

# A SCENE

# Place to Play Opens Soon; Dedication Set May 11

"I knew it would be nice, but this is fantastic!" exclaims an impressed visitor as he gazes into the large field house portion of Willamette's new Lestle Sparks Physical Education & Recreation Center.

The other sections of this brightly colored 72,000 square foot "playground" are equally impressive, ranging through the sparkling natatorium, maple-floored gymnasium, padded multi-purpose room and handball courts, for instance. The Edwin and June Cone Field House,

The Edwin and June Cone Field House, at 150° by 120° with a 30° ceiling and seating for 3,000, should become a major spectator and convention arena in Salem as well as a multi-faceted play area. With bleachers retracted, three tennis courts are operational, one of which also serves as the main basketball court. Large nets for baseball hitting, padded cushions for high jump practice, goals for team handball practice, a trampoline, and other paraphernalia along the sidelines are indicative of the versatility of this Uni-Turf floored facility.

A few strides down a ramp to the main foyer allows a viewer to watch activity in the 6-lane, 25-yard swimming pool on the lower level. Further strides along a corridor places one between four handball courts (two of which will be operational to start) and the 120' by 130' gymnasium. The gym, named in honor of former football letterman Chester Henkle ('04), is a major play and instruction area with no seating. It has room for two full-size basketball courts and several volleyball and badminton courts. It will be the practice area for gymnastics, fencing, modern and folk dancing as well The multi-purpose room (wrestling, floor exercise, judo and self-defense), is also on the main level.

The public is invited to attend dedication ceremonies of Sparks Center at 11 a.m. May 11. Tours to follow.

# Sparks **Center:**

### "I knew it would be nice, but this is fantastic."

### Continued from Page I

The lower level has entrances to the handball courts and access to the exercise room (conditioning, fitness and weighttraining), and locker area with saunas for men and women.

Staff offices are on the upper level and in area that overlooks the foyer and near the Alida Gale Curry theatre-classroom which seats 80.

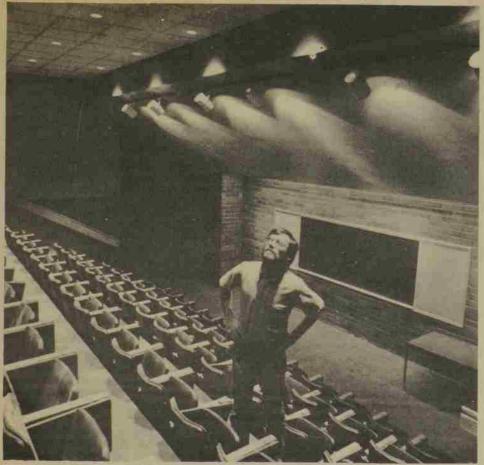

Dedication day with public tours through the facility is May 11 (11 a.m.) in conjunction with the University's Alumni Day observance. Alumnus Les Sparks '19, for whom the facility is named—in honor of 55 years of association with Willamette as 55 years of association with Willamette as a student, teacher and coach-will be feted at a Bearcat Comeback for former Willamette athletes that day at noon.

Alumni will have a chance to try out the new facilities in a unique and fun-filled "Alumathon" of 10 events starting at 2:15. None of the events require cardio-vascular stress and even Sparks at age 76 is a likely competitor.

Sparks was around when Willamette's present gymnasium was dedicated, a 30,000 square foot building constructed in 1923 at a cost of \$80,000. The old gym will get a new name and some minor inside alterations to accommodate the theatre activities and some basement laboratories for the art department by next fall.

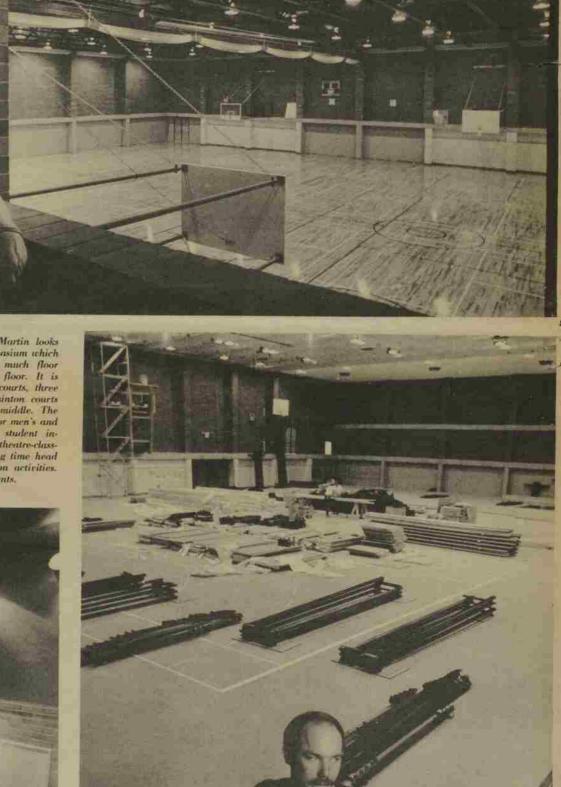

Construction of Sparks Center has taken 21 months after the project received the initial green light in October, 1969. Groundbreaking was on July 28, 1972 after a total cost of \$2.6 million was projected. Of that total, \$2,232,000 has been given or pledged to date.

BUILDING INSPECTOR Frank Martin looks out over the Chester Henkle gymnasium which has alone more than twice as much floor space as Willamette's old gym floor. It is marked for two full basketball courts, three volleyball courts and eight badminton courts with a portable divider in the middle. The gym will be the main play area for men's and women's intramurals. Below, a student in-spects the Alida Gale Currey theatre-class-room, named in honor of the long time head of the women's physical education activities. The classroom will sent 80 students. out over the Chester Henkle gymnasium which

WORKMEN are basy putting up bleachers in the Ed and June Cone Field House. When finished by May 8, the bleachers will have a seating capacity of 3,000 with padded backs. A Uni-Turf floor covering will handle the variety of activities planned for the field house, ranging from tennis to conventions. It will be the main basketball pavilion.

### **By PATRICK PINE '74**

Career education emphasis is having its impact on internships at Willamette University and elsewhere. Internships are temporary student positions with off campus private and public institutions providing work experience to augment classroom studies.

I have enjoyed the benefits from three internships, but in the process I have become somewhat alarmed at what could develop into a counterproductive glut of from junior high to graduate study seeking work experience for students, the ability of "living laboratories" to respond becomes a major problem.

My experiences include research for the Salem City Manager (Spring, 1972); research for State Senator Wallace P. Carson Jr. during the 1973 legislature; and currently research and consultant studies for the Capitol Planning Commission of the State of Oregon.

As one of the fortunate few to have three different internships, I've drawn some conclusions. My experiences are limited to the social sciences and I speak only to that are of liberal arts.

WU majors in Urban and Regional Government are required to complete one intern experience and take others optionally. Professors Ed Stillings and Sue Leeson supervise these interns. The purpose is to give the student a basis for relating practical reality to classroom theory; testing the viability of a student's interest in government; providing relatively cost-free assistance to government; enhancing university community relations; and discovering one's

own strengths and weaknesses. Interns in this program and political science are classified in terms of the type of experience they gain - administrative, legislative, state, local and/or variations of

these. Some relate solely to urban government, others to political science and other social sciences.

### The benefits to interns

What have been the personal advantages of my intern experience? Broadly speaking, they include: improved writing skills, better research methods, the ability to cope with pressures of time and most important, the discovery of a specific field of interest for future employment.

