., Harvard University; Sometime Fellow in
Harvard; S. T. B., Boston University; Ph. D., Yale University
Professor of History and Social Science.

FREDERIC CRAMER,

B. A., University of Cincinnati; Graduate Student University of Cincinnati 1896-97,
also Drew Theological Seminary 1899-01, University of Halle and Berlin 1904-06
Professor of Philosophy and of German Bible.

FLORIAN VON ESCHEN,

Ph. B. and Ph. M., Simpson College; Graduate Student University of
Chicago, 1905-07, also Washington University, 1907-08
Professor of Physics and Chemistry.

M. E. PECK,

B. A., Cornell College; Research work in Central America three years collecting
specimens for University of Iowa and other institutions
Professor of Biology.

W. E. KIRK,

A. B. and A. M., University of Nebraska; Graduate Student Columbia
University 1902-05.
Professor of English Language and Literature.

J. T. MATTHEWS,

B. A. and M. A., Willamette University; Professor in Willamette University, 1893—
Professor of Mathematics.

MARY P. BARNETT,

A. B. University of Kansas; M. A., University of Chicago; Graduate Student
University of Minnesota 1904, Stanford University 1905
Professor of Latin.

EDWIN SHERWOOD,

A. B. and A. M., Ohio Wesleyan University; B. D., Drew Theological Seminary;
Graduate Student Leipsig 1894-5
Professor of Greek.

LOUIS BACH, A. M.,
Professor of Modern Languages, 1906-10.

WILLIAM J. KELLER,

A. B. and A. M. Northwestern University; Graduate Student University of Chicago,
1902-04; Sometime Fellow in Northwestern University,
also in University of Chicago

Professor of Modern Languages.

JOHN OVALL, M. L.,

Professor of Swedish Language.

MARY E. REYNOLDS,

B. S. Willamette University; Professor in Willamette University 1893—

Professor of Pedagogy.

SARA BROWN SAVAGE,

O. B. and O. M., Emerson College of Oratory

Dean of the School of Oratory and Professor of Oratory and
Dramatic Expression.

VEVA M. BARTLETT,

B. A., Willamette University

Matron Lausanne Hall, 1907—10.

GRACE HARRIS KELLER, Dean of Women,

A. B. and A. M., Northwestern University

Matron of Lausanne Hall, 1910—

Assistant in English.

G. J. SWEETLAND, M. D.,

B. L., Hobart College

Physical Director and Assistant in History.

MARGARET GILL,

Instructor in Art.

MAY BELLE ADAMS,

Graduate Emerson School of Oratory

Assistant in English, 1909-10.

JAMES LISLE,

A. M., Iowa Wesleyan University; Ph. D., Hedding College

MARY GITTINS,

A. B. and A. M., Willamette University

Librarians.

School of Music

FREDERIC S. MENDENHALL, Dean,
B. A. and M. A. Ohio Wesleyan University
Piano, Organ, Theoretical Subjects.

MYRTLE L. MENDENHALL,
Professor of Voice Culture.

*
Professor of Violin.

*
Assistant in Piano and Voice.

School of Oratory

SARA BROWN SAVAGE,
O. B. and O. M. Emerson College of Oratory
Dean and Professor of Oratory and Dramatic Expression.

MAY BELLE ADAMS,
Emerson School of Oratory
Assistant in School of Oratory, 1907-10.

School of Theology

HENRY D. KIMBALL,
D. D. Allegheny College; LL. D. Nebraska Wesleyan University and Dallas College
Dean and Professor of Systematic and Practical Theology.

EDWIN SHERWOOD, A. M., B. D.,
Professor of New Testament Greek and Exegesis.

EVERETT S. HAMMOND,
A. B. and A. M. Ohio Wesleyan University; S. T. B. Boston University; Ph. D.
Illinois Wesleyan University
Professor of Historical Theology.

School of Medicine

WILLIAM HENRY BYRD, M. D.,
Professor of Surgery, Surgeon to Salem Hospital and Dean of Faculty.

JOHN N. SMITH, M. D.,
Professor of Theory and Practice of Medicine.

ANGUS B. GILLIS, M. D.,
Professor of Ophthalmology, Rhinology, Otology, and Laryngology.

*To be supplied.

LEWIS FRANKLIN GRIFFITH, M. D.,
Professor of Nervous and Mental Diseases.

WILLIAM CARLTON SMITH, A. B., M. D.,
Professor of Anatomy.

AUGUSTUS E. TAMIESIE, M. D.,
Professor of Materia Medica and Therapeutics.

FRANK ELDON SMITH, M. D.,
Professor of Obstetrics.

CHARLES OLIVER BOYER, A. B., B. S.,
Professor of Chemistry and Toxicology.

HARVEY J. CLEMENTS, M. D.,
Professor of Bacteriology and Pathology.

ORLA B. MILES, M. D.,
Professor of Physiology.

HARRY E. CLAY, M. D.,
Professor of Diseases of Women.

JAMES H. ROBNETT, M. D.,
Professor of Pediatrics.

JOHN C. EVANS, M. D.,
Professor of Physical Diagnosis and Diseases of the Chest.

P. H. D'ARCY, A. B.,
Lecturer on Medical Jurisprudence.

ROY D. BYRD, M. D.,
Professor of Genito-Urinary Diseases, Syphilis and Osteology.

GROVER C. BELLINGER, M. D.,
Professor of Histology and Embryology.

B. L. STEEVES, A. B., M. D.,
J. H. FAIRCHILDS, M. D.,
G. J. SWEETLAND, B. L., M. D.,
Special Lecturers.

School of Law

C. L. McNARY, LL. B.,
Dean and Professor of Common Law, Real Property, and Code.

GEO. G. BINGHAM, LL. B.,
Professor of Evidence and Code Pleadings.

JOHN BAYNE, LL. B.,
Professor of Common Law Peadings, Equity and Practice Work.

I. H. VAN WINKLE, A. B., LL. B.,
Professor of Torts and Constitutional Law.

W. E. KEYES, LL. B.,
Professor of Negotiable Instruments and Criminal Law.

J. G. HELTZEL, B. S., LL. B.,
Professor of Contracts and Sales.

Administrative Officers of the University

FLETCHER HOMAN, A. M., S. T. B., D. D.,
President of the University.

EDWARD H. TODD, M. S., S. T. B., D. D.,
Vice President.

GAYLORD H. PATTERSON, A. M., Ph. D.,
Dean of College of Liberal Arts.

HENRY D. KIMBALL, D. D.,
Dean of School of Theology.

SARA BROWN SAVAGE, O. M.,
Dean of School of Oratory.

F. S. MENDENHALL, M. A.,
Dean of School of Music.

W. H. BYRD, M. D.,
Dean of School of Medicine.

C. L. McNARY, LL. B.,
Dean of School of Law.

General Information

HISTORICAL.

1834.

Jason Lee opened an Indian Mission School in a log cabin ten miles below the present site of Salem.

1842.

The Indian Mission School was moved to what is now the campus of Willamette University and was conducted in a \$10,000 frame house.

The white settlers of the Willamette Valley planned a school for their own children, elected a board of trustees, subscribed funds, decided to call the institution The Oregon Institute, resolved that it should grow into a college, and began to look about for a suitable location.

1844.

The Trustees of the Oregon Institute bought the Indian Mission School property and it was immediately opened as a school for white children.

1853.

By act of the Legislative Assembly of the Territory of Oregon, Willamette University was established with the Oregon Institute as a preparatory school.

1859.

The first class was graduated from the College of Liberal Arts.

1864.

The chapel building was begun. At the laying of the cornerstone Governor Gibbs delivered the address. The Greek-cross form of the building was suggested by Bishop Janes at his last visit.

1867.

April.—The School of Medicine, which had been giving instruction for two years, was formally organized.

July.—The first honorary degrees conferred by the University were given. Hon. Geo. H. Williams, United States Senator; Hon. M. P. Deady, United States District Judge, and Hon. A. C. Gibbs, ex-Governor of Oregon, received the degree of LL. D.

1884.

The School of Law was established.

1905.

The brick building occupied by the Schools of Medicine and Law was erected, being the gift of the citizens of Salem.

1906.

The building for the use of the School of Theology was erected. Mrs. Luella D. Kimball, wife of Rev. H. D. Kimball, Dean of the School of Theology, presented this structure to the University.

1907.

A large building was placed upon the campus for the use of the School of Music. W. W. Brown, of Paulina, Oregon, presented this building to the University.

1908.

Hon. A. E. Eaton, of Union, Oregon, in September, began a magnificent College of Liberal Arts Building on the campus, at a cost of \$50,000. Mr. Eaton paid the total cost of this building, which was ready for use when school opened in September, 1909. This building is one hundred fifty feet long and three stories high above the basement, fronts the State Capitol, and is called Eaton Hall.

Willamette has been richly honored in the success and high positions attained by her children.

Among the thousands of former students and over a thousand graduates from her different departments are numbered preachers, missionaries, teachers, professors, congressmen, judges of County Courts, of Superior Courts, of Circuit Courts, of Supreme Courts, of United States District Courts, editors, authors, explorers, municipal officers, physicians, United States Senators, Governors, United States Attorneys, Consuls, Secretaries of State, United States Surveyors General, President of State Senate, Speaker of House of Representatives, and scores of prominent and successful citizens.

LOCATION.

The location of Willamette University is ideal. Salem is the capital city of Oregon with about 15,000 inhabitants. It is on the main line of the Southern Pacific railroad, and also on the Oregon Electric, fifty miles south of Portland, Oregon, and is easily reached. The city

is rich in historic associations, filled with good homes, beautiful in landscape, made up of intelligent citizens, and has a good moral and religious atmosphere.

The legislature, the higher courts, the public libraries, the numerous resident officials of county and state, the eminent traveling lecturers and musicians, the manufactories and commerce, the state institutions give students a liberal education in practical affairs.

Salem is pre-eminently a city of schools. Counting Willamette University as one, there are ten schools, academies and colleges within the boundaries of Salem and near its borders.

