

Willamette University Bulletin of Information

ANNOUNCEMENT

... OF ...

Summer Session

HELD AT NEWPORT, OREGON
JULY 1 to AUGUST 9, 1907

**OFFICERS OF THE SUMMER
SESSION
1907**

ADMINISTRATIVE BOARD

JOHN HAMLIN COLEMAN, D. D.,
President of the University.

WILLIAM ELWOOD KIRK, A. M.,
Director of the Summer Session.

JAMES THOMAS MATTHEWS, A. M.,
Secretary of the Summer School.

ARTHUR J. PRIDEAUX, A. B.,
Treasurer of the Summer School.

SUMMER SCHOOL FACULTY

Louis Bach, A. M.,.....*Modern Languages*

George E. Coghill, Ph. D.....*Biology*

Mrs. Carrie Chapel.....*Primary Methods*

Ray D. Fisher, A. M., *History and Economics*

William E. Kirk, A. M.....
.....*English, Greek, and Latin*

James T. Matthews, A. M.....
.....*Mathematics, Psychology*

Arthur J. Prideaux, A. B.....
.....*Commercial Branches*

Mary E. Reynolds, B. S.....
.....*Pedagogy, Mathematics, and Grammar*

Henry C. Tillman, M. S.....
.....*Astronomy and Physics*

INTRODUCTORY

THE Third Summer Session of Willamette University will open at Newport, Oregon, on Monday, July 1, and continue until Friday, August 9, inclusive. No exercises will be held on Saturday, unless it is deemed expedient. There will be two departments:

I. *Collegiate and Preparatory*, offering instruction in the following subjects:

Astronomy,	Greek,
Biology,	History,
Economics,	Latin,
English,	Mathematics,
French,	Physiology,
German	Spanish.

Each course will consist of thirty class periods or their equivalent in laboratory or field work. DUE CREDIT WILL BE GIVEN in the College or the Preparatory departments for approved work.

II. *Normal*, giving instruction in orthography, reading, writing, written arithmetic, English grammar, geography, United States history, theory of teaching, physiology and hygiene, civil government, Oregon school law, English literature, and primary methods. Each course will consist of as many class periods as may be found necessary to complete the work.

The courses are designed for the following classes of persons:

1. Teachers in elementary schools and

high schools who wish to prepare for state and county examinations.

2. Teachers and all others who seek opportunities for advance study and research in the subjects in which they are especially interested.

3. Students, teachers and others wishing to prepare for the entrance requirements of Willamette University or any other college, or to pursue courses leading to a degree.

TUITION

The regular tuition for work in the Normal courses is \$10, which entitles the student to take two or more subjects for the full term of six weeks.

In the Collegiate and Preparatory departments a charge of \$5 is made for each subject.

NEWPORT

The University has selected Newport as the place for holding the Summer Session, because of its unparalleled advantages for study. It is situated on the beach on the north side of Yaquina Bay, and is reached by the Southern Pacific and the Corvallis & Eastern railroads, connecting at Albany or Corvallis. *Round trip from all points to Newport at greatly reduced rates.*

Perhaps nowhere in America are the beauties of sea and land so wonderfully combined. It has been said: "No pen can convey a proper idea of the stupendous grandeur and sublimity of the mighty billows as they dash in fury against the riven-rock shore. No brush can portray the marvelous beauty of the setting sun as it sinks to rest behind the peaceful waters. No tongue can

tell the million creatures that live within the vast, mysterious region called the sea, their industry, their quarrels, their combats, and their loves. To be appreciated they must be seen and studied. The features on the land are no less attractive than those of the ocean. The fragrant pine, the bright colored rhododendron, the luscious berries, the fern-clad glen, the rippling brooks, the sparkling springs, all vie with the pebbly beach, the miniature aquarium, the rock oyster beds, the mosses and shells, as objects of interest and pleasure. Newport is pre-eminently a literary center for Summer tourists, on account of its many advantages for the study of the sciences. Socially she cannot be surpassed either in the character of her visitors or the class of her entertainments and amusements. She is free from all that objectionable class of people who crowd the resorts close to a large city."