In the Salem City Manager's Office, I learned how public officials relate to the public, how many (oh! how many!) hours above and behond the eight-to-five routine

must be devoted to one's job, and how one Oregon State University, Chemeketa Community College and Salem junior and senior high schools initiated programs to place interns with legislators. This is understandable and shows that Willamette is not the only school deserving such privileges concise and accurate manner. The project

Yet this influx creates problems. As Carson notes, the legislator is now in the position of handling either-too many interns or not enough students with the ability to work independently. The quality of intern programs varies greatly and supervision by school officials tends to be erratic. Willamette students are fortunately required to study materials on the legislative process, take tests on these materials as well as current affairs, and to report regularly on their progress. This is not the case for some programs and the lack of supervision by school officials places a burden of supervisory tasks on already overburdened legislators. One senator reported anonymously that he had eight interns during the 1973 session and stated confidentially, "Most of those kids weren't worth a damn, we had them staple and punch holes, but if I turned down one request for an intern position, I'd run the risk of alienating a faction of my constituency . . I haven't got the time to babysit.'

### e the image

This implies, unfortunately, that most high schools and especially junior high schools may be hurting the image of interns and that the poor intern program not only turns off the employer, but is disillusioning to the student who finds himself stapling pages day after day. Research positions should be strictly limited to upper division undergraduates and graduate students.

Particularly problematic is the legislature which has a kind of glamor that attracts many interns, gualified and unqualified. Intern programs should recognize that 'glamor" jobs may not really be so glamorous after all and should stress quality, not quantity. The reverse is happening and the result is disastrous

The Capitol Planning Commission for the State of Oregon concerns itself with planning for the Capitol Mall area directly to the north of Willamette's campus. Research for the future is difficult and is teaching me the value of concise writing and acquaints me with the myriad of state agencies. I am learning that communication between governmental bodies is lacking and probably always will present a problem. This experience will hopefully provide me with a job after graduation.

The following suggestions should be helpful in summing up my feelings about career education programs:

1. Supervisors of intern programs must furnish well-informed, well-qualified students.

2. Do not overburden the employer with too many bodies, not enough brains.

3. The employer must provide meaningful experiences to the intern which require time and positive attitudes - at the risk of saying no to many requests for intern positions.

4. The intern must not take a position merely to escape the classroom and must evaluate the ability to fulfill duties and work independently

The ideal of moving the student out of the classroom into the Teal World be possible when the student is ready for the "real world" already. If not, failure reflects on all interns and will make the later transition to permanent employment. even more frightening to the student who has failed once before

(Ed. note: A new policy statement setting up certain standards and requirements for three types of internships insight, major program and professional
 was recently adopted by the Willamette faculty. The internships from all areas of the University will also come under the jurisdiction of an intern coordinator who is responsible for seeing that the standards are maintained).

# Just **Survival?** Or . . .

Just survival or survival with significance? In a sense, this served as the focus for a special Committee for Institutional Change which deliberated from October to February before issuing a report that rings with survival and significance for Willemette University in the years ahead.

The Committee report, which follows, serves as a starting point for Willamette's response to the "doom and gloom' predictions linked more and more frequently to higher education particularly the small private schools.

"Significant," "traumatic," "challenging," and "overdue," are some of the one word labels attached to the report, but to committee vice chairman Russ Beaton, Associate Professor of Economics and Willamette alumnus ('60), it says "get

busy." "We hope it stimulates individual thinking and perhaps some changes in attitude," Beaton elaborates. "We haven't changed anything yet, but our findings and recommendations communicate a sense of urgency concerning the need for change as well as the need for enthusiasm toward a common purpose.

In outlining his charge to the committee on Oct. 15, President Robert Lisensky said its study must be concerned not only with the financial and physical resources of the institution. "It must look more especially at the quality of personal interaction between the members of the University community the development of an environment that enhances the quality of life in all its aspects and provides optimal conditions for the learning process."

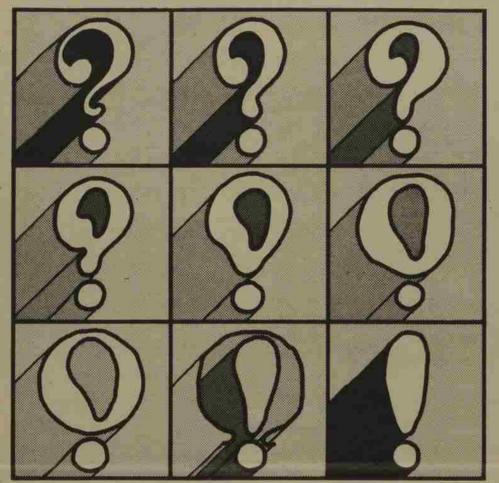

Under the chairmanship of Milo Harris, Vice President for Planning and Finance, the committee of seven faculty members, two students and two administrators went to work. It examined current trends in higher education and projected the external environment in which Willamette will probably operate in the future. Following an analysis of the educational opportunities at Willamette and an assessment of the University's ability to respond to the changing external environment, the committee recommended the following action to the President:

- 1. Creation of three task forces to generate proposals on subjects of vital, immediate concern to the University;
- Appointment of a committee on University governance; 3. Attention to "other areas of concern"
- as task forces complete their assignments; and
- 4. Adoption of the proposed organizational structure for the task forces and procedures for implementing task force proposals.

The committee told Dr. Lisensky "We further hope the report will generate a dynamic environment in which somber financial warnings about the future will be met with creative enthusiasm for finding solutions to old and new problems. In order to contend successfully with economic constraints, we must be creative in our efforts to provide sound, flexible educational opportunities at minimum conts."

Dr. Lisensky termed the report "an outstanding document which represents an amazing sense of unity and dedication.' He has taken the action recommended by

the committee and the Willamette Scene will be reporting periodically on progress of the task forces and their proposals. RCW

# **Survival with Significance!**

A Committee for Institutional Change responds to "doom and gloom" predictions and outlines the steps needed to enhance Willamette's Educational opportunities in the face of alarming trends.

### WARNING SIGNALS

- Skyrocketing operating costs. Declining birthrates nationally. "Drying up" of financial resources, both public and private. Dissatisfaction with a lack of diversity in
- small colleges and universities 5. Decreasing enrollments in
- undergraduate programs, and the potential impact on professional schools. 6. Current student demand for vocational-
- technical training. 7. Growing two-year options at community
- colleges 8. Diminishing importance placed on a
- college degree.
- Intense competition among private
- colleges for students.

Committee for Institutional Change has found in examining Willamette's external environment and are documented in materials collected by the Committee. We set them forth boldly as Nine Warning Signals to draw the attention of the University community to our current predicament. These Warning Signals do not apply uniformly to each college and program at Willamette at present but they must be heeded by the entire University because of a fundamental interdependence of programs within the institution. Human beings tend to postpone difficult decisions and to put off planning until a crisis hits - until it is too late. This is precisely the situation we must avoid as a University if we are to survive and

meet the needs of higher education in the future.

### THE WILLAMETTE SITUATION.

A Capsule Summary In the first document formally approved by the Committee, drafted after review of considerable data concerning enrollment, population, job market and educational trends, the Committee concluded that ". , the traditional operating procedures and assumptions of a school like Willamette will be seriously challenged." What does that statement mean? Related to the Warning Signals, it means this:

As birthrates decline, and fewer people of traditional college age choose to attend college or opt for vocational training, it is increasingly difficult to maintain our order to attract and retain students we must offer programs and project an image which permit us to compete favorably with other private - and even public - schools which also are battling to survive in this environment. Costs will continue to rise but tuition cannot rise indefinitely or we will price ourselves out of the market. Neither can we rely to the extent we previously have on the resources of the Board of Trustees and a few other generous donors.