The University is located on high ground near the center of the city, convenient to postoffice and depot and just across the street from the Capitol. The location is ideal and beautiful and inspires to refinement and culture.

BUILDINGS.

Eaton Hall, the new College of Liberal Arts Building, is the most beautiful public building in Salem. It is built of red pressed brick and gray stone. The arrangement of the interior and the method of heating are thoroughly modern. It is one of the finest educational buildings in Oregon.

The Chapel Building is a large brick and stone structure, five stories high. It contains about thirty rooms, used for chapel, laboratories, recitations, and for the literary societies and Christian Associations.

The Medical and Law Building is a three-story brick and stone building with ample accommodations and equipment for carrying on the Medical and Law Schools.

The Theology Building occupies a delightful situation just across the street from the Capitol grounds. It is well equipped for conducting the work of the Theological School.

The Music Building is well arranged for conducting the School of Music. It was the gift of Mr. W. W. Brown, of Paulina, Oregon, and meets the needs of the University in every respect.

The Ladies' Hall is a commodious building of four stories, with present accommodations for twenty-five to thirty women. It is comfortably furnished throughout and affords a congenial home.

The Gymnasium is a large frame building with ample room for the needs of the students. It is one of the best gymnasiums on the Pacific Coast and is a source of great enjoyment and profit to the students.

Willamette Athletic Field is one of the best to be found. It is well fenced, contiguous to the gymnasium, has a quarter-mile running track, a fine baseball diamond and football field, and a large grandstand. It is complete in every way.

GOVERNMENT.

The University aims to maintain a high standard of conduct for the good of all its students.

In the internal management of the affairs of the institution appeal is always to the reason and conscience of all concerned. The students are recognized as having moral sense and ideas of propriety. Principles of honor are inculcated. Christian courtesy is encouraged. The regulations are such as everywhere govern the conduct of ladies and gentlemen of high ideals. The atmosphere of Willamette University is not congenial to any other class of students.

Matriculation presupposes a willingness to conform to the rules and usages of the University.

RELIGIOUS LIFE.

Membership in any church whatever is not required. Students of any and every religious belief are admitted to the University and in nowise is there any discrimination.

The University is devoted to Christian culture, but is not sectarian. Devotional exercises are observed each school day in the Chapel.

Special religious meetings are conducted during the year at the discretion of the President and faculty.

The Salem churches take a special interest in the students, both in regular services and in the Sunday schools. Students are advised to attend the church of their choice on the Sabbath day.

STUDENT ENTERPRISES.

The Student Body is the organization of all the students of the University. This organization, under the supervision of the President and faculty, has control of general student affairs, such as athletics, the business management of the *Collegian*, inter-collegiate debates, and oratorical contests.

The *Collegian* is the college paper, published weekly. The editors and business manager are elected by the Student Body.

The Young Men's and the Young Women's Christian Associations are strong organizations and do effective work. They give especial attention to new students, meeting them at trains, helping them to locate, and making every effort to help them feel at home in Salem.

The Girls' Student Association is composed of members of the Colleges and Academy. Its purpose is to foster social life.

The Oratorical Association of the Colleges, in connection with the Intercollegiate Association, conducts the local oratorical contests.

The Literary Societies afford opportunity for such work as is usually undertaken by such organizations. They have pleasant and well-furnished halls.

OPPORTUNITIES FOR SELF-HELP.

Salem people are loyal in every way to the College. Young men and young women who are desirous of finding places where they may earn all or a part of their living expenses find many and various methods of earning money. Some young women find comfortable homes with families who expect a reasonable service in the domestic affairs of the home in return.

There is a limited amount of labor for students about the buildings and grounds, and the faculty cheerfully help to secure places where students may earn money. Those who are unable to secure funds enough in advance for a year's expenses need not be deterred from beginning the year.

The President will gladly communicate with young men or young women desirous of working their way.

LOANS AND SCHOLARSHIPS.

STUDENT AID.

Every means is taken to assist worthy students to secure an education. It is realized by the President and the faculty that some of the best men and women we have are those who have worked their way through schools and colleges, and have thus put themselves in a position to be more useful. At our own University many of the boys and girls are working their way, and these rank among the best in the University.

BOARD OF EDUCATION.

One source of student aid in our school is the fund held by the Board of Education of the Methodist Episcopal Church. This fund is loaned to worthy Methodist boys and girls, upon such conditions that the loans are not at all burdensome.

BOOTH FUND.

In addition to that which has been mentioned above, Hon. R. A. Booth, of Eugene, Oregon, placed in the hands of a special trustee \$1000 to be loaned to properly recommended students. This fund has accomplished great good, as quite a number of our students would have been compelled to leave the University had it not been for the help secured from this fund.

THE HOME SCHOLARSHIP.

The Oregon Children's Aid Society has made Willamette University trustee to handle a fund of approximately \$8000, the interest of which is to be used in educating orphans and half orphans of the state of Oregon who are students of the College of Liberal Arts in Willamette.

University, and who succeed in maintaining a standard of scholarship that is above the average.

ATHLETICS.

The need of physical exercise and training is apparent and universally conceded. It is the plan of the President and faculty to keep in touch with this work in such a way as to eliminate evils and make athletics clean and productive of real benefit to the participants. A good gymnasium, and one of the best athletic fields in the country are among the advantages offered by the University. Classes in systematic gymnasium work are conducted by a competent director in the employ of the University.

Students having unsatisfactory scholastic rank may be debarred from match games.

LAUSANNE HALL.

(Named for the ship which brought missionaries to Oregon.)

This is a home-like and pleasant dormitory for young women. Board is \$3.25 per week, payable weekly in advance. Rooms are from 75 cents to \$1.80 per week, payable in advance.

BOARDING CLUBS.

A co-operative club of twenty-five young men has succeeded in securing satisfactory board at \$2.25 per week. Some young men room in the Chapel Building on the fourth floor at moderate rates.

LABORATORIES AND MUSEUM.

In all progressive schools of modern times well-equipped laboratories from a principal element of strength in theoretical and applied sciences. It is gratifying to note the progress Willamette University has made in the last few years in fitting up its laboratories.

The biological laboratory is supplied with gas, electricity, good tables and sinks, dissecting microscopes, compound microscopes, microtome, and other articles ordinarily used in microscopic and histological work.

In the department of physics our laboratory is well equipped with working apparatus for the use of students to give a strong course extending over more than three years of continuous work. The idea of practical experiments along engineering lines is introduced in the preparatory course and continued throughout the work; such, for instance, as strength of materials, elasticity of bending and torsion, coefficient of expansion, moment of inertia, etc. Besides the ordinary apparatus in electricity the laboratory is equipped with complete apparatus for X-ray work and wireless telegraphy, as well as with high-grade instruments for accurate quantitative measurements in both electricity, mechanics, light, sound and heat; thus opening to the

student special fields of investigation beyond the three years of fundamental work. It is the purpose of the department to have the student lay a thorough foundation in fundamental principles, and to this end the courses are arranged to cover the ground, as near as conditions will permit, of the freshman and sophomore years as offered by our leading universities.

In Chemistry the laboratory equipment is ample for all the work commonly offered of college grade. The laboratory has been changed to the second floor of the old College Building, occupying the entire south half of the building. At the beginning of the academic year three new desks were installed. The laboratory is thus arranged with private desk and lockers, set of reagents and apparatus, gas burner, etc., for each student; also a very large supply of chemicals for the sidetable, high-grade balance for delicate quantitative analysis, etc. During the past year we have also installed a new assay outfit and are in a position to give a thorough course in assaying. Additions are being made from time to time in order to keep abreast with the general development of the science.

Several high-grade instruments have been secured for the surveying department, including the Y-level and engineer's transit with solar attachment, etc., sufficient for all necessary field work for a course extending through two years, and including plane surveying, mine surveying, hydrographic surveying, and railroad surveying.

The department of astronomy has instruments illustrating the meridian circle, altitude-azimuth instrument, sextants, globes and several small telescopes.

The department of geology has arranged a collection of rocks and minerals, consisting of about five hundred specimens, for use in the study of geology and mineralogy. The professor of geology would like to correspond with any persons having any specimens of rocks or minerals which they would be willing to add to this collection.

There is also a small collection of fossils and just a beginning of a collection of Oregon rocks and minerals, and the department is especially desirous of making additions to this collection.

MUSEUM.

A splendid collection of birds and animals from Central America, many interesting Indian relics, and numerous specimens for the herbarium have been added during the year to the valuable collection in the museum.

UNIVERSITY EXTENSION.

This movement has spread into many sections of the country in connection with colleges and universities as centers. "The aim is:

First—To extend higher education to all classes of people.

Second—To extend education through the whole of adult life.

Third—To extend thorough methods of study to subjects of everyday interest.

University extension is designed to help those who desire definite instruction but cannot take a long or regular course.

A beginning in this department has been made in Willamette, a call for such work in economics having been made by a number of prominent people in Salem, with the result that a division was organized. Courses in Economics, Sociology, and Bird Study have been given.

GRADUATE WORK.

Graduate instruction, leading to the Master's Degree, will be offered in a limited number of departments under the following conditions:

1. Candidates must have received the Bachelor's Degree from this University or one of equal rank.
2. Candidates must pursue a course of study outlined by the faculty; or they must present evidence of having done post-graduate work equivalent to such course.
3. Candidates must submit an acceptable thesis to the professor under whom the work is done.

For information concerning fees and other conditions, address the President of the University.

College of Liberal Arts

TERMS OF ADMISSION.

A testimonial of good character is required of every student matriculating in Willamette University.

Every new student should bring a certificate of scholarship. This certificate should state: (1) each study pursued; (2) the text-book used; (3) the number of weeks devoted to the text-book and the number of recitations each week; (4) the portion of the text-book covered by the recitations; (5) the grade which the student has secured in each study; (6) the name of the school at which the studies were pursued; (7) the name of the teacher under whom the work was done.

It is very important that students register promptly upon the opening day of the semester, and every student will be expected to be in attendance at the first recitation of the semester.

An extra fee of \$1.00 will be charged each student who fails to register during the first week of the semester.