LECTURES

During the Summer Session several lectures will be given. Among them will be two by President Coleman: "Divine Providence in American History" and "The United States in the World's Conflict." Three illustrated lectures will be given by Professor Tillman: Two on Astronomy and one entitled "Where Rolls the Oregon." These and all other lectures will be free to all Summer School students.

EXCURSIONS

Arrangements have been made to make excursions at a minimum cost: (1) To the Light House, (2) The Seal Rock, (3) Alsea Bay, (4) The Oyster Beds, (5) Short ocean trips on the tug.

SCHOOL BUILDING

Through the courtesy of the School Board of Newport, the sessions will be held in the High School Building, which is midway between the bay and the ocean.

CAMP WILLAMETTE

Arrangements have been made with Mr. S. G. Irvin for fine camping grounds between the School Building and Nye Beach. This place will be known as CAMP WILLAMETTE and will be for the use of all members of the Summer School. A good spring is near by, and a board walk leads to the School Building on one side, and to the ocean on the other. The rentals quoted below include fine water and first-class sanitary privileges:

1. Ground rent for family tent, 50c a week, or \$2 for the season.

2. Rent for 9½x12 tent, floored, and two-foot wall of lumber, and 3½-foot wall of duck on frame, set up ready for occupancy; including following furniture: 1 wire mattress and 1 good excelsior mattress, 2 chairs, 1 lamp, 1 wash bowl and pitcher, 1 looking glass, 1 wash stand, 1 table; \$4 per week or \$20 for six weeks.

3. The 12x14 tents will be like the above and contain 2 beds and four chairs. The rent per week will be \$5 or \$25 for six weeks, including water and ground rent.

The first size is intended for two persons; and the second for four, but as many as wish may occupy them, so long as no more furniture is required.

DINING TENT

There will be a co-operative dining tent where board may be secured at cost, estimated at from \$2.50 to \$3 per week.

BOARD AND ROOM

Those who do not care to tent can secure good board and room at from \$7 to \$10 per week. For information, write S. G. Irvin, Newport, Oregon, or Prof. J. T. Matthews, Salem, Oregon.

UPON ARRIVAL

Inquire at the Summer School office at boat landing in Newport, for special rates on hauling baggage and information about tents and all other matters.

IMPORTANT

All teachers and students planning to take any work in the Summer School are requested to send word to Secretary J. T. Matthews, Salem, Oregon, for information about tents, board and rooms and other matters of interest. If you are planning to tent, bring your bedding and check as baggage.

COURSES OF INSTRUCTION

COLLEGIATE AND PREPARATORY

ASTRONOMY

Professor Tillman.

This course is intended to cover the ground as presented by Young's Elements. Five hours per week. An opportunity will be given to such as desire to view the moon and other objects of interest through a three-inch telescope, having a power of 110 diameters. Several stereopticon lectures will be given on special phases of the subject.

BIOLOGY

Professor Coghill.

This course will consist of lectures, laboratory and field work. Plants and animals will be studied in their natural surroundings, and collections will be made for more minute anatomical and physiological studies in the laboratory.

ENGLISH

Professor Kirk.

Studies in Shakespeare. An analytical study of Macbeth, Hamlet and King Lear.

LATIN

Professor Kirk.

Vergil's Aeneid, Books I to IV. Intended for teachers in secondary schools and for advanced students. Books II, IV, and VI

will be studied critically and with special reference to their literary merit. The text of Greenough and Kittredge, Bennet, or Knapp may be used.

Horace's Odes. The text used in this course will be Smith's Odes and Epodes.

GREEK

Professor Kirk.

Homer's Odyssey, Books I-IV. The text will be Merry's Odyssey, Books I-XII.

HISTORY

Professor Fisher.

In this department the work offered will be in accordance with the needs of the applicants.

MATHEMATICS

Professor Matthews.

For the work offered in this department see under the Normal School.

MODERN LANGUAGES

Professor Bach.

Provision is made for all kinds of classes, elementary or advanced, according to the needs of applicants. An especially interesting feature will be a conversation class in German, which all may join who have had at least one year's training. The purpose of this special class is to make the students talk. No text is used and no home study

required. The teacher furnishes the topics from the wide realms of nature and of human life.

For such as may not be able to find their purpose suited in any regular class, arrangements will be made for private instruction.