Just where the money will come from is not clear. As a minimum we must improve our effectiveness - as instructors, as administrators, as decision-makers. We must pay more attention to modes of inquiry in

meeting our educational mission. We must concentrate on relationships among undergraduate and graduate programs with the goal of mutual enrichment and reinforcement. We must develop ways to attract a wider variety of students. We need to make our services available at more convenient times and places. We must gather more accurate information about educational needs of our students. We must re-evaluate the University's commitment to prescribed standards of conduct. We need to streamline the decision-making processes of the University. We must make more effective use of the physical plant and find ways to take Willamette to the community

In the face of dismal projections and the sounding of Warning Signals, however, the Committee endorses Willamette's commitment to the liberal arts and to professional and graduate programs which build on a liberal arts education. Liberal arts goes considerably beyond any specific program. By liberal arts we refer to an attitude or approach to learning which builders and which involves a respect for ideas and cultures, and the goal of intelligent, sensitive insight into the human situation. We believe it is through liberal arts education that questions of the future, involving moral judgment, social and technical complexity, creative leisure and personal abilities to adjust to rapid change, can be addressed most adequately. The framework for dealing with such questions traditionally is developed through liberal arts undergraduate programs. The development of professional expertise through graduate training presupposes the values implicit in the liberal arts framework. Thus the Committee sees a continuing and indissoluble link among the colleges and programs at the University.

We recommend that the University's programs be given a new look: made more available, more flexible, more attractive, more contemporary. There is a continuing and urgent need for an educational institution which emphasizes the liberal arts both for its own sake and for its creative, sensitive application through professional educational willamette to re-evaluate, modernize, streamline, broaden and economize in undertaking this educational mission if we are to survive and meet challenges of the future.

### TASK FORCE RECOMMENDATIONS

There is no dimension of the University which can or should be free of re-examination, but we cannot deal with all aspects at once. The Committee has isolated three areas of immediate, critical importance and recommends that task forces be organized to consider them. Some areas of additional concern are identified at the end of this report. These should be taken up as time permits and as we as a University are persuaded that the areas of prime concern have been resolved.

### I: Modes of Inquiry

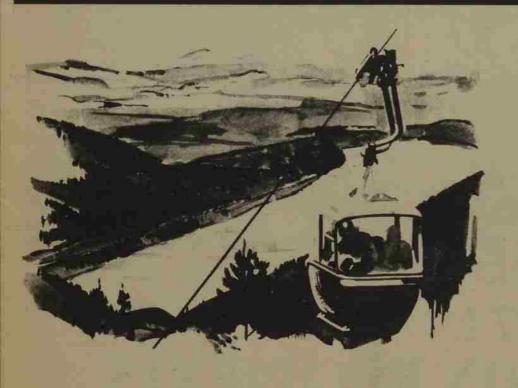

Concerned with giving alternative forms to the traditional concept of liberal arts and its adaptability to a more diverse student body. This task force will focus on such matters as formal educational programs, student and faculty exchanges and consortia, degree alternatives, continuing and community education, and more opportunities for work and intern experiences as part of the academic program.

II: Inter-College Relationships Concerned with fostering closer intellectual and co-curricular ties among the four colleges of the University. The task force will examine ways to enrich each college's programs and to develop programs to encourage greater community involvement.

III: Designs for Time and Space Concerned with examining how our use of time and space can better serve the University and the community through more flexible scheduling, more effective blocks of time for learning, more comfortable and attractive living and learning spaces, and easier access to Willamette by the community at large.

# TAKE FIVE IN The Wallowa Mountains

and you will have a backpacking vacation you'll long remember.

Five carefree days—Aug. 11-15—are yours to enjoy the splendor and wildlife of this beautiful area of Northeastern Oregon which has been compared to the Swiss Alps and High Sierras. Hike, fish, swim, camp, relax, and learn from tour leaders Don Breakey '50 and Don Baldwin. Dr. Breakey is chairman of the Willamette biology department and noted wildlife expert; Baldwin is the District Conservationist for the U.S. Soil Conversation Service at Enterprise.

The two Dons will escourt 20 backpackers six miles up along the Lostine River to the base camp at Minam Lake. Packhorses will carry up the food and equipment, but you'll have to travel light enough to carry your own gear out (light tent, sleeping bag, eating utensils, etc.).

Short hikes to nearby lakes, streams and wilderness areas within a day of the base camp will be the daily fare, with plenty of time to scout birds and wildlife. A gondola ride up the Mt. Howard tramway is included in the excursions.

The encouragement to travel light extends to the wallet. The five days of splendor, including all meals, packhorse trip in, and gondola ride is offered through the Alumni Association Continuing Education program for just \$40 per person. Registration is limited to the first 20 to get \$10 deposits in to the Alumni Office. (Deadline July 1.) Total payment is due Aug. 1. Backpackers must be 16 years of age or older.

Don't miss out . . . send in your deposit today (checks University) to Alumni Office, Willamette University, Salem, OR 97301. Phone (503) 370-6356.

# 1974 ALUMNI CITATION RECIPIENTS

### ALUMNI CITATION RECIPIENTS

Five outstanding alumni of Willamette will receive Alumni Citation Awards in the 17th annual presentation ceremony at the banquet of Alumni Day May 11. Following are the brief profiles of recipients honored "for outstanding achievements and services which reflect honor upon Willamette University."

### **BETTY STARR ANDERSON '40**

Services to the community and cultural arts have been almost second nature to Betty Anderson, despite her protest "but I have just lived along doing nothing outstanding." Her neighbors of the greater Salem area would strongly disagree, however, as her leadership talents have been directed toward such organizations as YWCA (six-year member of Board of Directors), YMCA (Committee on Adult Program and Family Life), Yokefellow (West Coast Yokefellow Board), Oregon State Hospital (music therapy volunteer for 10 years), Cub Scouts (den mother for three years), Campfire Girls (Campfire Guardian for eight years and Bluebird leader), Marion-Polk Co. Medical Auxiliary (former President), Salem Mardi Gras Queen (1964), P.E.O. (three-time president locally and present recording secretary for the Oregon State Chapter), YWCA Teen-Mother Program (head tutor), Willamette University (Trustee), Mu Phi Epsilon and D.A.R. memberships, not to mention leadership roles in church. She was twice soloist in the Portland Symphonic Choir presentation of "The Messiah" and has been a frequently called soloist for many other programs. She earned her M.A. degree in counseling in 1968 from the U. of Oregon and is currently a certified counselor and teacher at the secondary level. All of this, plus the raising of four children belie her protest of "doing nothing outstanding.'