Registration in the office of the President is required of all students in the various departments and affiliated Colleges of the University.

REQUIREMENTS FOR ENTRANCE.

For entrance to the Freshman class fifteen units, or one hundred and fifty semester hours, are required. If a student presents thirteen units he may rank as a conditional Freshman, but should make up the remaining units at the earliest opportunity. A unit is earned by carrying a subject five times a week (not less than forty minutes each), for one year.

Graduates from accredited high schools whose courses vary somewhat from those of our Academy may, if they offer the full fifteen units, so adjust their work that graduation is possible in four years.

The following specific requirements are, however, insisted upon: English 3 units; Foreign Language, 2 units; Algebra, $1\frac{1}{2}$ units; Plane Geometry, 1 unit; History, 1 unit; Physics, 1 unit. The remaining $5\frac{1}{2}$ units may be elected from subjects offered by accredited high schools, 2 units of which should be Foreign Language,* thereby reducing the number of units to be taken in college.

Candidates for advanced standing must give evidence of fitness either by examination or by credentials from another institution.

*Students preparing for the University are strongly urged to take at least two years of Latin, which is definitely required for the Language and Literature Group.

GRADUATION.

The completion of 120 semester hours, exclusive of physical training, above the Academy courses, with all entrance requirements satisfied, is required for graduation from any course.

A semester hour is one recitation period per week for one semester.

COLLEGE COURSES.

The departments of study are arranged in the following groups, either of which leads to the degree of Bachelor of Arts:

I.	II.	III.
LANGUAGE AND LIT- ERATURE.	PHILOSOPHICAL.	SCIENTIFIC.
English	Philosophy	Mathematics
English Literature	Psychology	Botany
Biblical Literature	Ethics	Zoology
Latin	Education	Physiology
Greek	History	Physics
German	Economics	Chemistry
French	Sociology	Geology
Spanish	Political Science	Astronomy

For graduation from the College of Liberal Arts the requirements are the satisfactory completion of

1. A few prescribed subjects, as fundamental:

English, 10 hours*	Mathematics, 6 hours
English Bible, 6 hours	Philosophy, 6 hours
European History, 6 hours	Science, 6 hours.
Foreign Language, 12 hours ^o	

To be taken in Freshman and Sophomore years as indicated on opposite page.

2. Required electives within each of the three groups.

In the Junior and Senior years as indicated on opposite page.

3. A major of not less than eighteen hours nor more than twenty-four hours, which may consist wholly of studies in one department (if offered), or partly of studies in a cognate department, so chosen as to make a consistent program. The studies constituting the major are to be elected with the approval of the head of the department in which the major is taken.

4. Sufficient free electives to make a total of at least 120 semester hours.

At the end of his sophomore year every student shall present at the office of the President an outline of the studies which he proposes to pursue during his last two years.

*Four hours in the Scientific Group.

^oStudents who offer only two units of Foreign Language for admission will be required to take two additional years before graduation, making a total of six years Foreign Language (including that offered for admission), required for the degree of B. A.

Suggestive Outline of Courses Leading to the A. B. Degree*

(Stated in semester hours, one-half being taken each semester.)

I. LANGUAGE AND LIT- ERATURE GROUP. (Classical)	II. PHILOSOPHICAL GROUP.	III. SCIENTIFIC GROUP.

Electives required in— Language and Literature Group16	Electives required in— Philosophical Group ..16	Electives required in— Scientific Group16
Philosophical Group...10	Scientific Group10	Language and Literature Group10
Scientific Group10	Language and Literature Group10	Philosophical Group...10

A Major and Free Electives sufficient to complete the total number of semester hours required for graduation.

It is designed by the requirement of prescribed subjects to lay a broad foundation for a liberal education and by the requirement of certain hours in each group (not subjects, which are elective within the groups) to bring the student into fuller contact with the main divisions of modern study, thereby securing breadth of culture, while the requirement of a major secures concentration and continuity in some one department as a field of specialization.

Certain credits are given for work in the Schools of Theology, Law, and Medicine. Students in these schools, which are all on the campus thereby affording unusual opportunities, are permitted to elect work in the College of Liberal Arts. Students in the College of Liberal Arts may elect work in these schools.

*Those who specialize in the Sciences even more than is possible in the Scientific Group leading to the A. B. Degree and take less Foreign Language, will be given the B. S. Degree.

^oSee Department.

||Four hours Biblical Literature (Prescribed) may be taken in the Sophomore year.

TUITION AND FEES.

Tuition in College of Liberal Arts, \$20 per semester; \$40 per year. An incidental fee of \$10.00 each semester will be charged each regular College student.

Two dollars each semester of the incidental fee in the College of Liberal Arts and Academy is used for athletics and other student affairs under the direction of the Board of Trustees.

Laboratory fees: Chemistry, Physics, Biology, \$3.00 per semester. A breakage deposit of \$5.00 is required of all students in Chemistry. Diploma, \$5.00.

Dependent children of ministers in the regular work of the ministry, and students preparing for the ministry, who are duly recommended by the church in which they hold membership, pay one-half the regular tuition.

Students should come prepared to pay their tuition and other fees on registration each semester.

EXPENSES.

The following are estimates of the principal expenses for one college year of thirty-six weeks:

	<i>Low.</i>	<i>Average.</i>	<i>High.</i>
Board and room, with fuel and light.....	\$ 90	\$126	\$180
Tuition and incidental fees	60	60	60
Books	5	8	15
Fees	6	12	18
	\$160	\$204	\$270

The \$90 estimate is based on boarding one's self.

A few students succeed in reducing expenses a little below the lowest estimate above.

SPECIAL STUDENTS.

Applicants for particular studies who are indifferent to the degree will be admitted, so far as they are qualified, to such subjects as they may choose. If such students should subsequently desire to become candidates for the degree they will receive credit for all work done. Students of this class cannot change their relation to that of candidates for the degree except by examination upon presupposed work, including the requirements for admission.

The University registration fee of \$2.00 each semester will be required of special students.

Description of Courses

PHILOSOPHY.

FREDERIC CRAMER, *Professor.*

1. *Introduction to Philosophy.* This course is a simple introduction to the several lines of philosophical study. It is required of those who wish to do advanced work in this department. Open to Freshmen and Sophomores who are achieving creditable standing in their required work. Two hours during the second semester.

2. *History of Philosophy.* From the beginnings of Greek philosophy to modern times. A clear presentation of the main systems and of the development of these systems, together with the general development of thought and civilization is the aim. Course 1 must precede this course. Three hours throughout the year. (1910-11).

3. *Metaphysics.* Ontology, the relation of body and soul, time, space, the nature of the soul—these are problems which come up here for systematic study. For advanced students. Three hours during the second semester. (1911-12).

4. *Logic—Deductive and Inductive.* The course is to give the student an insight into the forms of thought, to aid him in correct thinking and to furnish him a basis for systematic thought by presenting the methods of science. A text-book is used and ample practice in syllogistic reasoning is given. Three hours in the first semester. Primarily for Juniors. (1910-11).

5. *Ethics.* The aim is by analytical study of various ethical theories to gain correct principles of ethical conduct and to show their application in various fields of life. Three hours during second application. Three hours during second semester. (1911-12).

6. *Christian Ethics.* A study of the Ethics of the New Testament and of Theology. The relation of Christian Ethics to the social problems emphasized. Second semester, 1910-11; three hours.

7. *Evidences of Christianity.* The existence of a Personal God; justification of the belief in a divine Christ; and value of the Christian religion. Two hours, first semester. (1911-12).

8. *Philosophy of Religion.* A consideration of the problems of theism and of religious belief. Two hours, first semester, 1910-11.

9. *Psychology of Faith.* A study of the subjective basis of the religious life. Three hours, first semester. (1911-12).

10. *Psychology.* The course undertakes a scientific study of the phenomena of consciousness, showing their relation to physiological processes, but also emphasizing the peculiar nature of the psychical—following Ladd's *Outlines of Psychology*. Experiments to illustrate the text will be introduced as far as possible. Two hours throughout the year. Required of all Sophomores. Students who have not taken

Physiology as part of their high school work should arrange for such a course during their Freshman year.

EDUCATION.

MARY E. REYNOLDS, *Professor.*

The work of this department affords those who are preparing to teach, opportunity to become acquainted with the methods and results of the various phases of modern pedagogy.

Observation work will be carried on during the two years teachers' course. Inasmuch as the intention is to develop teachers along sane, practical, efficient lines, no spectacular methods will be employed for advertising purposes. "Best methods to make best teachers," will be the motto of this department.

In addition to the free electives and the electives required within groups which may be chosen in the subject which one expects to teach, a major and some free electives may be taken in this department. Some of the special subjects are:

1. *School Laws of Oregon.* Two hours, first semester.
2. *Methods.* Theory discussed, and illustrated by a practical application to the subjects of Higher Arithmetic, Advanced English Grammar, etc. Five hours, both semesters.
3. *Pedagogy.* A comprehensive treatment with discussion of views of Bagley, Seeley, White, McMurry and others. Freshman year, three hours, both semesters. Sophomore year, two hours, both semesters.
4. *History of Education.* Text-book by Monroe. Three hours, first semester.
5. *Principles of Teaching.* Based upon Psychology. Text-book by Thorndike. Three hours, second semester.

In connection with the work of this department some knowledge of Biology and Sociology is very desirable and should be acquired by those making a major in Education.

PHYSICS.

F. VON ESCHEN, *Professor.*

1. *Mechanics, Sound, and Heat.* Lectures, recitations and laboratory work. This is the first half of a course covering the entire subject. The purpose is to lay a foundation of general principles in view of further study through advanced courses and laboratory work, and to furnish a body of physical knowledge and an introduction to the scientific method and spirit suited to the needs and aims of a liberal education. Entrance Physics is required. A laboratory fee of \$3.00 is charged for this course. Three hours, first semester.

2. *Electricity, Magnetism, and Light.* Lectures, recitations and laboratory work. This course completes the general view of Physics

which the first year's work is designed to give, and aims to furnish that acquaintance with electric, magnetic, and optical phenomena and theory and with their practical applications, which is desirable for the liberally educated man, and necessary for the special student in science. Course 2 must be preceded by Course 1. A laboratory fee of \$3.00 is charged for this course. Three hours, second semester.