*An attractive pathway to the old lighthouse
near Newport*

NORMAL

BOTANY

Professor Coghill.

The course in Botany will be based upon Bailey's "An Elementary Text for Schools," supplemented by the works of other authors.

BOOKKEEPING

Professor Prideaux.

The text used will be that adopted by the State Text-book Commission, "The Art of Accounts," by Marshall P. Hall. The fundamental laws of the science will be given most emphasis, and special stress will be laid upon the theory of accounting.

CIVIL GOVERNMENT

Professor Fisher.

A description of the form of the Government of the United States, based upon Doles' "The American Citizen."

COMPOSITION

The work will deal with the fundamental principles of English composition and will be based upon Carpenter's Elements of Rhetoric and English Composition, and Notes for Teachers of English Composition by the same author.

GRAMMAR

Professor Reynolds.

The text-book for the course in English Grammar will be Reed and Kellogg's "Higher Lessons in English." A thorough study of the analysis of sentences will be followed by drills upon the classification

and modification of words, and the application of the rules of syntax.

ENGLISH LITERATURE

The study in this subject will be based upon "English Literature," by Stopford A. Brooke.

GEOGRAPHY

Descriptive and Political Geography based on Frye's text.

PHYSICAL GEOGRAPHY

Professor Prideaux.

"The First Book of Physical Geography," by Ralph S. Tarr, will form the basis for the class-room work, while a later work by the same author and LeConte's Geology will be used collaterally. The region about Yaquina Bay is particularly good for an exposition of the theories and facts of this most interesting science. Trips about the locality will illustrate the data of the text.

HISTORY

GENERAL HISTORY

Professor Fisher.

This course will include a description of the general literature used in elementary study of history in addition to the narrative. Adams' European History will be used as a text.

UNITED STATES HISTORY

Professor Fisher.

Special attention will be paid to geographic influences on the history of our country. The text will be Thomas' History of the United States.

MATHEMATICS

WRITTEN ARITHMETIC

Professor Reynolds.

The state text, Wentworth's Practical Arithmetic, will be supplemented by work from other sources. The purpose is to illustrate the principles of Arithmetic and show the methods of enlisting the reason of the pupil so as to make the instruction effectual and permanent.

The text-book used in the study of Mental Arithmetic will be the "New Normal Mental Arithmetic," by Brooks. This subject must be very thoroughly understood by the young teacher, and the present course is designed to be a helpful review.

ALGEBRA

Professor Matthews.

The state text, Wells' Essentials, will be used. The student takes up the work at the point he thinks best.

PLANE GEOMETRY

Professor Matthews.

The state text, Wentworth's Plane Geometry, will be used. All of the theorems will be studied and as many originals as time will allow.

PENMANSHIP

Professor Prideaux.

A comparative study of the vertical and of the slant systems, with an exemplification of both the finger and the muscular movements. The text for the slant system will be "Business Writing," by A. N. Palmer, and that for the vertical system, "The Natural System of Vertical Writing," by A. F. Newlands and R. K. Row.

PHYSICS

Professor Tillman.

This course will cover the ground as presented in the state text-book, dwelling particularly on fundamental principles. Such class experiments will be performed as time will permit.

PHYSIOLOGY

Professor Coghill.

The text used will be "Briefer Course, Physiology, Illustrated by Experiment," by Buel P. Colton.

PRIMARY METHODS

Mrs. Carrie Chapel.

The University is fortunate in securing Mrs. Chapel of the Salem Schools to give a course in Primary Methods. The work will occupy at least two hours per day, and more if necessary, for three weeks or longer.

PSYCHOLOGY

Professor Matthews.

Buell's Essentials of Psychology will be used. This is an elementary course, designed for those that have little or no knowledge of the subject.

SCHOOL LAW (OREGON)

It is difficult to obtain copies of the School Law from the department. The laws will be printed in the May number of the Oregon Teachers Monthly. Prof. R. F. Robinson, School Superintendent of Multnomah County, publishes for 25 cents an excellent little manual on the School Laws of Oregon. Address City Hall, Portland, Oregon.

THEORY AND PRACTICE

The State Course of Study and White's Art of Teaching are the principal sources of information.