### DR. ROBERT F. ANDERSON '38

The other half of the talented Anderson duo, Dr. Robert F. Anderson has a list of service to match that of his attractive wife Betty. A 1943 graduate of the University of Oregon Medical School, Dr. Anderson has been a practicing orthopedic surgeon in Salem ever since completing his internship at the Medical School and Shrine Hospitals in Portland. A member of six medical organizations, he is a past president of both the Marion-Polk Co. Medical Assn. and Salem Hospital Staff. Service to the YMCA has included President of the Board of Directors, President of the Northwest Area Council, member of the National Council and International Committee, and chairman of the marriage clinic for seven years. He has been a director of the Yokefellow Program at the Oregon State Penitentiary for five years and member of the West Coast and National Boards. Salem honored Dr. Anderson as its Junior First Citizen in 1952, and the local and area YMCA organizations have given him Distinguished Service Awards. He served as president of the Willamette Alumni Association in 1956 and has served as a guest lecturer at the College of Law. He has been on the Board of Elders at the First Presbyterian Church, and he shares the credit with Betty for raising four fine children.

### W. HAYES BEALL '32

A life devoted to service in government, education, church, health associations and conservation has appropriately earned Hayes Beall an Alumni Citation for humanitarian service. Following his graduation he earned an M.Div. at the Yale Divinity School before joining the youth staff of the National Board of Education for the Methodist Church. He served as Wesley Foundation director at the University of Oregon from 1936-39 while taking some graduate courses part-time. He was in government service from 1940-48 as the Asst. Chief of the Migratory Labor Camp

Program; senior examiner for the President's Committee on Fair Employment Practice; and Chief of Youth Activities in U.S. Zone of Germany. From 1948-67 he served as Director of Educational Services for the Cooperative League of USA. In 1967 he became Executive Director of the Kidney Foundation of Illinois and in 1970 the West Coast Regional Director of the National Kidney Foundation. He is currently a consultant to the Kidney Foundation and other health associations and editor of the Kidney Foundation newsletter for the 11 Western states. Other consultant work has been directed toward the U.N. Relief and Rehabilitation Admin. 1944-45, and the Peace Corps, 1963-66. Listed in Who's Who in Midwest and West, he has held three national offices: President, National Council of Methodist Youth (1934-37); Chairman of National Council of Student Christian Assns. (YMCA), 1933-35; and President of the National Council of Organizations for Adult Education (1960-61). In Salem, he is a member of the Community Conservations Committee and was elected as a delegate to the Democratic National Convention in 1972.

### DR. J. DAVID BRISTOW '49

Medical research, education and administration have greatly benefitted from the talents of Dr. J. David Bristow. Named professor of medicine at the University of Oregon Medical School in 1970, chairman of the Department of Medicine in 1971, Dr. Bristow now also occupies the Laurence Selling Chair of Medicine. A fellow or member of 13 different medical associations, Dr. Bristow is a frequent contributor to medical journals as attested by his 78 published articles in the fields of cardiac pathophysiology and clinical cardiology. With the exception of two leaves to serve at the University of California Medical School (1961-62) and the Radcliffee Infirmary at Oxford, England (1967-68), Dr. Bristow has been associated with his medical alma mater, the University of Oregon Medical School since

1959. He is on the research committee of the Oregon Heart Association and has been associated in service capacities with the American Heart Assn., National Heart Institute Projects, National Institutes of Health, Oregon Regional Primate Research Center, Western Journal of Medicine, Archives of Internal Medicine, and several other commissions and committees. He has been a great credit to Willamette University and specifically the department of biology.

### **HOWARD R. ENNOR '35**

The rapidly growing peaceful uses of atomic energy around the world are the day-to-day business of Howard R. Ennor, the distinguished director of budget and finance for the International Atomic Energy Agency in Vienna, Austria for the past 13 years. He is responsible for the \$25 million budget of the agency which is maintained by 104 nations to accelerate the peaceful uses of atomic energy. A German major at Willamette, Ennor earned his master's degree in international relations at the University of Chicago with an eye on foreign service. That opportunity didn't come immediately, but following work at the Bonneville Power Administration and while serving as budget director of the U.S. Atomic Energy Commission's Richland, Wash, headquarters he was offered the Vienna post in 1961. His knowledge of German, French, Spanish and some conversational Russian has been helpful in his work with the professional staff of 400 representing 60 of the member countries of the Agency. The Agency is autonomous, but related to the United Nations, particularly the U.N.'s Food and Agriculture Organization. During a recent visit to Salem Ennor said "the progress in worthwhile use of atomic energy has been very rapid." Three research laboratories are maintained in Europe and great effort is taken to safeguard and keep nuclear equipment intended for peaceful use out of military channels. One of Ennor's three children, Gary, is a 1969 Willamette graduate.

Last spring, Willamette alumni were invited to respond to a program development survey to assist the University and the Alumni Association Board of Directors in strengthening ties with all former students. More than 1,300 Alumni returned the questionnaires and the results have been used by the Alumni Association for the preparation of a Master Plan. In addition, appropriate information has also been shared with faculty and administrators.

The information gathered by the questionnaire was most interesting. More than half of the alumni who responded were between 21 and 40, a not too surprising statistic when one remembers that some 60% of the University's living alumni have graduated in the last quarter century. It was particularly pleasing, however, to have nearly 130 respondees from those of retirement age or older.

Of those who reported they were married, nearly two-thirds said that their spouse had not attended Willamette. And, some two-thirds of the respondees indicated present incomes of between \$10,000 and \$30,000.

It is obvious that education is still an important consideration to Willamette alumni. Slightly more than 83% said they had taken additional courses since leaving the University. More than half of these had taken their additional work at a larger public university.

Here are other results from the questionnaire with comments where appropriate on how this relates to the Alumni Association Master Plan:

### UNIVERSITY TIES:

Question: What do you feel strongest tie with Willamet		ur
The University as a whole		(41.7%)
Your department	109	(8.6%)
Your class	307	(24.3%)
Fraternities and sororities .	.141	(11.2%)
Faculty/administration	.113	(8.9%)
Other	66	(5.2%)
Question: Do you feel well- about Willamette?		ned
Very	.138	(10.6%)
Fairly well-informed	677	(51.8%)
Well informed		(29.6%)
Not informed	. 101	(7.7%)
	-	

Question: What is your chief source of information about Willamette?

University publications	1,061	(81.7%)
Friends		(9.2%)
Alumni activities		(2.7%)
Relatives		(2.7%)
Fraternities/sororities		(1.1%)
Others		(2.3%)

The importance of proper communication with all former students is of continual concern to those in the campus University Relations office. Each year publications are evaluated and will continue to be so to be certain that everyone continues to be properly informed about campus activities.

### ALUMNI INVOLVEMENT IN UNIVERSITY AFFAIRS

Question: Do you feel Alumni should donate time and services to Willamette? Yes ...943 (84.6%) No ...156 (14.0%) Question: Should Alumni participate on University committees?

Yes ...742 (79.6%) No. 176 (18.9%) THE ALUMNI ASSOCIATION Question( When did you first become aware of the Alumni Association?

# Alumni Questionnaire Attracts 1,300 Responses

The results have been incorporated into a Master Plan for the Alumni Association. Information and fund raising listed as major objects.

٩s	an	undergraduate	student
	and the second		(56.9%)
At	the tim	e of graduation	(9.0%)
Aft	er grad	fuation	(33.9%)
2	S		

Question: Do you feel a sufficient tie to Willamette through the Alumni Association?

Yes . 638 (52.6%) No . .557 (46.0%) Question: What should be the objectives of the Alumni Association? (Ranked in order of importance) Information; Fund-Raising; Continuing

Education; Student Recruitment; Job Placement and Social.

Question: Have you attended a Willamette Alumni function in the last five years?

Yes 395 (30.9%) No 883 (69.0%)

Geographical Programs Question: Would you participate in Willamette Alumni activities in your geographical area?