3. An advanced course in Mechanics.

4. An advanced course in Electricity and Magnetism.

5. An advanced course in Heat, Light, and Sound.

Courses 3, 4 and 5 may be taken by students prepared for the same. For requirements, hours, and fees, consult the head of the department.

CHEMISTRY.

F. VON ESCHEN, *Professor.*

1A and 2A. *General Advanced Inorganic Chemistry.* Lectures, recitations and laboratory work. This course deals with the fundamental facts and principles of the science. Lectures are given and recitations required, either upon the lectures or upon subjects assigned in the text-book. The laboratory work is arranged to illustrate and confirm the subjects considered in the lecture room. The principal elements, both non-metallic and metallic, are studied, and their chemical combinations considered. Students take full notes of their work and are examined upon it. Chemistry 1 and 2 are open only to students who have received entrance credits in Chemistry. A laboratory fee of \$3.00 per semester is charged. Three hours, throughout the year.

1B and 2B. *General Inorganic Chemistry.* This course is of the same nature as 1A and 2A except that it is designed to cover both the elementary and advanced work. Lectures and laboratory work. For Freshmen and Sophomores who have not received entrance credits in Chemistry. Prerequisite, Elementary Physics. Laboratory fee, \$5.00 per semester. Five hours, throughout the year.

3 and 4. *Qualitative Analysis.* This course consists of a systematic study of the principal metals and acids and methods for detecting them in simple and complex mixtures. Lectures and laboratory work. A laboratory fee of \$5.00 per semester is required. Three hours, throughout the year. This course alternates with Courses 5 and 6.

5. *Quantative Analysis.* An accurate determination of some of the elements of simple compounds both by gravimetric and volumetric methods. Prerequisites, Courses 1A and 2A or 1B and 2B. Three hours, first semester. A laboratory fee of \$5.00 per semester is charged.

6. *Assaying.* This course comprises silver and gold extraction by scorification and crucible methods; fire assay of copper, lead and tin, extraction of gold from ores by the amalgamation, the chlorination,

the cyanide and the electrolytic process. A fee of \$6.00 per semester is required. Four hours, second semester. Hours to be arranged. Prerequisites, same as for Course 5.

7. *Water and Milk Analysis.*
8. *Iron, Steel and Copper Analysis.*
9. *Sanitary Chemistry and Food Analysis.*
10. *Organic Chemistry.*

Note.—For the year 1910-1911 such elective courses, selected from Courses 6, 7, 8, 9, 10, or from others which are practicable, will be given as the time of the instructor will admit, and the wishes of the qualified students will justify. It is desired that those contemplating such work confer with the head of the department as early as possible.

A deposit of \$5.00 is required in all courses in Chemistry as a break-age fee. Loss by damage or destruction of apparatus will be deducted from the deposit and the balance refunded at the close of the semester.

GEOLOGY.

F. VON ESCHEN, *Professor.*

1. *General Geology.* This course aims to give an elementary survey of dynamic, structural, physiographic, and historical geology, and of minerals, rocks, and fossils, illustrated as far as possible by specimens from the College Collection, and to show the student the nature of the field covered by geological study. Excursions are made to points in the vicinity where geologic processes and forms are illustrated. An elementary knowledge of physics, botany, zoology and chemistry is required. Five hours, second semester. For Juniors and Seniors.

2. *Mineralogy, Descriptive and Determinative.* Lectures and laboratory. The course involves a study of elementary crystallography, the determination of unknown minerals by means of their physical and chemical properties and tests and the descriptive study of typical minerals found in the College Collection. The object is to familiarize the student with the common minerals about him and to enable him to recognize them on coming in contact with them in the field. Prerequisite, Geology 1. A laboratory fee of \$3.00 per semester is required. Three hours.

3. *Economic Geology.* A study of the mineral resources of the United States, including: (a) The non-metallic products; fuels—coal, petroleum, gas; building and structural materials—stone, marble, slate, clay, cement, etc.; miscellaneous products—phosphates, mineral paints, mineral waters, salt, borax, etc. (b) The metal-bearing minerals; the origin and formation of ore-bodies; the ores of iron, copper, lead, zinc, gold, silver, etc.; the extraction and use of the metals. (c) Soils—their nature and origin. Three hours. Prerequisites, Geology 1 and 2, or Geology 1 and Chemistry 5 and 6. Courses 2 and 3 will not be given in 1910-1911.

ASTRONOMY.

F. VON ESCHEN, *Professor.*

1. *General Astronomy.* A rapid survey of the fundamental concepts of astronomy. Supplemented by a direct study of the sky and by quizzes and examination upon an assigned text. Freshmen will be admitted to this course only by special permission in each case. This course with Geology 1 forms a continuous course throughout the year. For Juniors and Seniors. Prerequisite, elementary physics. Five hours, first semester.

BIOLOGY.

M. E. PECK, *Professor.*

The aim of the instruction in this department is to present the general principles of Biology through a more or less detailed study of several important types, representative of each of the large phyla of the animal and vegetable kingdoms.

1. *Invertebrate Zoology.* A survey of the several types of invertebrates, beginning with a brief microscopic study of the Protozoa, and advancing through the higher groups in the order of their natural succession. Some attention is given to the biology of each group, and to its relation to human economy. The outlines followed in the laboratory work are designed to enable the student to draw his conclusions independently on the great fundamental principles of animal morphology. One lecture and four hours of laboratory work, first semester.

2. *Vertebrate Zoology.* A study of chordate animals, beginning with the lampreys and proceeding in the same manner as in the invertebrate work. Each group is carefully compared with those above and below it, and each in turn with man. Only four or five types are studied during the semester, but these in sufficient detail to give the student a fairly comprehensive knowledge of vertebrate anatomy. One lecture and four hours of laboratory work, second semester. The course in Human Physiology, or that in Zoology in the Academy is a prerequisite to this.

3. *Botany.* This work follows the same general plan as that of the courses in Zoology, though necessarily the laboratory portion of it is mainly microscopic. Beginning with the simplest forms, slime moulds and bacteria, each group in turn is studied and compared with others and its limits defined. Plant physiology, ecology, etc., are given due attention. One lecture and four hours of laboratory work throughout the year.

4. *Human Physiology and Anatomy.* This course takes up somewhat in detail the structure of the human body. While not technical, it aims to give the student such a comprehensive knowledge of the

subject as every well-informed person should possess. The subjects of hygiene and sanitation receive considerable attention. Text, lectures, and laboratory. The course in Vertebrate Zoology is a prerequisite to this.

5. *Foundations of the Theory of Organic Evolution.* A brief examination of some of the leading facts on which the evolutionary hypothesis, so far as it applies to plants and animals, is based. One hour a week during the first semester. Open to all College students.

6. *Systematic Botany.* Principles of classification of seed-plants, with a brief study of local flora. Three hours a week throughout the second semester. Open to all who have had the Academy Botany.

Note.—In all these courses two hours of laboratory work count as one prepared recitation.

ENGLISH LANGUAGE AND LITERATURE.

WILLIAM E. KIRK, *Professor.*

I. RHETORIC AND ENGLISH COMPOSITION.

1. *Rhetoric and English Composition.* Critical study of rhetorical principles, based on Genung's Working Principles of Rhetoric. Two hours, both semesters.

2. *Advanced Composition.* A practical course in descriptive and narrative prose. Analytical study of Poe, Hawthorne, Maupassant, Kipling and others. Two hours, both semesters.

3. *Studies in Orations and Debates.* Practice in making analyses and briefs. Baker and Huntington's Principles of Argumentation. Two hours, both semesters.

II. ENGLISH LITERATURE.

1. *History of English Literature.* A survey of the development of English literature from Beowulf to the present time. Special class study of Chaucer, Spenser, Milton and other representative authors. Library readings and written reports. Manly's English Poetry and Pancoast's Standard English Prose. Three hours, both semesters.

2. *Shakespeare.* A critical analysis of eight plays. Three hours, both semesters.

3. *Nineteenth Century Poetry.* Studies of the leading English poets from 1798 to 1900. Page's British Poets of the Nineteenth Century. Two hours, both semesters.

4. *History of American Literature.* Written studies in the leading American authors. Library readings and reports. Two hours, both semesters.

5. *Principles of Literary Criticism.* Written studies of Tennyson's Princess and other poems, and of Emerson's Nature Addresses. Two hours, first semester.

6. *Studies in Milton.* Linguistic and literary study of *Paradise Lost*, *Paradise Regained*, and *Samson Agonistes*. Two hours, second semester.

7. *Old and Middle English and History of the English Language.* Readings from Bright's *Anglo-Saxon Reader*. History of the development of the language. Two hours, both semesters.

8. *Advanced Middle English.* Readings in Langland, Chaucer, and Malory. Linguistic and literary studies. Two hours, both semesters.

9. *Browning.* Written studies of *Luria*, *Pippa Passes*, *Return of the Druses*, parts of *The Ring and The Book*, and *Sordello*. Two hours, both semesters.

10. *Advanced Studies in the Drama.* Studies in the beginning and development of the English drama, with special attention to the dramatic art of Shakespeare. Two hours, both semesters.

Courses I 1, and II 1 are for Freshmen.

Courses I 2, and II 2, 3, 5 and 6 are open to Sophomores.

Courses I 3, and II 4-10 are open to Juniors and Seniors.

Courses II 7, 8 and 10 may be counted as graduate work.

Courses II 3, 7 and 10 will not be given in 1910-1911.

HISTORY AND SOCIAL SCIENCE.

GAYLORD H. PATTERSON, *Professor.*

G. J. SWEETLAND, *Assistant in History.*

The aim of the department is to present history as a real educative process. The evolution of European civilization from its sources, and the growth and influence of Anglo-Saxon institutions constitute the general theme. Economic, social and political life in ancient, mediaeval and modern times are studied in the rise and fall of nations and in the evolution of institutions; present conditions being kept constantly in view and American conditions being specifically analyzed so that the student is qualified for intelligent, responsible citizenship, in addition to receiving great cultural benefit from the investigations.

I. HISTORY.

1a. *Mediaeval European History.* A study of the economic, social, religious and political conditions in Mediaeval Europe which contributed to the formation of the States of Modern Europe. Three hours, first semester.

1b. *Modern European History.* An examination of the formation of the modern states and of the great struggles growing out of their development. Three hours, second semester.

1a and b are primarily for Sophomores.

2a. *Early American History.* The founding of the colonies, the struggle between the states of Europe for domination in America, the

growth of the movement for independence and the formation of the Union constitute the subject-matter of this course. Two hours, first semester.

2b. *United States History*. States rights doctrine, Nullification, Secession, Civil War and Reconstruction. Topical analyses and special assignments, such as Internal Improvements, Political Parties, Slavery, Land Policy, etc., will be made, the sources in government publications and the writings of the statesmen, etc., being freely used. Two hours, second semester.

2a and b to be given 1910-11.

3a. *The Founding of the English State*. The establishment of the English constitutional monarchy; the development of the parliamentary and judicial systems. Two hours, first semester.

3b. *The Constitution of the British Empire*. The growth of democracy and the development of local self government under the Stuarts and the House of Hanover. The economic, social, literary and religious life are studied in relation to political development. Two hours, second semester.

(Courses 2a and b, and 3a and b alternate, being elective for Juniors and Seniors).

Other courses in History open as electives to Juniors and Seniors may be found described in the department of English Bible and Christian Missions.

Church History and History of Christian Thought, given in the School of Theology, are open as electives.

II. SOCIAL SCIENCE.

1a. *Principles of Economics*. An introduction to the principles which underlie different economic relations and institutions. Three hours, first semester.

1b. *Problems of Economics*. A detailed examination of economic principles applied to such problems as credit and banking, labor, trusts, transportation, taxation, etc. The aim is to make the method of work such as to foster a judicial spirit and an attitude of scholarly independence. Three hours, second semester.

(1a and b are primarily for Juniors).

2. *Comparative Politics*. The method is historic as well as comparative, beginning with a study of the origin, development and purpose of the state, and passing to a comparison of the governments of France, Germany, England, and the United States, giving the main attention to the latter. Three hours, first semester. To be given 1910-11.

3. *Jurisprudence*. A study of the nature and divisions of law,

and of the rights and duties of men in their business, civic and family relations. Three hours, second semester. To be offered 1910-11.

4. *Sociology*. An inquiry into the nature of society, the course and factors of social progress with a view to discovering those policies of society which make for future improvement. Three hours, first semester.

5. *American Government*. An investigation of fundamental principles and of the actual workings of national, state and local administration, with particular emphasis upon the condition and rule of cities and the relation of the citizen to public affairs. Three hours, second semester.

(Course 2 and 3 alternate with 4 and 5, being electives for Juniors and Seniors).

Other courses in Social Science open as electives to Juniors and Seniors are 4a and b in the department of English Bible and Christian Missions.

Special courses in Anthropology and Ethnology will be given as the demand warrants.

RESEARCH WORK IN INVESTIGATION OF SPECIAL TOPICS.

The proximity of the State House, State Institutions, and the State Library afford unusual opportunities for such work and the department plans for a course of one hour a week intended to train the student in methods of gathering, handling and presenting data in the study of social and political problems.

ENGLISH BIBLE AND CHRISTIAN MISSIONS.

GAYLORD H. PATTERSON, *Professor*.

The aim of this department is to vitalize the history and literature of the Bible. The work of the department is intended to familiarize the student with that great monument of our literature, the English Bible, and with the great civilization back of the Bible, without touching questions of doctrine or belief.

1. *Biblical History*. Treating the social and political life of Israel through the stages of nomadic origin, settlement of the monarchy, dissolution of the state, the Babylonian, Persian, Greek and Roman domination, to the fall of Jerusalem, 70 A. D., noting the development of religious life under prophets, priests and kings and under Jesus Christ and the apostles as seen in the literature representing each. Two hours, first semester.

2. *Introduction to the English Bible*. A general survey of the history of the English Bible as a series of translations from the original languages, with particular reference to the evolution of its English and its influence upon our English as well as to its literary

character and influence upon English literature, passing to a study of its origin, growth and canonization as seen in particular periods of history and types of literature, which affords an insight into the meaning of revelation and inspiration. Two hours, both semesters.

(Courses 1 and 2 are prescribed work for Freshmen and Sophomores).

3a. *A Study of Hebrew Prophecy and the Psalms.* Noting in both the development of religious life. Two hours, first semester.

3b. *A Study of Some of the Epistles of the New Testament.* The circumstances of their origin, etc. Two hours, second semester.

4a. *History of Religions.* A survey of the principal religions of the world with an inquiry into their origin, development and contribution. Two hours, first semester.

4b. *History and Development of Christian Missions.* Noting their relation to commerce and social progress. Two hours, second semester.

(Courses 3a and b alternate with 4a and b, being electives for Juniors and Seniors).

Courses in the Old and New Testaments in the original languages, given in the School of Theology, are open as electives.

MATHEMATICS.

JAMES T. MATTHEWS, *Professor.*

The courses are designed for two classes of students: first, those who intend to enter professions in which mathematical knowledge and skill are an important instrument; second, those who study mathematics as a part of a liberal education.

1. *Trigonometry*, with applications to Surveying. The general formulas, practical applications of the solutions of triangles, the theory of logarithms, and trigonometric equations. Surveying will be taught practically, with instruments, the last few weeks of the course. Three hours, throughout the year. (See Advanced Algebra in Academy, page 51).

2. *Analytic Geometry.* Including the straight line, circle, parabola, ellipse, hyperbola, and some of the higher curves. Four hours, first semester.

3. *Calculus.* Differentiation and easy integration. Four hours, second semester.

4. *Calculus.* A continuation of Course 3. Expansion of functions, areas, volumes, length of curves, center of gravity, pressure of liquids. Four hours, first semester.

5. *Advanced Course.* A continuation of Courses 3 and 4, with applications to mechanics and an introduction to Differential Equations.

The following courses will be given in alternate years. The selection

will be governed by the wishes of the students and the number of persons desiring to pursue the study.

6. *Solid Analytical Geometry*. An advanced course; the plane, the straight line in space, the sphere, the cylinder, the cone.

7. *Spherical Trigonometry*. The celestial sphere, the astronomical triangle.

EQUIPMENT.

Several high-grade instruments belong to this department, including the Y-level and engineer's transit with solar attachment, etc., sufficient for instruction in field work.

GREEK.

EDWIN SHERWOOD, *Professor*.

The aim of this department is to aid the student in imbibing something of the spirit of the ancient Greeks, in cultivating the acquaintance of the Greek authors usually read in schools, and in learning to enjoy and appreciate them. Attention is also directed to the influence which the Greek language and literature have had and to the practical help which they give toward a better understanding of our own language, while the aim is always kept in view to furnish the mental discipline and training for which this study is so well adapted. The emphasis is constantly laid upon thoroughness in the very beginning, for only thus can the pursuit of Greek become a pleasure and satisfaction to the student.

Courses above number 4 may not all be given in any one year, while the order of their presentation will depend somewhat upon the number and needs of those registering for them. As numbered, each course represents one semester's work, while each course above number 4 is a unit of work in itself.

Courses 1-4 are preparatory for classical students.

1-2. Beginning Greek with selections from Xenophon's *Anabasis*. Five hours.

3-4. Four books of Xenophon's *Anabasis* completed, with Prose Composition. Homer's *Iliad*, Books I-III. Five hours.

5. Selections from Homer's *Odyssey* or from Xenophon's *Memorabilia*. Three hours.

6. Studies in Herodotus and Thucydides, or selections from Demosthenes and Lysias. Three hours.

7. Plato's *Apology of Socrates* and *Krito*, with studies in Greek Philosophy.

8. Studies in Greek Drama, Euripides' *Alcestis*, Aeschylus' *Prometheus Bound*, Sophocles' *Oedipus Tyrannus*. Three hours.

9-10. Studies in the Greek New Testament, the portions read being varied from year to year. Two hours.

LATIN.

MARY P. BARNETT, *Professor.*

The aim of the department is to give the student an acquaintance with the representative writers of Latin literature and some insight into the civilization of ancient Rome.

Courses 1-6 will not all be given in any one year, and the order of their presentation will depend on the number and needs of the students enrolling for them. Courses as numbered are for one semester each.

1. Selections from Livy or Cicero's *De Senectute* and *De Amicitia*. Three hours.

2. Horace's *Odes* with selections from *Satullus*. Three hours.

3. *Plantus' Captivi* or *Trinummus*, and *Terence's Audria* and *Phorenis*. Three hours.

4. *Tacitus' Agricola* and *Germania*. Three hours.

5. Horace's *Satires* and *Epistles*, with studies in the history of Roman Literature. Three hours.

6. *Pliny's Letters*, with studies in the *Private Life of the Romans*. Three hours.

Exercises in Prose Composition.

GERMAN, FRENCH, SPANISH.

WILLIAM J. KELLER, *Professor.*

The aim in view is practical use, in whatever direction that may be. By this both the method and the plan of the instruction are determined. Everything is so arranged as to provide the student with a reliable working basis for industrial, commercial, literary or scientific pursuits.

GERMAN.

1. *Elementary Course*. *Joynes-Meissner's German Grammar* with oral and written exercises. Reading of at least 100 pages of graduated texts. Memorizing of choice poems. Five hours, throughout the year.

2. *Intermediate Course*. *Advanced Grammar* with corresponding composition and oral exercises. Reading of about 400 pages of intermediate texts in prose and verse. Memorizing of selections from texts read. Four hours, throughout the year.

3. *Advanced Course*. *German Syntax*. Reading from classical authors as well as from representative historians and scientists. Oral reports in German and written summaries in German of texts read. Three hours, throughout the year.

FRENCH.

1. *Elementary Course*. *Fraser and Squair's French Grammar*, Part I, with copious oral practice and written exercises. Special verb

drill. Reading of at least 100 pages of modern prose. Memorizing of selections. Five hours, throughout the year.