Yes ...755 (73.3%) No...274 (26.7%) The respondees generally showed a

perference for social and cultural programs at these geographical Willamette meetings. The Board of Directors has begun an effort to establish Willamette clubs in areas where there are concentrations of alumni. This year, there have been alumni meetings in Albany, Anchorage, Bend, Denver, Eugene, Honolulu, Los Angeles, Medford, Portland, Salem, San Francisco, San Jose and Seattle. In addition to these areas, programs are being planned in the future for San Diego and Washington, D.C. Out of several of this year's meetings, clubs are getting started. And, next year, both the Board and the Alumni Office will be putting a top priority on strengthening the club area of the Alumní program to guarantee continuing Willamette programs in at least these areas. The results of this questionnaire have been coded according to countries and states and can be used in developing geographical alumni programs.

Question: Would you be interested in participating in a study tour with Willamette faculty members as study leaders?

Very interested	94	(7.6%)
Interested	324	(26.1%)
Little interest	.335	(27.0%)
No interest	484	(38.9%)

Question: Would you like to participate in the concentrated study of a timely topic at a one-week Summer Alumni College at Willamette:

Interested	8.5%)
Little interest	2.7%)
	5.9%)
No interest	2.8%)

Study tours and Alumni colleges have proven quite successful at a number of other universities. Response to this year's cooperative study tour with Lewis & Clark College to France and Italy was excellent. Similar programs, on a limited basis, will be offered in the future. In addition, there will be other small group sessions developed like the summer back packing program mentioned elsewhere in this issue of the

### REUNIONS

Scene.

Question: Do you prefer reunions of your class?

Every five years	(31.9%)
Concurrently	(25.4%)
A combination	(29.2%)
Other	(13.4%)

There has been a great deal of confusion over the reunion plan announced several years ago with its emphasis on concurrent reunions of classes in school at the same time. Believing the concurrent reunion idea to be an appealling one and at the same time recognizing the importance of five year reunions for classes, the Alumni Board has adopted a new reunion plan which combines both types of reunions. Henceforth classes wishing five-year reunions will be invited to do so in either the spring or fall of the year. Concurrent reunions will continue to be scheduled in the spring.

### FINANCIAL COMMITMENT

Question: Should Alumni be asked to make financial contributions to the University?

money to	Willamette?

There were many others whoregarded faculty salaries and teachingeffectiveness to be equally as important.

The Alumni Loyalty Fund has been an important source of support to the University over the years and will continue to be so.

### STRENGTHS OF A WILLAMETTE EDUCATION

The most overwhelming response to this question concerned the individual contact with professors. The names of 42 individual members of the faculty were listed by the respondecs, including 16 still active. The liberal arts curriculum and the small classes were also mentioned quite frequently. There were also many people who spoke of their lasting friendship with other students. Altogether, there were 64 different categories of strength indicated in the general areas of faculty, administration, educational program, student life and extracurricular activities and campus facilities.

### WEAKNESSES OF A WILLAMETTE EDUCATION

As one would expect, the strength of being a small school also was reflected in some of the weaknesses. Most often mentioned weakness was the insufficient number and choice of classes offered. Many indicated a concern over the leack of placement services, a fact which the University is presently attempting to correct with the development of its career education program. Many people also mentioned the lack of diversity in the student population as being a weakness.

There were 41 respondees who said they were either too young to appreciate Willamette or had failed to take advantage of the University's strengths while they were here. And, 65 of the respondees did not list any weaknesses.

For those who might like to have them, the Alumni Office will be glad to supply you with the complete results of the entire questionnaire.

The Alumni Office anticipates that there will be many positive results coming from this questionnaire both for the present student body and for the Alumni Association program. To all who took the time to respond to the questionnaire, those of us at the University want to say. "Thank You." LAMETTE CLASSNOTES 3

If these areas of critical importance can be examined carefully and thoughtfully, and creative changes effected relatively soon, we will have demonstrated that we can respond appropriately to the external environment, and in the process will have strengthened our programs and practices. We also will create the environment in which other difficult problems confronting the University can be dealt with openly and effectively.

### **Other Areas of Concern**

There are additional areas of concern which must be addressed by the Willamette community in the near future. One which can be postponed no longer is university governance. It is critical that decision-making procedures be streamlined and that established methods for implementing programs and policies be formulated. This is a task requiring a University-wide perspective and the expertise of those familiar with techniques of governance. The Committee for Institutional Change recommends that the President proceed with implementation of the Committee on Committees report of November 8, 1973: That a governance Committee be appointed "....(1) to r and recommend a plan of University governance; and (2) to formulate a . (1) to review recommendation for a revision of University committee structure." The Committee further recommends that the governance structure contain a mechanism for developing reasonable procedures for cut-backs in university operations should the contingency of inadequate revenue occur.

The Committee recommends that other areas of concern, listed below, be addressed by task forces as soon as possible after the

priority needs have received attention. 1. Better information and participation in setting priorities for allocating

resources.

e

nt

ng

I

ns

- Student services. 3 Student recruitment practices and policies
- Student cost factors. 5. Faculty, student and administration
- evaluation

6. Faculty-staff recruitment practices. (Ed. note: The Committee outlined task force organization and proposed implementation, which is deleted from this report because of space limitations)

### THE TASK FORCES

In order to honor a commitment to liberal education and to respond to a challenging external environment, Willamette University must continue to evaluate its programs and methods of instruction and to seek better ways of providing effective learning opportunities.

Modes of Inquiry Numerous suggestions have been made by members of the University community for modification of the educational experience at Willamette. These suggestions should be studied. In addition, higher education is experiencing demands for increased flexibility in means of obtaining college training and degrees. It may be possible to adapt the Willamette program to meet some of these demands and to increase opportunities for students of diverse backgrounds and ages to attend Willamette.

Charge - The Task Force on Modes of Inquiry should determine the composition, preferences, ad expectations of our student body and should study proposals for change and improvements in the academic experience at Willamette. It should make

recommendations of proposed changes and should oversee implementation of approved changes

The Task Force is encouraged to seek immediate approval and implementation of proposals as they are developed.

Guidelines - The Committee for Institutional Change has received information which suggests that members of the University community desire improvements in the

- educational program which would: 1. Increase the opportunities for independent study and put more focus on
  - individual achievement. 2. Place more emphasis on an ability to
  - synthesize information and to develop analytical skills 3. Make our programs more responsive to
  - preferences and expectations of students.
  - Provide more continuity between the living experience and the classroom.
     Increase the attention paid to moral and
  - ethical judgment
  - 6. Develop greater "esprit de corps" among all members of the Willamette community for academic inquiry in general, and for its manifestation at
  - Willamette in particular.
  - 7. Develop greater diversity in the academic community
- 8. Provide alternatives to traditionally accepted methods of academic bookkeeping
- 9. Highlight the relevance of liberal arts to the everyday world.
- During its studies and deliberations the Task Force should maintain an awareness of: 1. Current strengths of the University.
- Financial and physical implications of
- any recommendations 3. External factors and pressures affecting higher education.

### **Possible Action Area**

- 1. Interdepartmental and interdisciplinary seminars: (Faculty and students from different departments and disciplines or mixed students and local residents organized around a "theme" or special interests of participants).
- 2. The freshman year as a unique
- experience. 3. Innovative programs to attract a greater diversity of participants:
  - a. Upside down degrees (accept major from community colleges o technical training and finish degree "requirements" with liberal arts
  - courses) b. Mini-courses - night, weekends, summer. (Short courses, "skills courses," summer institutes,
- academic retreats.) Community education or continuing education.
- d. Opportunities for alumni, emeritus, and retired faculty.
- e. An Institute for Innovative Studies as a catalyst for change on the campus.
- 4. Off campus programs a. Exchange programs between students, between faculty or both; individually or in groups, national or international.
  - b. Work-study programs. fore interi
- d. Foreign study programs. e. Consortia (one example, consortium of colleges which support Malheur Field Station).

### Inter-College Relationships

Rationale - Administration, Law, Liberal Arts, Music-Theatre. Together we comprise the University and share a responsibility for educational environment of our students. We have common ties in our concern for the wellbeing of mankind. As a university we should encourage imaginative and integrative efforts through the creative arts. Closer intellectual and co-curricular ties among the four colleges hold exciting opportunities. It would be idealistic to believe that closer interaction

among the college can be achieved easily or immediately. A degree of autonomy is necessary and inevitable. However, possibilities for mutual enrichment do exist, and we have a responsibility to grapple collectively with some of the major problems which will confront society in the future,

Charge – The task force on Inter-College Relationships should examine for each college available options for fostering closer ties among the colleges and explore implications of such options. Proposals might affect relationships among specific colleges and programs or among all.

The task force is encouraged to seek immediate approval and implementation of proposals as they are developed.

### **Possible Action Areas**

- 1 Development of mechanisms to facilitate an exchange of professional information and developments among various disciplines.
- 2. University Forum programs on topics of current interest drawing on the expertise of the various colleges and their faculty. Some of the programs might bring outstanding individuals to the campus for extended periods to interact with persons from all of the colleges and with
- the Salem community 3. Co-curricular options for graduate and undergraduate students in the
- performing and creative arts. 4. Opportunities for faculty to increase awareness of and expertise in other fields of inquiry for application in their own areas of specialization. 5. Development of a university research
- center on social issues. 6. Development of integrated programs to provide training for civil authorities journalists, business persons, and those in other fields, who have continual contact with the legal and administrative systems

### Designs for Time and Space

Rationale - Time and space. Do we use them or do they use us? Ideally, a university has freer use of time and space than any other segment of society. As Willamette has become more institutionalized, however, it appears that our use of time and space has become institutionalized as well. It doesn't have to be that way. We don't have to regard Willamette as a place in fixed space running on a schedule of fixed time. Willamette is an idea, a community of people, a style of learning. It has only the spatial boundaries we choose to impose on it. Similarly, Willamette can use time however we deem it appropriate-the year, the week, the day are ours to do with as we please. The purpose of DESIGNS FOR TIME AND SPACE is to reawaken our sense of freedom concerning these concepts. It is to provide an opportunity for those with ingenuity and interest to evaluate our use of time and our sense of space and to propose alternatives if they find we have been trapped by either concept instead of using them as tools.

Charge - The charge to the task force necessarily must be open-ended. Rather than narrow guidelines, the Committee for Institutional Change suggests four categories of possible inquiry. They should not be considered binding nor the only categories. Their purpose is to encourage us to look critically at where and when we do what we do. Careful self-examination, coupled with our own ideas and plans which appear to be working at other institutions, hopefully will provide keys to help us unlock new perspectives on our educational missions and the times and spaces in which they are pursued.

In suggesting DESIGNS FOR TIME AND SPACE the Committee feels compelled to emphasize practical financial constraints confronting Willamette. As in American society generally, it is necessary for us to learn to use what we have more effectively efficiently and economically. This necessity need not be a liability. It may be an asset to

help us focus attention on "better" and "flexible" rather than just "more" and "traditional." The Committee urges task force members to examine, to dream, to create, and to do so with the understanding that good ideas and liberating designs don't always have to cost a lot.

The Task Force is encouraged to seek immediate approval and implementation of proposals as they are developed.

(Ed note: Committee suggestions on evaluative criteria in regard to time and space-encompassing flexibility, economy, learning impact, and responsiveness to community needs-have been deleted).

Category of Inquiry-Time Willamette's use of the year. Each university must find that which makes it distinctive and educationally attractive. We must consider seriously whether the current organization of semesters is best suited to Willamette's educational strategies. Are there alternatives which would provide students and faculty greater flexibility and better programs while making better use of the physical plant? Willamette's use of the day and week Scheduling university activities during the day and week poses chronic problems. There may be 168 hours a week at our disposal, but the cry, "I can't find the time," seems to have found a permanent place in our vocabulary. The following questions may prompt further ideas concerning our scheduling problems. 1. Does the daily schedule prevent any

- group, on or off campus, from using the university or using it effectively
- 2. Does the 50-minute morning, typically 65-minute afternoon class schedule facilitate learning? Have the many
- deviations from that plan resulted in any educational complications? 3. Can we schedule a time block during
- the day for committee meetings? 4. Must virtually all extra-curricular
- seminars wait until evening If the energy crisis will be keeping us closer to the University on weekends, what kinds of learning activities could occur then?

### **Category of Inquiry-Space**

Willamette's use of space. We need to scrutinize places on campus we regard as "learning centers" - classrooms, libraries, living organizations. What kinds of attitudes do they encourage? Are they conducive to learning? What kind of learning? Similarly, we need to scrutinize Willamette's living environment. How can it be made more pleasant? Are living organizations being used effectively to develop human potential? Are our diverse spaces sufficiently flexible to serve diverse needs? Willamette's "location." Willamette is located in Salem, Oregon. It also is located wherever Willamette people are. There may be more effective ways to emphasize Willamette "off campus," both in terms of the Salem community and in terms of off campus study programs. Similarly, there may be better ways to take advantage of Willamette's physical setting with respect to educational opportunities, sharing of facilities with other Salem groups, and making the campus more inviting to those not currently a part of it.

# GSA to be 'One of a Kind'

Pieces are coming together for the Fall start of Willamette's unique **Graduate** School of Administration

Fitting all the pieces together to start a new graduate school at Willamette this fall is keeping Dean Stephen H. Archer and others extremely busy, but the unique new concept is starting to take shape

Four faculty members for the Graduate School of Administration (GSA) have been appointed. Architects are working on final drawings for construction bids on the \$1.5 million Seeley G. Mudd building to house the GSA. Applications are still being received for an initial class of 50 students. And Archer is answering a lot of questions about the GSA, Willamette's single most expensive campaign ever-\$5.2 million. (See related articles on the building and faculty.

"We'll be one of a kind when we get going," is the quick response from Archer to the frequent question "just how unique is this Graduate School of Administration you're starting?"

A recognized authority in business finance with extensive academic background in both business and public administration, the 45-year-old Archer is directing the final phases of a plan that was proposed ten years ago by members of the undergruduate departments of economics and political science

The basic idea of the master's degree program is to educate enlightened administrators with an understanding of both private and public enterprise. After serving 17 years on the faculty at the University of Washington Graduate School of Business, Archer has long felt the need for a more sophisticated type of manager who can "get the job done" through the maze of vested interests and "red tape."

"How frequently is heard the exasperation of the business executive over 'those people at the Capitol who just don't know what we're up against'?" asks Archer.

"Or in government, is there an official who hasn't said 'those people out in business have no idea the kind of public pressure we're under'?" he adds.

It is this sense of frustration-evident in the relations between business, labor, consumer, educational, government and environmental organizations-which has led the new GSA to stress "interorganizational understanding."