2. *Advanced French*. Fraser and Squair's Grammar, Part II, with composition and oral practice. Reading of about 400 pages of representative texts. Memorizing of selections. Four hours, throughout the year.

SPANISH.

1. *Elementary Course*. Spanish Grammar. Hills and Ford, with exercises oral and written. Reading of 150 pages of graduated texts. Memorizing of selections. Three hours, throughout the year.

2. *Advanced Course*. Spanish Grammar, by Hills and Ford continued. Composition. Reading of standard texts. Memorizing of selections. Conversational practice. Three hours, throughout the year.

SWEDISH.

JOHN OVALL, *Professor*.

The large number of Swedish immigrants to the Pacific Coast makes it advisable to offer the Swedish language as a subject of study.

GERMAN THEOLOGICAL DEPARTMENT.

FREDERIC CRAMER, *Professor*.

The aim of this department is the training of young men for the ministry in our German churches along the coast; especially those of the Pacific German Conference. Their training is to give them a mastery of both the English and the German language. To this end they are to pursue their exegetical and systematic work largely in German; the courses in historical Theology they are to take in the Kimball College of Theology. Further, all the English and Oratory classes of the Academy and the College are open to them. In German they will receive special training.

An advancing course of study will be provided for in successive years. In 1910-11 the following courses will be given in German:

1. *Introduction to Old and New Testament*. Three hours, throughout the year.

2. *Life of Christ*. Two hours, first semester.

3. *Exegesis of Gospel According to Matthew*. Two hours, second semester.

4. *Exegesis of the Books of Samuel*. Two hours, first semester.

5. *Exegesis of the Acts of the Apostles*. Two hours, second semester.

ORATORY.

SARA BROWN SAVAGE, *Professor*.

1. *Rendering*, critical study of English poetry, the great English and American orators. Recitations and original oration. Extem-

poraneous speaking, platform, deportment, and personal control. Two hours.

2. Advanced work in rendering, theory and philosophy of expression. Practical work in analysis, voice and physical culture; responsive drill. Pantomime—corrections of defects and mannerisms in bodily expression; study of emotion in its effect upon voice and gesture. Platform Art—reader's technique; character delineations; arrangements of programs; choice, abridgement and adaptation of selections for public readings; writing of introductions. Interpretative study of Hamlet or Macbeth. Three hours.

PHYSICAL CULTURE.

G. J. SWEETLAND, *Director*.

Courses for both men and women are offered. The work given is systematic and progressive, organized with the following ends in view: Balanced strength of bodily members, harmony, grace and precision of movement, and responsiveness of body to mind.

1. *For Young Women*. The work embraces free standing exercises, running, walking, and aesthetic gymnastics in the way of drills; exercises with light hand apparatus, gymnastic games, and other beneficial exercise.

2. *For Young Men*. Systematic class-work in gymnastics. This consists of breathing exercises, free movements, vigorous exercises with dumb-bells, Indian clubs, and wands, besides a graded course of exercises upon various pieces of apparatus, and such other exercises as may be necessary for the benefit of the students.

All students will be required to take such physical exercises as may be necessary, in charge of the physical director.

School of Education

THE GENERAL AIM OF THE SCHOOL.

The School of Education of Willamette University is a professional school, whose single aim is the preparation of high-class teachers for the public schools of the Northwest.

The course of study is for two years and includes the necessary elements in the training of teachers:

1. *Educational Theory.* The history of education, psychology, pedagogy, organization and management of schools, the principles and art of teaching, and methods.
2. A thorough study of the subject-matter of the elementary school curriculum.
3. Observation of model teaching.
4. College studies in Freshman and Sophomore years.

REQUIREMENTS FOR ENTRANCE.

Graduates from a four years' Academy or High School course can graduate from the course in the School of Education in two years.

Graduates from this course can complete the College course in two years.

COURSE OF STUDY.

The course in the School of Education includes two years' work above an Academy or High School Course. This brings the standard up to that of such schools in other states.

The course being designed for a specific purpose, cannot be elective and accomplish this purpose.

EXPENSES.

The tuition and incidental fees will be the same as in the College of Liberal Arts.

DIPLOMAS IN EDUCATION.

Under the present school law, the Normal diploma admits graduates at once to the examination for the state certificate (good for five years), the Normal Course taking the place of the thirty months of teaching on county certificates, otherwise required. Under a ruling of the State Board of Education, students may, during their Normal Course, take the state examinations before a county superintendent, and if successful in these examinations receive the state certificate immediately on graduation. After thirty months of teaching experience, they will be entitled to receive the life diploma, on the grades already made before the county superintendent and filed with the State Department.

COURSE IN EDUCATION.

FRESHMAN YEAR.

Language,* 6 hours.
 English Literature, 6 hours.
 Rhetoric, 4 hours.
 English Bible, 2 hours; Introduction to Philosophy, 2 hours.
 Methods,^o 10 hours.
 Pedagogy, 6 hours.

SOPHOMORE YEAR.

Language,* 6 hours.
 General History, 6 hours.
 Psychology, 4 hours.
 Zoology, 6 hours.
 School Law, 2 hours.
 History of Education, 3 hours.
 Principles of Teaching, 3 hours.
 Pedagogy, 4 hours.

*Those who expect to become candidates for the A. B. Degree later must take Foreign Language. Those satisfying the requirements otherwise, but substituting English, or some acceptable subject, may be given the B. Ed. Degree.

^oMethods being given in a practical way in connection with Mathematics and English, earn three hours credit in each which may be applied on the optional subjects for admission, and two hours (four semester hours) in College.

School of Fine Arts

FLETCHER HOMAN, A. M., S. T. B., D. D., *President.*

MARGARET GILL, *Instructor.*

The aim of the school is threefold:

(1) To aid in arousing and directing a love of the beautiful in nature and in art.

(2) To offer opportunities for the study of the fine arts as a part of a liberal education to those who while pursuing other courses of study in the University wish to devote a part of their time to some phase of art as a means of general culture or as tributary to some practical activity of life.

(3) To prepare students for a professional career either as artists, or as teachers of art and drawing in the public schools.

Provision is made for (1) a course leading to a certificate, (2) a supervisors' course designed to train Supervisors of Drawing for the public schools, (3) special students.

RATES OF TUITION.—Water color, oil and China painting; Crayon, pastel, charcoal, pen and ink and pencil drawing: Term of six 3-hour lessons, \$5.00; one 45-minute period per week, a semester, \$5.00; two 45-minute periods per week, a semester, \$9.00; three 45-minute periods per week, a semester, \$12.00.

School of Music

FLETCHER HOMAN, A. M., S. T. B., D. D., *President.*

FREDERIC S. MENDENHALL, A. B., A. M., *Dean.*

The School of Music is experiencing the most successful period of its history. The courses of study having been entirely revised and the requirements for graduation being fully equal to those of any good musical college in the Eastern States, the school has established and is maintaining such a course of instruction as places it at once in the front ranks as a school of the highest grade. The school maintains in connection with its regular work a Glee Club, a Ladies' Musical Club, a Choral Society, embracing a membership of 100 voices, and a splendid Choir Organization of forty members, to all of which music students are eligible. The school offers full and complete courses in Piano, Organ, Violin, Voice, Harmony, Counterpoint, Composition, Theory, History, and Sight Reading. The instruction is both private and in classes, and each course leads to a certificate, a diploma, or a degree.

Students may enter at any time, but private pupils will be required to register for at least one full term of twelve weeks, except those who enter during the last fourteen weeks of the school year, who will be required to register for the number of weeks remaining up to Commencement week. The school year conforms to that of the College of Liberal Arts, but is differently divided in private work, which is separated into three terms as follows: Term I, twelve weeks, up to Christmas vacation; Term II, twelve weeks, up to spring vacation; Term III, ten weeks, up to Commencement week. Students entering at the beginning of a regular term or within the first two weeks thereof will be charged tuition in full for that term. Class-work is divided into two semesters of seventeen weeks each, and all students taking class-work will be required to register in full for one semester. Those entering after the beginning of a semester will be charged full tuition regardless of the time of entrance.

Tuition fees are payable strictly in advance. The following rates are for a term of twelve weeks:

PRIVATE LESSONS.

Piano, Violin, Voice—

Two 30-minute lessons a week, per term.....\$24.00

One 30-minute lesson a week, per term..... 18.00

Theoretical Subjects, History, and Sight Reading—

Two 30-minute lessons a week, per term..... 24.00

One 30-minute lesson a week, per term..... 18.00

Pipe Organ—

One 60-minute lesson a week, per term..... 48.00

CLASS LESSONS.

Two 45-minute lessons a week, per semester.....\$10.00

One 45-minute lesson a week, per semester..... 6.00

PIANO COURSE.

The piano work is divided into seven grades, the completion of five grades being necessary for a certificate, the completion of six for graduation and a diploma. The seventh grade is graduate work leading to the degree of Bachelor of Music. Certain other studies are required for those taking a regular course leading to a certificate, a diploma, or a degree. Following is a general outline of the course of piano studies for the six grades leading to graduation. This course is subject to change or revision at any time according to the individual needs of the pupil. The time required to complete the course depends on the aptitude and perseverance of the pupil. Upon entering the school, students will be placed as far along in the course as possible and will be advanced as rapidly as is consistent with thorough work.

Grades I-II. Kohler, Op. 190, 151. Loeschhorn, Op. 65. Finger Exercises, Scales and Arpeggios. Loeschhorn, Op. 66. Duvernoy, Op. 120. Bertini, Op. 100. Heller, Op. 47.

Grade III. Czerny, Op. 299. Heller, Op. 45, 46. Bach, Short Preludes and Fugues. Krause, Trill Studies. Low, Octave Studies.

Grade IV. Czerny, Op. 740. Schmitt, Op. 16. Cramer, 50 Studies. Kullak, Octaves. Heller, Op. 16. Loeschhorn, Op. 67. Bach, 2 and 3 Part Inventions.