"That's our prime objective, and our location, governance, curriculum, instruction, and the service opportunities in

"About one-third of the curriculum will change from year to year to meet changing needs of society

and current issues"

the Northwest are what will make us different from the dozen or so generic schools of administration in the country,' explains Archer.

The generic schools of administration cut across all areas of management, not only the popular fields of business and public administration, but other fields such as education, law enforcement, health care, and communications for example. In the Western United States, these schools are at the University of Denver and the Universities of California at Irvine and Riverside in addition to Willamette's new thrust in the Northwest

How well is the GSA being received in the Northwest?

"We've had excellent feedback from business and government leaders, many of whom will be helping us with internships in the second year of study, and we've generated about 400 inquiries from undergraduates and present junior executives who are looking for a unique avenue to career advancement," answers Archer, who has been on an extensive speaking tour around the Northwest.

Full time students can complete the program in two years, but the GSA will also cater in the future to part time students, present managers who want some refresher courses, students working for a combined law and administration degree, and people participating in seminars and workshops which the GSA expects to sponsor periodically.

The curriculum will be characterized by its flexibility after a first year that is uniformly structured to provide a basic groundwork in the concepts and analytical skills germane to all administrative jobs. About one-third of the curriculum will change from year to year to meet changing needs of society and current issues, predicts Archer, and a great emphasis will be placed on studying and working through actual operational problems connected to the students' individual career objectives. All graduates will be required to complete an internship or research paper, and most will participate in a final semester seminar in business-government relations.

Archer and his new faculty met in mid-March to iron out some matters pertaining to student recruitment, facilitie curriculum, intra-university relations, and give the new professors a chance to scout real estate for moves this summer.

"We're all anxious to get classes going Sept. 3, and it won't be too long before the GSA will be making a significant impact in the area," predicts Archer.

1970 graduate of Willamette, was the first student accepted for the

# June start planned for **Mudd Building**

Trustees of Willamette and of the Seeley G. Mudd Fund of Los Angeles have given the green light to architectural plans for the \$1.5 million Seeley G. Mudd building to house the new Graduate School of

Administration by July, 1975. Construction is expected to start in June on the 19,000 square foot, three-level brick structure just south of the Collins Legal Center on the corner of Winter and Trade Streets S.E.

Designed by Payne, Settecase & Smith architects of Salem, the building of modern Georgian style complements existing campus buildings. The \$1.5 million capital expenditure—of which \$1 million was a challenge gift of the Seeley G. Mudd Fund in November, 1971-covers building cost, equipment, landscaping and parking. Another \$3.7 million is to be raiseed as endowment for the GSA. Through mid-April, gifts and pledges toward the GSA totaled \$2.2 million.

The Mudd building will house a computer center, administrative offices, lounge and student body offices on the lower level. The upper two levels will accommodate offices for 10 faculty members, a library for 25,000 volumes, and five auditorium and seminar classrooms, some with special convertibility features to accommodate varying sized groups.

Total funding for the construction is expected to be in hand by June 30, 1974. One of the non-capital gifts to the GSA fully endows one faculty position. Named in honor of Guy F. Atkinson, the endowed

chair is a gift from the family members of the late industrialist who founded one of the world's largest construction companies in his name in South San Francisco. His son, Geo. H. Atkinson, is chairman of the Willamette Board of Trustees and chairman and chief executive officer of the Guy F. Atkinson Co.

The four new associate professors who will initiate instruction in Willamette's new Graduate School of Administration this fall represent different areas of expertise to tie in to the blend of business and public administration planned for the new

master's degree program. The four and their specialties are

Managers will improve skills at GSA Communications Seminar

A seminar on communication skills for managers will be sponsored by Willamette University's proposed Graduate School of Administration May 17-19 at the Inn at Spanish Head in Lincoln City. Entitled "Toward Better Humanagement," the seminar will

emphasize the importance of human understanding and feeling in the area of communications in management at any level.

Six distinguished scholars and actitioners will serve on the se faculty, exploring the areas of intra and inter-personal communication and intraorganizational communication. They will address themselves to problem solving and practical suggestions toward better "humanagement.

Dr. Dominic LaRusso, professor of communications at the University of Oregon, will explore the areas of intrapersonal communication. He has participated in many seminars and workshops in communications and management.

Willamette University's winner of the 1973 teaching excellence award, professor of philosophy Dr. Jerry Canning, will keynote the section on inter-personal communication. He has participated in several institutes on developing leadership

skills, human relations, and transactional analysis A woman Ph.D. in organization paychology, Dr. Barbara Karmel, professor

of organizational behavior at Oregon State University, will offer ways to overcome barriers to communication in organizations. She is director of the Oregon State Management Development Program

and an experienced speaker and author on organizational dynamics. Three other seminar keynoters are Willamette University President Robert

Lisensky, Willamette's Director of Learning Resources Dr. Wright Cowger, and Mrs. Leise G. Robbins Regional Director of the Communications Institute at the Training Center of the U.S. Civil Service Commission in Seattle. Dean Stephen H. Archer of the new

Graduate School of Administration is serving as seminar coordinator. Reservations, limited to the first 40, must

be in to him by May 2. The seminar fee is

profess of economics and business at Central Washington State College;

 Dr. Marc G. Choate, 34, finance and business economics, presently assistant professor of finance at the University of Massachusetts:

• Dr. Bruce L. Gates, 29, public and health care administration, presently assistant professor of public administration at the Maxwell School of Citizenship and Public Affairs of Syracuse University; • Dr. Russell J. Petersen, 37,

accounting, presently assistant professor of accounting at Duke University.

Dean Stephen H. Archer is greatly pleased with the caliber and diversity of the new faculty which will be welcoming between 50 and 75 first-year students for the start of classes Sept. 3.

Carpenter is not a newcomer to Salem. He was assistant attorney general in the Oregon Department of Justice taxation division from 1965-67. He holds two degrees rom the University of Oregon, a B.S. in business and technology and the J.D. from Accounting Review magazine.

administration. administration from Princeton, Gates branched into public administration International Affairs. Among several the World Health Organization. Petersen holds degrees from Oregon

# **On the Willamette Scene–Campus Briefs**

### Willamette in the World

Education with a foreign flavor continues to attract full complements of students. While 20 students complete the Willamette Semester in France this spring at the University of Caen, two dozen more are being briefed for a fall visit to Costa Rica. Ireland is on the horizon for spring.

In a little more unusual fare, seven students will accompany earth science professor Harry Rorman to Australia this summer for a 45-day study of geology, geography and the environment down under. The seven took Rorman's "Foreign Field Study" course offer "to go anywhere six to nine students agree upon."

Political Science professor Ted Shay will accompany the students to Costa Rica where headquarters will be the Costa Rican-North American Cultural Center and the University of San Jose for 10 weeks. Then for five weeks the group will take a comparative government and economy study tour to the four other Costa Rican countries of Nicaragua, Honduras, El Salvador, and Guatamala. English professor Carol Long is planning the Ireland study. Willamette students had earlier completed Willamette semesters in England, Mexico and Japan.

### **How High Inflation?**

Two voucher checks found behind a shelf in an old vault in Gatke Hall on campus provide a brief glimpse at labor rates near the turn of the century. One dated April 5, 1907 drawn to Melvin R. Hoff was in payment "for piling wood four and twothirds hours at fifteen cents per hour (70c)." The other dated June 30, 1908 to Ray R. Price covered a full day's work "nine hours work cleaning office \$1.80 and Bon Ame 10c." Of such importance were these payments that each check bears the signatures of four people, the president and secretary of the Board of Trustees and two members of the auditing committee who "examined and approved." What would the money be worth in today's dollars assuming the checks had been deposited in savings and compounded at three per cent interest for 67 years? Only \$5.07 and \$16.66 respectively. Question: Could Mr. Hoff have bought more for 70 cents in 1907 than he could for \$5.07 today?