Grade V. Czerny, Op. 337. Clementi Gradus. Moscheles, Op. 70. Haberbier, Op. 53. Bach, Well Tempered Clavichord.

Grade VI. Czerny, Op. 365. Tausiz, Daily Exercises. Chopin, Op. 10, 25. Henselt, Op. 2. Difficult Etudes of Various Kinds.

Compositions suitable to the various grades are given as frequently as is expedient, both for study and recreation.

The other courses are equally complete and thorough and are in the hands of the highest grade instructors.

The School of Music is well equipped with grand and upright pianos, so that students may arrange for practice periods in the building at a small rental.

For full information address F. S. Mendenhall, Dean.

The University registration fee of \$2.00 per semester will be required of each student.

School of Oratory

FLETCHER HOMAN, A. M., S. T. B., D. D., *President.*

SARA BROWN SAVAGE, O. M., *Dean.*

It is the design of this department to develop natural orators, not artificial ones.

Courses of Instruction

ACADEMY EXPRESSION.

First semester. Articulation, inflection, quality of tone, pitch, force, tune, volume, modulation, power, brilliancy and abandonment in reading, elementary gesture.

Second Semester. Rhythm, music and imagination in rendering, personality in rendering, relations of values and taste, recitations and declamations with individual criticism.

COLLEGE ORATORY.

Rendering; critical study of English poetry, the great English and American orators, and of Shakespeare's dramas; recitations and original orations; bearing, platform deportment and personal control; the speaker's relation to his audience; extemporaneous speaking; Bible and hymn reading. Two hours.

EVOLUTION OF EXPRESSION.

Fundamental work for the personal development of the student. The evolution of the art of expression by (1) arousing interest in the subject; (2) retaining and strengthening interest; (3) determination to make others appreciate it; (4) a clear presentation of the subject. Attention to the forms of emphasis, force, pitch, volume and time. Platform deportment and elementary gesture. Careful preparation and individual drill upon selections from the best literature in both prose and poetry, as well as great orations and essays. Three hours.

PHYSICAL AND VOICE CULTURE.

Psycho-physical culture exercises for freeing the body, developing muscular sense, and securing poise, unity, harmony and responsiveness. Responsive work. Gesture chart for the direction and guidance of the student in interpretation. Study of hygienic and aesthetic

value of exercises. Exercises for correct placing and free production of tone, for developing resonance, sustained power, flexibility, and radiation. Relation of breathing to tone production. Character and realms in tone. Normal work. Two hours.

PHILOSOPHY OF EXPRESSION.

Advanced work in rendering, pantomime. Emerson and Delsarte philosophy and criterions of expression. Practical analysis; responsive drill for voice and body. Correction of defects and mannerisms in bodily expression; translation of gesture at sight; study of emotion in its effect upon voice and gesture. Platform art; character delineations; arrangement of programs; choice, abridgement and adaption of selections for public reading; writing of introductions; dramatization of short stories. Interpretive study of Hamlet and Macbeth. Three hours.

COURSE FOR GRADUATION IN EXPRESSION.

Three years of class-work in Physical and Voice Culture and Expression. Five to nine hours per week.

Private lessons, two forty-minute lessons per week.

The English Composition of first year, Rhetoric and Literature of second year, Literature of third year, Literature of Freshman year, and Literature of Sophomore year.

The General History of the first year.

Repertoire material for one evening program. Practice recitals.

Normal work.

This outline covers the work for the entire three years.

RECITALS.

Several recitals are given during the year. These recitals are a part of the required work of the school and are designed to give students frequent opportunity to come before an audience.

TUITION.

The tuition for class-work is \$18.00 per semester for ten to twelve hours; \$13.00 per semester for seven to nine hours; \$10 per semester for five to six hours. The tuition for private lessons is \$13.50 for eighteen one-half-hour lessons; \$18.00 for eighteen 40-minute lessons.

The University registration fee of \$2.00 per semester will be required of each student.

Those who contemplate entering the school are requested to write early, giving a description of past education, purpose in taking up the work, etc. Address, Sara Brown Savage, O. M., Dean of the School of Oratory, Salem, Oregon.

School of Theology

FLETCHER HOMAN, A. M., S. T. B., D. D., *President.*

HENRY D. KIMBALL, D. D., L. L. D., *Dean.*

The aim of this school is to assist young men who seem to themselves and to the Church to be called of God to the Christian ministry to qualify themselves spiritually and intellectually for their great work. Young men who intend to enter the ministry, and such as have entered it without needed equipment, are strongly urged to avail themselves of the advantages here offered.

COURSES OF STUDY.

The Dean is ably supported in the work of the school by thoroughly qualified instructors. Three parallel courses of study are offered, the Greek-Hebrew, the Greek-English, and the English-Philosophical, providing for the study of the scriptures in the original by those qualified to do so with profit, enabling others to study the scriptures in English, while at the same time opening to all students the other fields of theological study.

The English-Philosophical course will include instruction in English Literature and Rhetoric, together with a larger proportion of philosophical studies instead of the Greek and Hebrew of the other courses.

Exegetical instruction in the German Bible will be given to German students by Professor Cramer of the College of Liberal Arts.

A TRAINING COURSE FOR LAY WORKERS.

For young people of either sex who, while not contemplating the work of the ministry, desire to fit themselves for larger usefulness in Christian work, a Training Course for Lay Workers has been provided.

TERMS OF ADMISSION.

The Degree Course is open only to such as have taken the degree of B. A., or its equivalent, in some College of Liberal Arts. Such students on completing the required course and passing examination will receive the degree of Bachelor of Divinity.

Those whose preparation is more limited, but embraces at least the fundamentals of an English education, may be admitted and, on completing the full course and passing satisfactory examinations, will receive the Diploma of the School.

TUITION AND FEES.

A tuition fee of \$11.25 will be required each semester.

The University registration fee of \$2.00 per semester will be required of each student.

For catalogue, address Henry D. Kimball, D. D., Dean.

School of Medicine

FLETCHER HOMAN, A. M., S. T. B., D. D., *President.*

W. H. BYRD, M. D., *Dean.*

The Medical School of Willamette University is the oldest continuous Medical School west of the Mississippi River. The school is located at Salem, the Capital City of Oregon, one of the most beautiful and healthful cities in the Pacific Northwest, situated upon the east bank of the Willamette River. It is the second city of size in Oregon, having a population of 15,000 inhabitants. Salem being the Capital of the state, students attending college here will come in contact with some of the most prominent and brainy men of the state, and be surrounded by an atmosphere of culture and intellectual refinement. In the State Library will be found complete works upon the practice of medicine, as well as other books of reference, to which all students will have access free of charge.

CLINICAL FACILITIES.

The members of the faculty, bearing in mind the importance of clinical instruction, devote the utmost attention to this aspect of teaching. Abundant opportunities are offered the student, not, as so frequently happens, simply to see, but to examine patients, make diagnosis and suggest treatment. Besides the regular clinics held at the hospitals, students are invited, whenever practicable, to see cases of interest in private practice, and to witness and assist in private operations. Students are also allowed the privilege of attending clinics at the State Hospital for Insane as well as the State Penitentiary, both of which are located near the School.

PHARMACY.

The Pharmacy department has been affiliated with the Medical School. The courses have been greatly strengthened and made to conform with those offered by the best eastern institutions. A three months' course is offered to those who wish to review, preparatory to taking the State Board examination. For a description of courses and a statement of expenses, address C. O. Boyer.

The University registration fee of \$4.00 per year will be required of each student.

For Medical Catalogue, address Dr. W. H. Byrd, Dean.

School of Law

FLETCHER HOMAN, A. M., S. T. B., D. D., *President.*

C. L. McNARY, LL. B., *Dean.*

This department of the University offers a two years' course leading to the degree of Bachelor of Laws, and arranged to meet the requirements of the Oregon bar examinations. The advantage to the student of attendance upon a law school in preference to less systematic study in an office, is recognized in the rules of the Supreme Court, which require three years previous study of all who apply for admission to the bar without first obtaining a college degree. It is the object of this department, while giving thorough instruction in the abstract principles of law, to add such practical details as to prepare the student to commence his work as an attorney without embarrassment.

INCIDENTAL ADVANTAGES.

Salem is an ideal place for the student of law. He has the advantage of access to the State Law Library, which is believed to be unexcelled by any law school library in the United States. It is also of superior advantage to the students that the Judges of the Supreme Court are lecturers in the School of Law. In addition to the regular session of the Circuit and County Courts, the Supreme Court of Oregon is in constant session and open to the attendance of the student. Here also once in his two years' course he has the opportunity of observing the State Legislature in session. The students conduct a practice court, which is of much benefit. The students of this school have the opportunities of engaging in the inter-university contests, both athletic and intellectual. They are able to register in the College of Liberal Arts for such supplementary work as they need in that department at special tuition rates. The social advantage of membership in the University is well worth attention.

TUITION AND FEES.

A diploma fee of \$5.00 is charged at graduation.

The University registration fee of \$4.00 per year will be required of each student.

For information address C. L. McNary, Dean.

Oregon Institute

THE ACADEMY.

In addition to a complete College of Liberal Arts Willamette University maintains a first-class Academy.

Owing to its connection with the College, the Academy is pervaded by high ideals of character and of scholarship, and younger students are stimulated and often personally helped in their work by contact with the students of the College classes. This intercourse with College students and College instructors is in many ways itself a liberal education.

The aim of the Academy is first of all to fit young people for our College of Liberal Arts or for any college or university.

The Academy also offers to persons who do not expect to take a college course an opportunity to acquire a thorough fundamental knowledge of Algebra, Geometry, Latin, French, German, Greek, English, General History, Elementary Physics, Biology, and Chemistry.

REQUIREMENTS FOR GRADUATION.

The work of the Academy will cover four years. Students entering the Academy will be expected to arrange their work according to the requirements and upon the successful completion of the Academy course and 120 semester hours in the College of Liberal Arts will receive a degree.

The Academy offers students of the smaller high schools an excellent opportunity to complete a first-class four year course and to receive a diploma of the Academy. Fifteen units or one hundred and fifty semester hours are required for graduation. A unit is earned by carrying a subject five times a week for one year.