### Dean of Music & Theatre Among Administrative Changes The appointment of Dr. Charles M.

North as Dean of the College of Music and Theatre is but one of several administrative changes for the next academic year. President Robert Lisensky re-aligned several positions in the development and admissions areas "to take full advantage of individual strengths."

(see column on personnel changes). Dean North will succeed Acting Dean Richard Stewart who will return to full time teaching in the music education department. A former professor at Alaska Methodist and Eastman School of Music and presently chairman of the music graduate program at Western Washington

State College, Dr. North will assume duties Aug. 15.

### "Names" Drop By

N

Several distinguished visitors have attracted considerable attention on campus this spring, and four more are due for Alumni-Commencement Weekend May 11-12. The Atkinson Fund sponsored three noted scholars, Editor Norman Cousins of the Saturday Review-World; Anthropologist-Author-Poet Loren Eisely; and retired Associate Justice of the U.S. Supreme Court Thomas C. Clark. All three attracted large audiences and the latter made many friends in a two-week stay at the College of Law.

The first Northwest Writers Conference in late March attracted such writers as Ken Kesey, David Shetzline, Don Berry, M. F. Beal and Ursula LeGuin, while the poetry sections were lead by William Stafford, Dick Bakken, Richard Hugo. Primus St. John, Philip Dow, Greg Keith and Diane Wakoski. Appropriately, the publishing field was ably represented by alumnus Ken McCormick, senior consulting editor of Doubleday, who addressed a auccessful banquet of the Friends of the Library.

The Alumni-Commencement Weekend features three noted speakers and an old friend. Oregon Governor Tom McCall will deliver the commencement address at 3 p.m. May 12 and receive an honorary Doctor of Laws degree; Lutheran theologian, historian and author Martin E Marty is the Baccalaureate speaker at 11 a.m. May 12 (he will receive an honorary Doctor of Humanities degree); and Carl Marcy, recently retired Chief of Staff of the U.S. Senate Foreign Relations Committee, will address the alumni banquet at 6:45 p.m. May 11. The "old friend" is James Corson, Willamette's Interim President from 1972-73 who returns to receive an honorary Doctor of Humane Letters degree.

### Team Handball Squad Invited to Nationals

An 11-member Willamette team handball squad is one of 16 teams invited to play in the National Team Handball championships at Monmouth, New Jersey May 11-12. Willamette's team is coached by former Olympic team handball player Dan Foster, a junior, and graduate student Bill Fleming who played on the defending champion Adelphi University team. Team handball is the sport that Germany added to the 1972 Olympic Games. A goalie protects a two by three meter net while six opponents traverse the 20x40 meter court to throw a "cantaloupe" size ball past him. It is a fast moving game that is growing in popularity in this country.

### Gift Highlights

A \$100,000 endowment gift for scholarships and loans, notice of a foundation grant, and some volunteer fundraising by students highlights recent development progress.

The donor of the large endowment gift wishes to remain anonymous. However, President Robert Lisensky expressed "a deep sense of gratitude" to the individual for what is one of the largest anonymous gifts to the University in recent years. Half of the income from the gift will be used for scholarships to "outstanding students" in need of aid, the other half for student loan funds.

Notice of an Aug. 1 grant was given by the Louis W. and Maud Hill Hamily Foundation of St. Paul, Minn. which will provide \$20,000 plus training, workshops, literature and consultant help in developing a stronger program in deferred giving at Willamette over the next two years. The initiative of students to help with the funding of the Lestle J. Sparks Center led to a campus-wide competition to get dollars for the new physical education and recreation center. Pi Beta Phi sorority won a free steak dinner for topping the effort on an average gift basis.

Willamette's 10-month gift total stands at \$1,389,022, still within reach of the \$1.7 million goal for the year.

### **Personnel Changes**

APPOINTMENTS Dr. Charles M. North, 48, Dean of Music and Theatre, from chairman of music graduate program at Western Washington State;

- D.M.A. from Eastman School of Music, University of Rochester. Effective Aug. 15. Daryl James Evans, 33, Business Manager, from controller, University of San
- Francisco Effective April 15. The Rev. William Young, 28, Instructor in Religion, from Ph.D. studies at the University of Iowa; M.Div. from McCormick Theological Seminary; ordained Presbyterian minister. Effective Aug. 27.

### RETIREMENT

Dr. Norman Huffman, Professor of Religion, chairman of religion department and professor at Willamette since 1946. Effective May 31.

### RESIGNATION

Dr. Otto Mandl, Professor of German, at Willamette since 1962; former chairman of the foreign language department. Effective May 31.

RE-ALIGNMENT'S (Effective June 1) Harry Manley-Vice President for

- Development from Provost. Paul Duell—Dean of the College of Liberal Arts to coordinate all four colleges of the University.
- R. A. Buzz Yocom—Dean of Academic Services from Dean of Admissions and Registrar: to supervise admissions, registrar, continuing education, internships, learning resources and summer programs.
- Frank Meyer-Remains as Director of Admissions with full responsibility for

undergraduate admissions program. Albert Berglund-Registrar from Associate Director of Admissions.

- Teresa Krug Hudkins—Director of Alumni Relations from Admissions Counselor and Assistant Director of Alumni Relations.
- Guthrie Janssen-Planned Gifts Director (part-time) from Director of Development. (Effective March 1.)

PROMOTIONS (Effective June 1) (new title and year of original appointment) Larry D. Large-Vice President for Student Affairs (1972)

Stanley Butler—Professor of Music (1950)
Dr. James Hand—Professor of Religion (1964)
Dr. Kenneth Smith—Professor of Political Science (1963)

Dr. Dallas Isom—Professor of Law (1968) Dr. Ross Runkel—Professor of Law (1969) Dr. Donald Turner—Professor of Law (1971)

Dr. Gerard Bowers-Assoc. Profl of English (1971)

Dr. Wilbur Braden-Assoc. Prof. of English (1970)

Stephen Prothero-Assoc. Prof. of Mathematics (1963)

Dr. Claudia Burton-Assoc. Prof. of Law (1971)

Virginia Bothun-Asst. Prof. of English (1968)

### SABBATICALS Fall semester:

- Maurice Brennen, Assoc. Prof. of Music, to study English band music and music therapy programs in England and Europe; Stanley Butler, Assoc. Prof. of Music, to study contemporary piano music analysis at the University of Southern California.
- Spring semester: **Paule Drayton**, Assoc. Prof. of French, to complete Ph.D. thesis; **Dr. James Hand**, Assoc. Prof. of Religion, to continue his study of the Japanese language; **Dr. Robert Purbrick**, Prof. of

Physics, to write a text or laboratory manual; and Dr. Ted Shay, Prof. of Political Science, to study the merging role of China in world and Asian affairs. LEAVES OF ABSENCE Full year:

John Paulus, Prof. of Law, to teach at Hastings Law School; Francoise Gouery Richardson, Asst. Prof. of French, to study for Ph.D. at University of California at Santa Barbara.

### Spring semester: Stanley Butler. ACADEMIC TENURE

ddress.