EXPENSES.

Tuition, per semester, \$17.50. An incidental fee of \$5.00 each semester will be charged each regular Academy student. Laboratory fees, per study, per semester, \$2.50. Students in Chemistry also make a breakage deposit of \$5.00 on registration. Diploma, \$2.50.

Two dollars each semester of the incidental fee of the Academy students will be used for the support of athletics and other student affairs under the direction of the Board of Trustees. The University registration fee of \$2.00 per semester will be required of all other students taking special work.

Course of Study

(Stated in semester hours, one-half being taken each semester.)

First Year.	Latin or Greek (Note 1).....	10
	English and English Literature.....	10
	Algebra	10
	Physical Geography and Physiology.....	6
Second Year.	Latin or Greek (Note 1)	10
	Rhetoric and English Literature.....	10
	Geometry	10
	Zoology and Botany.....	8
Third Year.	Latin, Greek or German (Note 2).....	8 or 10
	American Literature	6
	Algebra and Geometry	6
	American History and Civics.....	6
	Chemistry	6
	Expression	4
Fourth Year.	Latin, Greek or German (Note 2).....	10 or 8
	English Literature	6
	History of Greece and Rome.....	6
	Physics	10
	Language or Advanced Algebra (Note 3).....	8

Note 1.—Those preparing for the Language and Literature Group in the College must take Latin, while those preparing for the Philosophical Group may take Greek, and those preparing for the Scientific Group should take Latin.

Note 2.—Those preparing for the Language and Literature Group must take Latin or Greek, while those preparing for the Scientific Group should take German, any of the three being open to those preparing for the Philosophical Group.

Note 3.—Those preparing for the Scientific Group must take Advanced Algebra.

Description of Courses

GREEK.

EDWIN SHERWOOD, *Professor.*

1-2. Beginning Greek, with selections from Xenophon's *Anabasis*. Five hours.

3-4. Four Books of Xenophon's *Anabasis* completed, with Prose Composition. Homer's *Iliad*, Books I-III. Five hours.

LATIN.

MARY P. BARNETT, *Professor.*

1-2. *Beginning Latin.* Inflections and the elements of Latin syntax. Five hours.

3-4. First four books of Caesar's Gallic War, with Prose Composition. Five hours.

5-6. *Cicero.* Six Orations, with Prose Composition. Four hours.

7-8. *Vergil's Aeneid.* Books I-VI. Prose, constructions peculiar to the poets, the more common rhetorical figures, the literary value of the poem and mythology. Three hours. Prose Composition. Throughout the year.

GERMAN AND FRENCH.

WILLIAM J. KELLER, *Professor.*

GERMAN.

1. *Elementary Course.* Joynes-Meissner's German Grammar with oral and written exercises. Reading of at least 100 pages of graduated texts. Memorizing of choice poems. Five hours, throughout the year.

2. *Intermediate Course.* Advanced Grammar with corresponding composition and oral exercises. Reading of about 400 pages of intermediate texts in prose and verse. Memorizing of selections from text read. Four hours, throughout the year.

3. *Advanced Course.* German Syntax. Reading from Classical authors as well as from representative historians and scientists. Oral reports in German and written summaries in German of texts read. Three hours, throughout the year.

FRENCH.

1. *Elementary Course.* Fraser and Squair's French Grammar, Part I, with copious oral practice and written exercises. Special verb drill. Reading of at least 100 pages of modern prose. Memorizing of selections. Five hours, throughout the year.

2. *Advanced French.* Fraser and Squair's Grammar, Part II, with composition and oral practice. Reading of about 400 pages of representative texts. Memorizing of selections. Four hours, throughout the year.

ENGLISH LANGUAGE AND LITERATURE.

WILLIAM E. KIRK, *Professor.*

GRACE HARRIS KELLER, *Assistant.*

1. Study of the elementary principles of Rhetoric, and practice in English Composition. The following books are used for class study

and composition work: Herrick and Damon's *Composition and Rhetoric*, Irving's *Sketch Book*, Whittier's *Snow-Bound*, Goldsmith's *Deserted Village*, Scott's *Lady of the Lake*, and Shakespeare's *As You Like It*. For supplementary reading: Bunyan's *Pilgrim's Progress*, Scott's *Ivanhoe*, and Dickens' *Christmas Carol*. Five hours, both semesters.

2. Studies in the elements of literature and composition. Critical study of Tennyson's *Idylls of the King*, Hawthorne's *House of Seven Gables*, Poe's *Poems*, Shakespeare's *Merchant of Venice*, Coleridge's *Ancient Mariner*, and Macaulay's *Lays of Ancient Rome*. For supplementary reading: Dickens' *David Copperfield*, and Eliot's *Silas Marner*. Five hours, both semesters.

3. Special attention given to American literature. Classics studied: Lowell's *Vision of Sir Launfal*, Washington's *Farewell Address* and Webster's *First Bunker Hill Oration*, Longfellow's *Courtship of Miles Standish*, Schurz' *Abraham Lincoln*, and Shakespeare's *Julius Caesar*. Supplementary reading: Hawthorne's *Twice-Told Tales*, Franklin's *Autobiography*, and Holmes' *Autocrat of the Breakfast Table*. Three hours, both semesters.

4. *English Literature*. For class study Chaucer's *Prologue to Canterbury Tales*, and *Knight's Tale*, Spencer's *Faerie Queene*, Book I, Early English Ballads, Shakespeare's *Macbeth*, Milton's *Minor Poems*, Palgrave's *Golden Treasury*, Wordsworth, Keats and Shelley, Selections from Browning, and Arnold's *Sohrab and Rustum*. Three hours, both semesters.

MATHEMATICS.

JAMES T. MATTHEWS, *Professor*.

1. *Beginning Algebra*. For beginners. A thorough drill is given in all the elementary processes, and an introduction to quadratics. Texts: *Algebra for Secondary Schools*, Wells. Five hours, throughout the year.

2. *Plane Geometry*. About one-third of the time is spent on the demonstrations in the text; the remainder of the time is devoted to originals. Text: *New Plane Geometry*, Wentworth. Five hours, throughout the year.

3. *Algebra*. A continuation of Course 1. Beginning with quadratics, the work will consist of selected topics from the last half of Wells' *Algebra for Secondary Schools*. Three hours, first semester.

4. *Solid Geometry*. Special emphasis is laid upon the practical numerical exercises. Text: *Solid Geometry*, Wentworth. Three hours, second semester.

5. *Advanced Algebra*. This course is pursued in connection with a stiff and thorough text, and includes such topics as the binomial

theorem, logarithms, graphs, choice, change, series, complex numbers, and the theory of equations. Four hours, throughout the year.

This course may be taken instead of Course I to meet the six hours prescribed Mathematics in College, provided the full fifteen units required for admission are met without it.

HISTORY.

GAYLORD H. PATTERSON, *Professor.*

G. J. SWEETLAND, *Assistant.*

1. American History and Civil Government. Three hours, third year.

2. History of Greece and Rome, with due reference to the life, literature and government of each. Special attention is given to methods of study, consulting the library, etc. Three hours, fourth year.

BIOLOGY.

M. E. PECK, *Professor.*

1. *Physiology.* This is an elementary course in human physiology and hygiene, taught by text with occasional demonstrations. Three hours, second semester.

2. *Botany.* It is the purpose of this course to present, concisely and briefly, the fundamental principles of general botany, including the physiology, morphology, gross anatomy, etc., of flowering plants. Three recitations and two hours of laboratory work, with occasional field study, one semester.

3. *Zoology.* A brief study of representative invertebrate and vertebrate types, mainly from the standpoint of physiology and biology. Three recitations and two hours of laboratory work, one semester.

Physiography. An introduction to Physical Geography. Three hours, first semester.

CHEMISTRY AND PHYSICS.

F. VON ESCHEN, *Professor.*

1. *Elementary Physics.* In this course the general subject of Physics is presented in a simple, yet scientific way. Many experiments are given to elucidate principles. Problems are given to fix laws and to make the study practical. Text, Millikan and Gale. A thorough knowledge of Arithmetic and Elementary Algebra is required and a knowledge of Plane Geometry is desirable. For fourth year Academy. A laboratory fee of \$2.50 per semester is required. Recitations and laboratory work throughout the year. Five hours.

2. *Elementary Chemistry.* The subject of Chemistry continues throughout the year, and includes all the general principles theoretical and practical of inorganic chemistry, such as given in McPherson and Henderson, *Elementary Study of Chemistry*. Recitations and individual laboratory work occupy not fewer than five hours per week. A special effort is made throughout to develop the scientific habit of thought and to lead the student to observe the chemical changes constantly taking place. In the laboratory each student is furnished with a desk and all necessary reagents and apparatus, and is required to keep a complete record of the work done during the year. A laboratory fee of \$2.50 per semester, and an additional deposit of \$5.00 is required. The loss by damage or destruction of apparatus will be deducted from the deposit of \$5.00, and the balance refunded at the close of the semester. For third year Academy students. Three hours, throughout the year.

ACADEMY EXPRESSION.

SARA BROWN SAVAGE, *Professor.*

First Semester. Fundamental work for personal development, articulation, inflection, quality of tone, pitch, force, tune, volume, modulation, power, brilliancy and abandonment in reading, elementary gesture. Two hours.

Second Semester. Rhythm, music and imagination in rendering, personality in rendering, relations of values and taste, recitations and declamations with individual criticism. Two hours.

Degrees Conferred

1909

Annual Commencement

BACHELOR OF ARTS.

Anderson, Ellen Joy	Glover, Mabel Clarissa
Booth, Edith Elizabeth	Kuney, Edith Carter
Eakin, Robert S.	Oliver, George Oscar
Emmel, Mary Elizabeth	Schmidt, William Anton
Fields, D. Lester	Shanks, Murray D.
Gatch, Orytha Helen	Smith, Elva Mae
Gittins, Mary	Unruh, Glenn Earnest

BACHELOR OF SCIENCE.

Jones, Harry Edmund	Nelson, Clyde Vincent
